ENVIRONMENTAL PROFESSIONALS' STATEMENT

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as established in Part 312.10 of Title 40 of the Code of Federal Regulations (40 CFR 312.10) and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

EXECUTIVE SUMMARY

Farallon Consulting, L.L.C. (Farallon) has prepared this Phase I and II Environmental Site Assessment (Phase I and II ESA) Report for the properties at 985 O'Brien Drive, 1001 to 1015 O'Brien Drive, and 1320 Willow Road in Menlo Park, California (herein referred to as the Site). The Phase I and II ESAs were conducted by Stephen Gaynier, Vincent Tilotta, and Richard Makdisi, and were reviewed and approved by Craig Ware. All are experienced Environmental Professionals in the field of Phase I ESAs and related environmental investigations.

This Phase I and II ESA Report was prepared for O'Brien Drive Portfolio, LLC c/o Tarlton Properties, Inc. in accordance with the letter regarding Proposal for Phase I Environmental Site Assessment, 985 O'Brien Drive, 1001 to 1015 O'Brien Drive, 1300 [sic] Willow Road, Menlo Park, California dated April 26, 2021 from Vincent Tilotta and Richard Makdisi of Farallon to Elizabeth Krietemeyer and Cindy Tran of Tarlton Properties, Inc. The Phase II ESA activities presented in this report were conducted in accordance with the letter regarding Proposal for Phase II Environmental Site Assessment, 1320 Willow Road, Menlo Park, California dated July 13, 2021 from Vincent Tilotta and Richard Makdisi of Farallon to Elizabeth Krietemeyer and Cindy Tran of Tarlton Properties, Inc. The scope of work for the Phase I ESA portion of this report is consistent with ASTM International Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13). ASTM E1527-13 is intended to assist the user in satisfying one of the requirements to qualify for protection from potential liability under the Comprehensive Environmental Response, Compensation, and Liability Act as the innocent landowner, contiguous property owner, or bona fide prospective purchaser. ASTM E1527-13 constitutes "all appropriate inquiry" into the previous ownership, uses, and environmental conditions of a property consistent with good commercial or customary practice, as defined in Section 9601(35)(B) of Title 42 of the U.S. Code.

There were no deviations from ASTM E1527-13 during these Phase I and II ESAs, with the exception of non-scope items requested by O'Brien Drive Portfolio, LLC that are not required to satisfy ASTM E1527-13. A limiting condition encountered during the Phase I ESA activities was the presence of furniture and equipment in the Site buildings that prevented Farallon from observing entire interior floor surfaces. Based on information obtained from the Site representative, this limiting condition is not expected to hinder the conclusions of this report.

The purpose of the Phase I and II ESAs was to identify, as practicable, recognized environmental conditions on the Site or proximate to the Site that have caused and/or may cause an adverse environmental condition. This Phase I and II ESA Report provides the results from investigation into past and present ownership and uses of the Site, consistent with good commercial and/or customary practice.

The Site consists of San Mateo County Parcel Nos. 055-421-050, 055-421-060, and 055-421-160, which total approximately 4.3 acres of land developed with three single-story commercial concrete tilt-up buildings totaling approximately 90,600 square feet that were constructed between 1955

and 1963, with additions to the building at 1320 Willow Road completed between 1968 and 1974. A portion of the building at 1320 Willow Road includes a mezzanine level. The Site buildings are occupied by SummerBio (985 O'Brien), Cyngn (1015 O'Brien), Wine Bank (1320 Willow Road), and Garda (1320 Willow Road). Remaining areas of the Site consist of paved parking and landscaped areas. Access to the Site is gained from O'Brien Drive, south of the Site, and Willow Road, west of the Site. According to the San Mateo County Assessor's Office, the Site owner is O'Brien Drive Portfolio, LLC.

O'Brien Drive Portfolio, LLC intends to remove the existing buildings and redevelop the Site with two commercial buildings covering approximately 50,000 square feet, a supporting garage and amenities building, and grounds improvements.

At the time of the site reconnaissance, Farallon observed minor amounts of hazardous materials, including janitorial cleaning supplies, alcohols and acids, and maintenance-related products. The materials were observed to be properly labeled and stored in designated areas of the Site buildings. No evidence of releases was observed on or around the containers at the time of the site reconnaissance.

Historically, the Site appeared in aerial photographs to be used for agricultural purposes from at least 1930 through at least 1948. The current Site buildings at 985 O'Brien Drive and 1001 to 1015 O'Brien Drive were apparent on the southeastern portion of the Site by 1958, and the Site appeared largely unchanged through at least 1960. By 1968, the original portion of the current Site building at 1320 Willow Road was completed. A subsequent addition to the building at 1320 Willow Road expanded the building's footprint to the west by 1974, and appeared largely unchanged through at least 1981. An additional paved surface parking lot was apparent on the northeastern corner of the Site by 1991; the layout of the Site has appeared similar to the present.

Farallon was provided with the *Phase I Environmental Site Assessment Report, 1320 Willow Road, Menlo Park, California* dated September 14, 2015; the *Phase I Environmental Site Assessment Report, 1001 and 1015 O'Brien Drive, Menlo Park, California* dated September 14, 2015; and the *Phase I Environmental Site Assessment Report, 985 O'Brien Drive, Menlo Park, California* dated September 14, 2015 all prepared by Stellar Environmental Solutions, Inc. (2015 Phase I Reports).

According to the 2015 Phase I Reports, a "sump or dry well" was observed on the Site behind the tenant space at 1001 O'Brien Drive, then occupied by Electro-Motion. Site representatives interviewed during the site reconnaissance did not know the historical use of the "sump or dry well." Further inspection of the feature indicated that it may have functioned to allow water to infiltrate into soil. The 2015 Phase I Reports identified the "sump" as a de minimis condition in connection with the Site. Based on the historical use of the Site for agricultural purposes, the 2015 Phase I Reports recommended soil profiling to identify possible contaminants such as pesticides, herbicides, and fertilizers in the event of future redevelopment of the Site. The 2015 Phase I Reports identified no recognized environmental conditions in connection with the Site.

Adjacent properties at the time of Farallon's site reconnaissance included a vacant lot and a church to the southwest, Willow Road followed by an undeveloped lot and residential neighborhoods to the west, Mid-Peninsula High School to the north, industrial buildings to the east, and O'Brien Drive followed by industrial buildings to the south.

Historically, adjacent properties to the north, east, and south appeared to be used for agricultural purposes from at least 1930 through at least 1941, with Willow Road followed by vacant land west of the Site. The north-adjacent property appeared to be used for staging agricultural products in 1948, and a suspected residence was apparent near the northeastern corner of the Site. The suspected residence to the north was no longer apparent by 1958, and new commercial/industrial buildings were apparent to the east and south/southwest, and west across Willow Road. The properties to the north and south across O'Brien Drive were developed with commercial warehouse buildings by 1960, with continued development to the south and east through 1974. Commercial buildings near the southwestern corner of the Site and to the west across Willow Road appeared to have been removed by 1981; those properties appeared to be vacant through at least 1991. Paved parking lots were added north- and southwest-adjacent to the Site by 2002. Periodic earthwork was apparent on the vacant property to the west across Willow Road, with vehicles and equipment apparent on the property between 2003 and 2009, and a building foundation apparent by 2010. The layout of adjacent properties has appeared largely unchanged from 2010 to the present.

City directory listings for adjacent properties included a storage facility, a high school, a caulking materials and equipment manufacturer, and a U.S. Geological Survey warehouse. A historical gasoline service station at 1300 Willow Road, southwest-adjacent to the Site, was listed from at least 1957 through at least 1967. The property to the west across Willow Road at 1283 and 1291 Willow Road was identified as a gasoline service station from at least 1957 through at least 1977. 1305 Willow Road, north-adjacent to the Site across Willow Road, was identified as a gasoline service station from at least 1967 through at least 1973.

Farallon identified San Mateo County Environmental Health Services as the Certified Unified Program Agency for properties in the vicinity of the Site. Farallon contacted San Mateo County Environmental Health Services to request records of underground storage tanks or reported releases in connection with the historical gasoline service station identified at 1300 Willow Road. A representative of San Mateo County Environmental Health Services indicated that it had no records for the property. To close the potential data gap related to closure of the historical gasoline service station identified at 1300 Willow Road, Farallon performed a Phase II ESA on the Site, adjacent to 1300 Willow Road. Four groundwater samples collected as part of the Phase II ESA contained low concentrations of total petroleum hydrocarbons and benzene, which did not exceed the applicable Water Board Environmental Screening Levels. Based on the low concentrations of total petroleum hydrocarbons and benzene in groundwater, the potential migration of hazardous substances to the Site in connection with historical gasoline service station operations at 1300 Willow Road represents a de minimis environmental condition in connection with the Site. The groundwater findings also do not represent any risk of vapor intrusion at the Site.

The conclusion from a vapor encroachment screening (ASTM E2600-15) performed at the Site to consider whether a vapor encroachment condition was a likely potential as a result of an up-gradient, off-Site plume is that a vapor encroachment condition does not exist at the Site. The Environmental Risk Information Services (ERIS) *Database Report* prepared for the Site dated April 29, 2021 (ERIS Report) identified the Site address in several databases. Current and historical tenants of the Site were identified as handlers and/or generators of hazardous materials or waste, with only minor violations noted. Farallon searched the California State Water Resources Control Board online GeoTracker database and the California Department of Toxic Substances Control online EnviroStor database for records related to the Site, but found no listings.

The ERIS Report identified several facilities adjacent or proximate to the Site in the regulatory databases. Several of these facilities, including a historical gasoline service station, have known or suspected releases of hazardous substances to soil and/or groundwater. Based on their current regulatory status, topographic location relative to the Site, and/or relative distance from the Site, these facilities do not represent a recognized environmental condition in connection with the Site.

Based on review of the Site history, interviews with persons knowledgeable about the Site, reconnaissance of the Site, review of regulatory agency lists, and the results of the Phase II ESA, this Phase I ESA did not identify recognized environmental conditions in connection with the Site.

Farallon understands that the Client intends to purchase this property to redevelop it for life sciences research and development and office use. In doing so, the existing buildings are to be demolished and two new commercial buildings covering approximately 50,000 square feet with a supporting garage and amenities building are to be constructed. This property is suitable for the intended use contemplated by the Client. However, the demolition and development phase should be informed by a Site Mitigation Plan that can address environmental issues, including soil profiling for off-Site disposal if required, and construction phase environmental monitoring.

1.0 INTRODUCTION

This Phase I and II Environmental Site Assessment (Phase I and II ESA) Report was prepared by Farallon Consulting, L.L.C. (Farallon) for the properties at 985 O'Brien Drive, 1001 to 1015 O'Brien Drive, and 1320 Willow Road in Menlo Park, California (herein referred to as the Site) (Figure 1). This section discusses the project authorization, and the qualifications of the Environmental Professionals conducting and reviewing the Phase I and II ESA work. Also included in this section are the project purpose, objective, scope of services, deviations, limiting conditions, and data gaps.

1.1 PROJECT AUTHORIZATION

This Phase I and II ESA Report was prepared for O'Brien Drive Portfolio, LLC c/o Tarlton Properties, Inc. in accordance with the letter regarding Proposal for Phase I Environmental Site Assessment, 985 O'Brien Drive, 1001 to 1015 O'Brien Drive, 1300 [sic] Willow Road, Menlo Park, California dated April 26, 2021 from Vincent Tilotta and Richard Makdisi of Farallon to Elizabeth Krietemeyer and Cindy Tran of Tarlton Properties, Inc. The scope of work for the Phase I ESA portion of this report is consistent with ASTM International Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13). The Phase II ESA activities presented in this report were conducted in accordance with the letter regarding Proposal for Phase II Environmental Site Assessment, 1320 Willow Road, Menlo Park, California dated July 13, 2021 from Vincent Tilotta and Richard Makdisi of Farallon to Elizabeth Krietemeyer and Cindy Tran of Tarlton Properties, Inc.

1.2 PROFESSIONAL QUALIFICATIONS

The Phase I and II ESAs were conducted by Stephen Gaynier, Vincent Tilotta, and Richard Makdisi, and were reviewed and approved by Craig Ware. All have an understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions, and the ability to develop opinions regarding conditions indicative of a release or threatened release of hazardous substances and petroleum products. These Environmental Professionals have developed and performed all appropriate inquiry, in conformance with the standards and practices set forth in Part 312 of Title 40 of the Code of Federal Regulations. The professional qualifications of Stephen Gaynier, Vincent Tilotta, Richard Makdisi, and Craig Ware are provided in Appendix A.

1.3 PROJECT PURPOSE AND OBJECTIVE

The purpose of the Phase I and II ESAs was to identify, as practicable, recognized environmental conditions on the Site and within the appropriate study area that have caused and/or may cause an adverse environmental impact. ASTM E1527-13 is intended to permit a user to satisfy one of the requirements to qualify for protection from potential liability under the Comprehensive Environmental Response, Compensation, and Liability Act as the innocent landowner, contiguous property owner, or bona fide prospective purchaser. ASTM E1527-13 constitutes "all appropriate inquiry" into the previous ownership, uses, and environmental conditions of a property consistent

with good commercial or customary practice, as defined in Section 9601(35)(B) of Title 42 of the U.S. Code.

The objective of the Phase I and II ESAs was to perform an appropriate inquiry into past and present ownership and uses of the Site, consistent with good commercial and/or customary practice. This Phase I and II ESA Report is to be used as a risk management tool to meet all appropriate inquiry requirements and the Comprehensive Environmental Response, Compensation, and Liability Act liability defense. The Phase I and II ESAs do not guarantee that there are no impacts to the Site.

For the purpose of this Phase I and II ESA Report, the term “recognized environmental condition” is defined as the presence or likely presence of any hazardous substance or petroleum product in, on, or at the Site due to releases to the environment, under conditions indicative of a release to the environment, or under conditions that pose a material threat of a future release to the environment. The term is not intended to include “de minimis conditions” that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of the applicable governmental agencies.

The term “controlled recognized environmental condition” is defined as a recognized environmental condition resulting from a past release of a hazardous substance or petroleum product that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in-place subject to implementation of required controls.

The term “historical recognized environmental condition” is defined as a past release of any hazardous substance or petroleum product that has occurred in connection with the Site and has been addressed to the satisfaction of the applicable regulatory authority, without subjecting the Site to any required controls.

1.4 PROJECT SCOPE OF SERVICES

The Phase I ESA portion of this report has been prepared in accordance with the scope of work presented in ASTM E1527-13 and the letter regarding Proposal for Phase I Environmental Site Assessment, 985 O’Brien Drive, 1001 to 1015 O’Brien Drive, 1300 [sic] Willow Road, Menlo Park, California dated April 26, 2021 from Vincent Tilotta and Richard Makdisi of Farallon to Elizabeth Krietemeyer and Cindy Tran of Tarlton Properties, Inc. The scope of work for the Phase I ESA included a records review, literature research and review, a site reconnaissance, interviews with individuals familiar with the Site, interviews with local governmental officials, and preparation of this report. The Phase II ESA activities presented in this report were conducted in accordance with the letter regarding Proposal for Phase II Environmental Site Assessment, 1320 Willow Road, Menlo Park, California dated July 13, 2021 from Vincent Tilotta and Richard Makdisi of Farallon to Elizabeth Krietemeyer and Cindy Tran of Tarlton Properties, Inc.

1.5 DEVIATIONS

There were no deviations from ASTM E1527-13 during these Phase I and II ESAs, with the exception of non-scope items requested by O'Brien Drive Portfolio, LLC that are not required to satisfy ASTM E1527-13.

1.6 LIMITING CONDITIONS

A limiting condition encountered during the Phase I ESA activities was the presence of furniture and equipment in the Site buildings that prevented Farallon from observing the entire interior floor surface. Based on information obtained from the Site representative, this limiting condition is not expected to hinder the conclusions of this report.

1.7 DATA GAPS

Data gaps may affect the ability to identify recognized environmental conditions and Farallon's ability to render opinions and conclusions for presentation in the Phase I and II ESA Report. Farallon did not identify significant data gaps during these Phase I and II ESAs.

2.0 SITE OVERVIEW

This section includes an overview of the Site location, improvements, and operations. A description of adjacent and surrounding land use also is provided.

2.1 SITE LOCATION

The Site is northeast of the intersection of O'Brien Drive and Willow Road, at 985 O'Brien Drive, 1001 to 1015 O'Brien Drive, and 1320 Willow Road in Menlo Park, San Mateo County, California. The location is in a commercial and industrial area approximately 3 miles northeast of downtown Menlo Park. The Site vicinity is shown on Figure 1.

2.2 SITE DESCRIPTION

The Site consists of San Mateo County Parcel Nos. 055-421-050, 055-421-060, and 055-421-160, which total approximately 4.3 acres of land developed with three single-story commercial concrete tilt-up buildings totaling approximately 90,600 square feet that were constructed between 1955 and 1963, with additions to the building at 1320 Willow Road completed between 1968 and 1974. A portion of the building at 1320 Willow Road includes a mezzanine level. Remaining areas of the Site consist of paved parking and landscaped areas. Access to the Site is gained from O'Brien Drive, south of the Site, and Willow Road, west of the Site.

Figure 2 presents a plan map of the Site. Additional details pertaining to the Site are provided in Section 8.2, Site Reconnaissance Observations. Site photographs are presented in Appendix B.

2.3 SITE OPERATIONS

The Site buildings are occupied by SummerBio, a biotechnology laboratory (985 O'Brien), Cyngn, an autonomous vehicle research and development laboratory (1015 O'Brien), Wine Bank, a wine retailer and cold storage facility (1320 Willow Road), and Garda, an armored transport office and vehicle storage garage (1320 Willow Road). According to San Mateo County Assessor's Office., the Site owner is O'Brien Drive Portfolio, LLC.

2.4 ADJACENT AND SURROUNDING LAND USE

Adjacent properties at the time of Farallon's site reconnaissance included a vacant lot and a church to the southwest, Willow Road followed by an undeveloped lot and residential neighborhoods to the west, Mid-Peninsula High School to the north, industrial buildings to the east, and O'Brien Drive followed by industrial buildings to the south.

No visual evidence of recognized environmental conditions was observed on abutting or nearby properties during the site reconnaissance. Observations were restricted to areas readily observable from the Site.

3.0 PHYSICAL SETTING

The physical setting of the Site, including topography, geology, and hydrogeology, is described in this section. Farallon's assessment of sensitive receptors in the area also is discussed.

3.1 TOPOGRAPHY

Farallon reviewed the U.S. Geological Survey (USGS) topographic map for Palo Alto, California dated 2015 provided by Environmental Risk Information Services (ERIS). The map depicts the Site at an elevation of approximately 12 feet above mean sea level. Site topography is relatively flat. Regional topography is generally flat, with a slight slope down to the north.

3.2 GEOLOGY AND HYDROGEOLOGY

The Site is located on the western peninsula of the San Francisco Bay. The main water bodies in the region are the San Francisco Bay and the Pacific Ocean. According to information obtained from USGS, the area surrounding the subject property is underlain by alluvium deposits of the Holocene-era. According to the ERIS *Physical Setting Report* prepared for the Site dated April 27, 2021 (ERIS PSR), surface soil at the Site consists primarily of urban land, which is a miscellaneous area.

Shallow groundwater flow direction typically can be estimated by examination of surface topography or by nearby surface water bodies. Based on the topography of the Site and its vicinity, groundwater flows to the north. Based on documentation of prior assessments conducted proximate to the Site obtained from the California State Water Resource Control Board GeoTracker database (GeoTracker database), groundwater has been documented to flow to the north and/or northeast to northwest. Based on the Phase II ESA performed by Farallon in August 2021, groundwater is encountered at a depth of approximately 15 feet below ground surface (bgs).

3.3 OIL AND GAS RECORDS

According to the California Department of Conservation, Geologic Energy Management Division Well Finder online database, no permitted oil or gas wells are present on the Site or adjacent properties.

3.4 SENSITIVE RECEPTORS

Farallon conducted a limited assessment of sensitive receptors on or in the vicinity of the Site that was confined to visually apparent features such as surface water bodies (e.g., low-lying wet areas, streams, ponds) and residential and recreational areas. Farallon's assessment of sensitive receptors included a review of readily ascertainable information relating to the presence of private, semiprivate, public, and industrial water-supply wells.

According to the ERIS PSR, the Site is in a 500-year flood plain. The nearest federally designated wetlands are 0.3 mile north of the Site. Three public water-supply wells were identified within 1 mile of the Site. The water bodies nearest the Site were identified as Ravenswood Slough approximately 0.3 mile north of the Site, San Francisquito Creek 1.2 miles south of the Site, and the San Francisco Bay 1.5 miles east of the Site.

4.0 USER-PROVIDED INFORMATION

Farallon understands that the user of this report, O'Brien Drive Portfolio, LLC, is seeking to follow the standards set forth in ASTM E1527-13 to complete an environmental assessment of the Site. The user has specific responsibilities for fulfilling ASTM E1527-13 requirements to help identify the possibility of recognized environmental conditions in connection with the Site. These responsibilities do not require the technical expertise of an Environmental Professional, and were not performed by the Environmental Professionals who conducted the Phase I and II ESAs at the Site.

To facilitate fulfillment of the ASTM E1527-13 requirements identified below, Farallon provided O'Brien Drive Portfolio, LLC with a copy of the *Phase I Environmental Site Assessment User Questionnaire* (User Questionnaire) to complete. The User Questionnaire is provided in Appendix C of this Phase I and II ESA Report.

4.1 TITLE AND LIEN RECORDS

O'Brien Drive Portfolio, LLC indicated that it was not aware of environmental liens against the Site.

4.2 EXPERIENCE AND SPECIALIZED KNOWLEDGE

O'Brien Drive Portfolio, LLC indicated that it has no experience or specialized knowledge regarding the Site.

4.3 COMMONLY KNOWN INFORMATION

O'Brien Drive Portfolio, LLC indicated that it is not aware of commonly known information that would lead to identification of recognized environmental conditions in connection with the Site.

4.4 PHASE I AND II ENVIRONMENTAL SITE ASSESSMENT REPORT USERS

O'Brien Drive Portfolio, LLC c/o Tarlton Properties, Inc. will rely on this Phase I and II ESA Report.

4.5 PREVIOUS ENVIRONMENTAL STUDIES

Farallon was provided with the *Phase I Environmental Site Assessment Report, 1320 Willow Road, Menlo Park, California* dated September 14, 2015; the *Phase I Environmental Site Assessment Report, 1001 and 1015 O'Brien Drive, Menlo Park, California* dated September 14, 2015; and the *Phase I Environmental Site Assessment Report, 985 O'Brien Drive, Menlo Park, California* dated September 14, 2015, all prepared by Stellar Environmental Solutions, Inc. (2015 Phase I Reports).

According to the 2015 Phase I Reports, a “sump or dry well” was observed on the Site behind the tenant space at 1001 O’Brien Drive, then occupied by Electro-Motion. Site representatives interviewed during the site reconnaissance did not know the historical use of the “sump or dry well.” Further inspection of the feature indicated that it may have functioned to allow water to infiltrate into soil. The 2015 Phase I Reports identified the “sump” as a de minimis condition in connection with the Site. Based on the historical use of the Site for agricultural purposes, the 2015 Phase I Reports recommended soil profiling to identify possible contaminants such as pesticides, herbicides, and fertilizers in the event of future redevelopment of the Site. The 2015 Phase I Reports identified no recognized environmental conditions in connection with the Site.

4.6 CLIENT-PROVIDED DEVELOPMENT PLANS

Farallon was provided with O’Brien Drive Portfolio, LLC’s proposed Site development plan, provided in Appendix E. The plan shows the location of the two commercial buildings, garage, and other supporting structures planned as part of Site redevelopment.

5.0 SITE BACKGROUND AND HISTORY

Farallon reviewed the following historical sources as part of the Phase I ESA activities:

- Aerial photographs of the Menlo Park, California area dated 1930, 1941, 1948, 1958, 1960, 1968, 1974, 1981, 1991, 2005, 2009, 2010, 2012, 2014, 2016, 2018, and 2020 obtained from ERIS; and dated 1948, 1985, 1991, 2002 through 2005, and 2007 through 2020 obtained from Google Earth;
- Polk City Directories of Menlo Park, California dated 1957, 1961, 1967, 1973, 1977, 1982, 1987, 1991, 1996, 2001, 2006, 2008, 2013, and 2018 obtained from ERIS; and
- USGS topographic maps of Palo Alto, California dated 1897, 1899, 1943, 1948, 1953, 1961, 1968, 1973, 1994, 1999, and 2015 obtained from ERIS.

A search for fire insurance maps resulted in notification that there was no coverage for the Site.

Farallon is not responsible for the accuracy or completeness of the historical sources reviewed. The historical sources documented were reasonably ascertainable and practically reviewable during the Phase I ESA activities.

5.1 SITE

The Site appeared in aerial photographs to be vacant and used for agricultural purposes from at least 1930 through at least 1948. The current Site buildings at 985 O'Brien Drive and 1001 to 1015 O'Brien Drive were apparent on the southeastern portion of the Site by 1958, and the Site appeared largely unchanged through at least 1960. By 1968, the original portion of the current Site building located at 1320 Willow Road was present. A subsequent addition to the building at 1320 Willow Road expanded the building's footprint to the west by 1974, and the Site appeared largely unchanged through at least 1981. An additional paved surface parking lot was apparent on the northeastern corner of the Site by 1991, and layout of the Site has appeared similar to the present.

City directory listings for the Site address at 985 O'Brien Drive included O I C W (OFC) in 1973, and Al's Roofing Supply Inc. from 2001 through 2018.

Best of Coupons was listed at 1015 O'Brien Drive in 2006, an art and antique dealer at 1013 O'Brien Drive in 2008, Salt Creek Capital Management LLC at 1001 O'Brien Drive in 2018, and Al's Roofing Supply at 985 O'Brien Drive in 2018. Wine Bank, a wine storage facility, was listed at 1320 Willow Road in 2018. 1001 O'Brien Drive was identified as a warehouse for Hiller Aircraft Corp in 1961, Menlo Machine and Manufacturing and associated entities from 1967 through 1991, Electro Motion Inc from 2001 through 2018, and Salt Creek Capital Management LLC in 2018. Spiral Paper Tubes Manufacturing was listed at 1005 O'Brien Drive from 1967 through 1987. Listings for 1015 O'Brien Drive included Hamar Co Tools Manufacturers Inc and Hannibal W D and Co Manufacturers AGT in 1967, Call Mac Trans Co in 1982, Douce France in 1987, Castillo France in 1991, and Best of Coupons in 2006. The Site building at 1320 Willow

Road was listed as Sunset Books & Magazines in 1973, Armored Transit of CA Inc from 2006 through 2013, and Wine Bank from 2006 through 2018. Additional information regarding the Site history is provided in Section 4.5, Previous Environmental Studies, and Section 6.1, On-Site Listings.

5.2 ADJACENT PROPERTIES

Adjacent properties to the north, east, and south appeared to be used for agricultural purposes from at least 1930 through at least 1941, with Willow Road followed by vacant land west of the Site. The north-adjacent property appeared to be used for staging agricultural products in 1948, and a suspected residence was apparent near the northeastern corner of the Site. The suspected residence to the north was no longer apparent by 1958, and new commercial/industrial buildings were apparent to the east and south/southwest, and west across Willow Road. The properties to the north and south across O'Brien Drive were developed with commercial warehouse buildings by 1960, with continued development to the south and east through 1974. Commercial buildings near the southwestern corner of the Site and to the west across Willow Road appeared to have been removed by 1981; those properties appeared to be vacant through at least 1991. Paved parking lots were added north- and southwest-adjacent to the Site by 2002. Periodic earthwork was apparent on the vacant property to the west across Willow Road, with vehicles and equipment apparent on the property between 2003 and 2009, and a building foundation apparent by 2010. The layout of adjacent properties has appeared largely unchanged from 2010 to the present.

City directory listings for adjacent properties included a storage facility, a high school, a caulking materials and equipment manufacturer, and a USGS warehouse. A historical gasoline service station at 1300 Willow Road, southwest-adjacent to the Site, was listed from at least 1957 through at least 1967. The property to the west across Willow Road at 1283 and 1291 Willow Road was identified as a gasoline service station from at least 1957 through at least 1977. 1305 Willow Road, north-adjacent to the Site across Willow Road, was identified as a gasoline service station from at least 1967 through at least 1973.

6.0 REGULATORY REVIEW

ERIS conducted a review of environmental regulatory agency database listings to identify reported environmental issues related to the Site and facilities in the Site vicinity. Farallon used the greater of each approximate minimum search distance from the Site for each of the referenced federal and state environmental databases, as specified in ASTM E1527-13.

Farallon reviewed the results from the ERIS *Database Report* prepared for the Site dated April 29, 2021 (ERIS Report) to note reported facilities in the vicinity of the Site that were considered to have a potential to adversely impact the Site (i.e., are known to have resulted in or are expected to result in a recognized environmental condition). Reported facilities identified in the ERIS Report were evaluated with respect to the nature and extent of a given release, the distance of the reported facility from the Site, the stratigraphy of soil, the expected soil permeability, and the location of a reported facility with respect to the known or expected local and/or regional groundwater flow direction.

The descriptions of the databases searched, the complete database names for the abbreviations used in this Phase I and II ESA Report, and the associated search distances from the Site are provided in the ERIS Report presented in Appendix D.

6.1 ON-SITE LISTINGS

Wine Bank at 1320 Willow Road, located on the Site, was identified in the CERS HAZ, FINDS/FRS, and SANMATEO CUPA databases. According to the ERIS Report, routine environmental compliance inspections were conducted at the facility by San Mateo County Environmental Health Services in 2014, 2015, 2017, 2019, and 2020. During a September 22, 2017 inspection, the facility was cited for failing to notify the property owner and update the facility's business plan regarding storage of hazardous materials at the facility. The ERIS Report indicated that both violations were corrected, and the facility was returned to compliance by October 3, 2017. Records provided by San Mateo County Environmental Health Services indicated that hazardous materials stored on the Site consisted of diesel fuel used to power an emergency backup generator at the facility. Additional information regarding the storage of hazardous materials on the Site is provided in Section 7.4, Interview with Health Department, and Section 8.0, Site Reconnaissance.

Al's Roofing Supply at 985 O'Brien Drive, located on the Site, was identified in the DELISTED HAZ, FINDS/FRS, and SANMATEO CUPA databases. According to the ERIS Report, the facility was previously identified by San Mateo County Environmental Health Services as a facility that collects, stores, and/or generates hazardous materials and/or hazardous waste. The ERIS Report indicated that the facility was removed from a list of hazardous waste facilities in 2017.

Electro-motion Incorporated at 1001 O'Brien Drive, located on the Site, was identified in the CERS HAZ, FINDS/FRS, HAZNET, and SANMATEO CUPA. According to the ERIS Report, routine compliance inspections conducted at the facility by San Mateo County Environmental Health Services in 2015, 2017, 2019, and 2020 identified no violations. San Mateo County Environmental Health Services identified the facility as a large quantity generator and a recycler of waste oil and solvents. The ERIS Report indicated that hazardous waste generated at the facility included approximately 200 pounds of petroleum-contaminated solids every 2 months, between 200 and 500 gallons of used oil per month, and approximately 250 pounds of metal oil filters per month.

Farallon searched the California State Water Resources Control Board online GeoTracker database (GeoTracker database) and the California Department of Toxic Substances Control online EnviroStor database (EnviroStor database) for records related to the Site, but found no listings. Additional information regarding the Site is provided in Section 4.5, Previous Environmental Studies, and Section 7, Interviews.

6.2 ADJACENT AND OTHER FACILITY LISTINGS

Reported facilities within 0.25 mile up-gradient, 0.125 mile cross-gradient, or adjacent down-gradient of the Site with respect to the assumed groundwater flow direction are considered to have a potential to have impacted the Site. Facilities that were listed in the ERIS Report but not identified as a reported facility (e.g., a facility listed as a hazardous waste generator but not as having had a release), and facilities that were listed as "Closed" were not considered to have a potential to have impacted the Site.

- **Willow Road Pumping Station**, south-adjacent to the Site and at a similar topographic elevation, was identified in the CERS HAZ, DELISTED COUNTY, EMISSIONS, and FINDS/FRS databases. According to the ERIS Report, the facility is owned and operated by the West Bay Sanitary District. Compliance inspections performed at the facility in 2013 through 2015, 2017, 2019, and 2020 found no violations. Farallon searched the EnviroStor and GeoTracker databases for the facility, but found no listings. Based on the information provided in the ERIS Report, this facility does not represent a recognized environmental condition in connection with the Site.
- **DM Figley Co. Inc.**, northeast-adjacent to and down-gradient of the Site, was identified in the CERS HAZ and FNDS/FRS databases. According to the ERIS Report, the facility was identified in the California Environmental Reporting System as a facility that stores chemicals. Environmental compliance inspections were performed at the facility in 2015, 2017, 2019, and 2020. The facility was cited on March 21, 2019 for failing to provide initial and annual training to all employees for safety procedures in the event of a release or threatened release of hazardous materials. The ERIS Report indicated that the facility was returned to compliance by April 16, 2019. No additional violations were noted. Farallon searched the EnviroStor and GeoTracker databases for the facility, but found no listings.

Based on the information provided in the ERIS Report, this facility does not represent a recognized environmental condition in connection with the Site.

- **Clark Property/Willow Corners LLC** at 1283 Willow Road, approximately 90 feet west and cross-gradient of the Site, was identified in the FINDS/FRS, HAZNET, LUST, SANMATEO CUPA, and SANMATEO LOP databases. The address associated with this facility was identified in city directory listings reviewed by Farallon as a historical gasoline service station. According to the ERIS Report, a leaking underground storage tank (UST) was identified at the facility. Farallon searched the GeoTracker and EnviroStor databases for the facility, which indicated that a release was first reported at the facility in 1999, and had impacted groundwater not used for drinking water. The regulatory status of the facility was listed as “case closed” as of June 14, 2000. Farallon requested additional information from San Mateo County Environmental Health Services regarding the facility, and was provided with records that indicated that a 180-gallon waste-oil tank was encountered during an excavation on the north-central portion of the property in March 2008. According to the documents provided, tank piping appeared to be ruptured during excavation activities, resulting in a release of less than 1 gallon of waste oil to soil. The tank reportedly was undamaged and full of waste oil. Samples collected from the excavation stockpile and the bottom of the tank pit did not identify evidence of significant releases in connection with the waste-oil UST. Based on the closure granted in connection with the 1999 release and information provided by San Mateo County Environmental Health Services regarding the 2008 waste-oil tank release, the potential migration of hazardous substances to the Site from this former facility does not represent a recognized environmental condition in connection with the Site.
- **UST Site**, approximately 180 feet southwest of the Site and at a similar topographic elevation, was identified in the SANMATEO CUPA database. According to the ERIS Report, a UST Site with the location “Willow @ O'Brien” was identified by San Mateo County Environmental Health Services. Farallon searched the GeoTracker and EnviroStor databases for the facility, but found no listings. Farallon requested records from San Mateo County Environmental Health Services regarding the listing; no response was received prior to completion of this Phase I and II ESA Report. Based on the information provided in the ERIS Report and review of the GeoTracker and EnviroStor databases, this listing does not represent a recognized environmental condition in connection with the Site.
- **Ionpath Inc.** at 960 O'Brien Drive, 33 feet south and up-gradient of the Site, was identified in the FINDS/FRS, RCRA SQG, and SANMATEO CUPA databases. According to the ERIS Report, the facility is enrolled in the San Mateo County Environmental Health Services' hazardous waste program and is a small-quantity generator of medical waste, laboratory chemicals, and unspecified solvent mixture. The ERIS Report indicated that the facility had no recorded violations as of January 2021. Farallon searched the GeoTracker and EnviroStor databases for the facility, but found no listings. Based on the information provided in the ERIS Report and review of the GeoTracker and EnviroStor databases, this facility does not represent a recognized environmental condition in connection with the Site.

- **SummerBio** at 980 O'Brien Drive, approximately 30 feet south and up-gradient of the Site, was identified in the CERS HAZ, RCRA LQG, and RCRA SQG databases. According to the ERIS Report, the facility is a large quantity generator of hazardous waste, including laboratory waste chemicals, ignitable waste, and corrosive waste, with no recorded violations as of January 2021. Farallon searched the GeoTracker and EnviroStor databases for the facility, but found no listings. Based on the information provided in the ERIS Report and review of the GeoTracker and EnviroStor databases, this facility does not represent a recognized environmental condition in connection with the Site.
- **Sanford Metal Processing Co./San Mateo CO OES** at 990 O'Brien Drive, approximately 110 feet south and up-gradient of the Site, was identified in the CHMIRS, EnviroStor, HHSS, and SANMATEO CUPA databases. According to the ERIS Report, the facility has been identified as a large- and small-quantity generator of hazardous waste, including metals, spent nonhalogenated solvents, wastewater treatment sludge from electroplating operations, and spent cyanide plating bath solutions. Farallon searched the GeoTracker and EnviroStor databases for the facility, which indicated that the facility maintains a sump that was installed in 1982, which contains process or industrial wastewater with trace heavy metals. No indication of releases or cleanups was provided in the databases reviewed. Based on the distance of the facility relative to the Site and review of the GeoTracker and EnviroStor databases, this facility does not represent a recognized environmental condition in connection with the Site.
- **Noren Products Inc./1010 O'Brien LLC** at 1010 O'Brien Drive, approximately 30 feet south and up-gradient of the Site, was identified in the CLEANUP SITES, DELISTED COUNTY, DELISTED HAZ, FINDS/FRS, HAZNET, HIST MANIFEST, RCRA NONGEN, RCRA SQG, RCRA TSD, SANMATEO CUPA, and SANMATEO LOP databases. According to the ERIS Report, the facility was included in a list of Cleanup Program sites in the state of California made available by the State Water Resources Control Board. Farallon searched the GeoTracker and EnviroStor databases for the facility, which indicated that soil vapor investigation was performed in October 2016 to assess potential impacts from a historical solvent distiller, formerly present south of the current building, approximately 230 feet south of the Site. Tetrachloroethene (PCE) was detected at a concentration of 9,400 micrograms per cubic meter in a soil gas sample collected near the former location of the distiller. In January 2017, approximately 14 cubic yards of soil was removed from the area adjacent to the solvent distiller where the highest PCE impact was detected. A soil gas contamination plume remains beneath a paved portion of the property on the southern side of the building. Three indoor air sampling events performed at the facility identified no unacceptable risks to human health or the environment. PCE was detected in groundwater near the source area at a concentration of 4.7 micrograms per liter ($\mu\text{g/l}$), which is less than the drinking water maximum contaminant level of 5.0 $\mu\text{g/l}$. PCE does not appear to have significantly impacted groundwater beneath the facility. San Mateo County Environmental Health Services issued a No Further Action determination in connection with the cleanup on September 19, 2018. Based on the information provided in the GeoTracker and EnviroStor databases and the No Further Action determination

issued by San Mateo County Environmental Health Services, the potential migration of hazardous substances to the Site in connection with historical operations at this facility does not represent a recognized environmental condition in connection with the Site.

6.3 VAPOR ENROACHMENT

A vapor encroachment screening (ASTM E2600-15) was performed at the Site to consider whether a vapor encroachment condition was a likely potential at the Site as a result of an up-gradient, off-Site plume. With the elimination of the former gasoline service station vapor encroachment concern based on the Phase II ESA data referenced, the closest other potential properties with either subsurface volatile organic compound (VOC) data collected or evidence of a VOC plume are 1010 O'Brien Drive, 1350 Adams Court, and the Willow Village development area.

A limited investigation was completed in 2016 that included sampling for VOCs in soil and soil gas at 1010 O'Brien Drive to provide soil profile data and evaluate an area where tetrachloroethylene was stored; it showed no VOCs at concentrations exceeding laboratory detection limits in the soil gas sample collected by the tetrachloroethene storage area. The nearby 1350 Adams Court property, where groundwater samples were collected in 2018 from two piezometers, showed only a trace of one hydrocarbon VOC, toluene, at a concentration of 0.78 µg/l, with no other VOCs detected in the two groundwater samples.

The closest large VOC plume being investigated in the area is associated with the Willow Village development: a 59-acre multi-use business park being developed primarily as a new Facebook campus. The Facebook campus area is known as Willow Office Park, with addresses at 1350 through 1390 Willow Road and 925 through 1098 Hamilton Avenue. The Hiller helicopter and aircraft facility that operated there from the 1950s through 1970s was responsible for VOC contamination of the groundwater. The investigations and remedy to address possible contamination, which includes chlorinated VOCs in groundwater, is under a Voluntary Cleanup Program agreement with the California Department of Toxic Substances Control as of 2018. Based on a review of the groundwater and soil vapor quality at that property summarized in the 2020 Removal Action Work Plan by Cornerstone Earth Group, the Willow Village property contaminants are not anticipated to affect the Site, as the residual groundwater contamination is migrating to the north, away from the Site. Therefore, Farallon concludes that a vapor encroachment condition does not exist at the Site.

6.4 UNMAPPABLE LISTINGS

ERIS identified 10 facilities as “unplottable” that ERIS was unable to map due to inaccurate or inadequate address information. Farallon located these unplottable facilities and, according to the addresses provided by ERIS, the facilities are not located within the respective search radii. The unplottable facilities located do not represent a recognized environmental condition in connection with the Site.

7.0 INTERVIEWS

Farallon conducted interviews with individuals familiar with the Site and contacted relevant local governmental agencies to obtain additional Site information. The responses from the parties contacted are provided below.

7.1 INTERVIEW WITH SITE REPRESENTATIVE

During the site reconnaissance, Farallon interviewed JB Cedillo, a representative of O'Brien Drive Portfolio, LLC., owner of the Site, on May 14, 2021. The following information was obtained from this interview:

- Three aboveground storage tanks (ASTs) associated with an emergency backup generator are present at the Site at 1320 Willow Drive.
- Hazardous materials on the Site generally consist of janitorial cleaning supplies, laboratory supplies, maintenance-related materials, and chiller chemicals used for the chiller unit on the rooftop of the building at 1320 Willow Road.
- Utilities are provided by the local municipality. There is no natural gas service at the Site.
- Three electric lifts service the mezzanine level of 1320 Willow Road.
- No reportable spills or releases have occurred on the Site.

JB Cedillo stated that he had not been made aware of any pending, threatened, or past:

- Litigation relevant to hazardous substances or petroleum products in, on, or from the Site;
- Administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Site; or
- Notices from a governmental entity regarding violations of environmental laws or liability relating to hazardous substances or petroleum products.

7.2 INTERVIEW WITH FIRE DEPARTMENT

Farallon contacted the Menlo Park Fire Protection District on April 28, 2021 regarding previous and current ASTs and USTs at the Site. A representative of the Menlo Park Fire Protection District provided Farallon with records from 2011 regarding installation of a new generator at the Wine Bank facility located on the Site. According to the records provided, the generator is powered by natural gas, with a backup propane power supply. The mapped location of the generator was near the western Site boundary along Willow Road.

7.3 INTERVIEW WITH CITY

Farallon contacted the City of Menlo Park on April 28, 2021 to inquire whether notices of violations and/or reported hazardous spills at the Site were on file, and regarding previous and

current ASTs and USTs at the Site. A representative of the City of Menlo Park indicated that it had no records of storage tanks, hazardous material storage, or spills associated with the Site.

7.4 INTERVIEW WITH HEALTH DEPARTMENT

Farallon contacted San Mateo County Environmental Health Services on April 28, 2021 to inquire whether notices of violations and/or reported hazardous spills at the Site were on file. A representative of San Mateo County Environmental Health Services provided Farallon with inspection and permit records for the Site. According to records reviewed, Willow Wine Storage, LLC, a former tenant at 1320 Willow Road, maintained an emergency generator that may have included a 100-gallon diesel fuel AST. The records indicated that the emergency generator was installed in 2001.

Permit records provided to Farallon indicated that Al's Roofing Supply, formerly at 985 O'Brien Drive, was permitted to store less than 1,199 gallons, 9,999 pounds or 4,799 cubic feet of hazardous materials. The facility's permit expired on August 1, 2017. Hazardous materials stored at the facility included modified roof mastic, petroleum asphalt, and roof coatings. A document from 1996 indicated that no hazardous waste was generated at the facility.

Inspection reports provided for Electro Motion Inc., formerly at 1001 O'Brien Drive, indicated that hazardous waste generated at the facility included used oil, coolant, absorbent, and battery components.

8.0 SITE RECONNAISSANCE

Farallon conducted a site reconnaissance on May 13 and May 14, 2001 to observe the Site for physical evidence of recognized environmental conditions. The methodology used for the site reconnaissance and the observations made during the reconnaissance are discussed below. A description of the Site is provided in Section 2.2, Site Description. Photographs taken during the site reconnaissance are presented in Appendix B.

8.1 SITE RECONNAISSANCE METHODOLOGY

Farallon completed a walk around the entire perimeter of the Site and inspected accessible interior portions of the Site buildings. There were no deviations from ASTM E1527-13 during the Phase I and II ESAs, with the exception of non-scope items requested by O'Brien Drive Portfolio, LLC that are not required to satisfy ASTM E1527-13. A limiting condition encountered during the Phase I ESA activities was the presence of furniture and equipment in the Site buildings that prevented Farallon from observing entire interior floor surfaces. Based on information obtained from the Site representative, this limiting condition is not expected to hinder the conclusions of this report.

8.2 SITE RECONNAISSANCE OBSERVATIONS

Weather conditions at the time of the reconnaissance were clear, with a temperature of approximately 70 degrees Fahrenheit. No weather-related Site-access restrictions were encountered during the reconnaissance.

The Site consists of San Mateo County Parcel Nos. 055-421-050, 055-421-060, and 055-421-160, which total approximately 4.3 acres of land developed with three single-story commercial concrete tilt-up buildings totaling approximately 90,600 square feet that were constructed between 1955 and 1963, with additions to the building at 1320 Willow Road completed between 1972 and 1982. A portion of the building at 1320 Willow Road includes a mezzanine level. The Site buildings are occupied by SummerBio (985 O'Brien), Cyngn (1015 O'Brien), Wine Bank (1320 Willow Road), and Garda (1320 Willow Road). Remaining areas of the Site consist of paved parking and landscaped areas. Half of the building at 985 O'Brien is used to store office furniture; 1005 O'Brien is vacant. Access to the Site is gained from O'Brien Drive, south of the Site, and Willow Road, west of the Site.

8.2.1 Interior Observations

Farallon's observations of the interior of the Site buildings during the site reconnaissance are documented in the table below. Comments pertaining to notable interior observations follow in Section 8.2.2. Photographs taken during the site reconnaissance are provided in Appendix B.

INTERIOR OBSERVATIONS	YES	NO
Odor		X
Heating/Cooling System	X	
Drain(s) and/or Sump(s)		X
Staining and/or Corrosion		X
Storage Tank(s), Vent Pipe(s), Fuel Port(s), and/or Fill Pipes		X
Clarifier(s)		X
Discharge Area		X
Drum(s) and/or Other Container(s)		X
Pool(s) of Liquid		X
Automobile Lift(s)		X
Monitoring Well(s)		X
Hazardous Material(s) and/or Petroleum Product(s)	X	
Hazardous Waste		X

8.2.2 Interior Observation Comments

Heating/Cooling System

The Site buildings are heated with electrical heating systems. At least one chiller unit reportedly is present on the roof of the building at 1320 Willow Drive; it could not be observed.

Hazardous Material(s) and/or Petroleum Product(s)

Farallon observed minor amounts of hazardous materials, including janitorial cleaning supplies, alcohols and acids, and maintenance-related products. The materials were observed to be properly labeled and stored in designated areas of the Site buildings. No evidence of releases was observed on or around the containers. Propane tanks used in connection with a forklift were stored in the building at 985 O'Brien Drive.

8.2.3 Exterior Observations

Farallon's observations of the exterior of the Site during the site reconnaissance are documented in the table below. Comments pertaining to notable exterior observations follow in Section 8.2.4. Photographs taken during the site reconnaissance are provided in Appendix B.

EXTERIOR OBSERVATIONS	YES	NO
Odor		X
Staining and/or Corrosion	X	
Storage Tank(s), Vent Pipe(s), and/or Fuel Port(s)	X	
Drum(s) and/or Other Container(s)		X
Pool(s) of Liquid		X
Hazardous Material(s) and/or Petroleum Product(s)		X
Hazardous Waste		X
Pit(s), Pond(s), and/or Lagoon(s)		X
Stressed Vegetation		X
Solid (Non-Hazardous) Waste—Evidence of Dumping		X
Wastewater		X
Domestic Water	X	
Water Well(s)		X
Septic/Sewer System	X	
Stormwater	X	
Transformer(s)	X	
Significant Amount of Fill Material		X

8.2.4 Exterior Observation Comments

Staining and/or Corrosion

Farallon observed de minimis petroleum staining throughout paved areas of the Site that appeared to be from parked vehicles on the Site.

Storage Tank(s), Vent Pipe(s), and/or Fuel Port(s)

Farallon observed an emergency generator with three approximately 500-gallon propane ASTs adjacent to the building at 1320 Willow Road. According to the Site representative, no reported spills or releases have occurred in connection with the ASTs.

Domestic Water

Domestic water is supplied to the Site buildings by the City of Menlo Park.

Septic/Sewer System

Sanitary sewage generated at the Site discharges to the municipal sanitary sewer system.

Stormwater

Stormwater on the Site is directed primarily onto O'Brien Drive through a shallow concrete-lined trench. One catch basin is present on the Site behind 1015 O'Brien Drive, which presumably discharges to a sump or a dry well.

Transformer(s)

Farallon observed pad-mounted transformers throughout the Site. The transformers appeared to be in good condition, with no evidence of releases noted. The transformers are owned by Pacific Gas and Electric Company.

9.0 PHASE II ENVIRONMENTAL SITE ASSESSMENT

Farallon obtained a drilling permit from the San Mateo County Environmental Health Department and contracted with a California-licensed C-57 drilling subcontractor to advance four borings for grab groundwater sample collection, as shown on Figure 2. On August 5, 2021, the borings were advanced via hand auger for the first 5 feet, then with a track-mounted limited-access direct-push technology drilling rig to depths greater than 5 feet bgs. The direct-push drilling rig advanced Macro-Core barrels (2-inch-outside-diameter) lined with 1.75-inch-diameter acetate sample sleeves using a pneumatic hammer system from the ground surface to a maximum depth of approximately 20 feet bgs. Groundwater was encountered at a depth of approximately 15 feet bgs in all four boring locations. Prior to each use, the drilling equipment and down-hole sampling equipment was washed in a solution of non-phosphate detergent, double-rinsed with potable water, and allowed to dry.

Borings were continuously cored to allow Farallon staff to observe lithology. Soil cores were collected from boreholes for logging purposes using an approximately 4-foot-long Macro-Core sampler that contained new acetate liners to retain relatively undisturbed soil cores. A Farallon Staff Geologist, Engineer, or Scientist under the supervision of a California-licensed Professional Geologist or Engineer logged Site soil using the visual-manual procedures of ASTM International Standard D2488-09a for guidance, which is based on the Unified Soil Classification System. Boring logs are included in Appendix F.

Groundwater samples were collected using a closed-system Hydropunch sampling tool advanced into undisturbed saturated soil to the bottom of the sampling interval. Polyethylene tubing and a low-flow peristaltic pump were used to collect groundwater samples into laboratory-provided sample containers, including volatile organic analysis vials. The samples containers were sealed, stored on ice in a cooler, and delivered under standard chain-of-custody protocols to a California-certified analytical laboratory.

Analytical Laboratory Methods

The groundwater samples were submitted to Pace Analytical, Inc. of Mount Juliet, Tennessee for analysis by the following methods:

- Total petroleum hydrocarbons as gasoline- (TPHg), diesel- (TPHd), and motor oil- (TPHmo) range organics by U.S. Environmental Protection Agency (EPA) Method 8015;
- Benzene, toluene, ethylbenzene, and xylenes by EPA Method 8260; and
- Lead by EPA Method 6010.

Analytical Results

The laboratory analytical results for the four groundwater samples collected on the Site are tabulated in the attached table (Appendix G) and discussed below.

Low levels of TPHg, TPHd, and benzene were detected in groundwater on the Site at concentrations less than the San Francisco Bay Regional Water Quality Control Board Tier 1 Environmental Screening Levels (ESLs). Benzene was detected in samples FA-1 through FA-3 at concentrations ranging from 0.11 to 0.18 $\mu\text{g/l}$, less than the ESL of 0.42 $\mu\text{g/l}$. TPHg was detected in sample FA-1 at a concentration of 37.7 μl , less than the ESL of 100 μl . TPHd was detected in sample FA-3 at a concentration of 48.7 μl , less than the ESL of 100 μl .

Laboratory Quality Control

Laboratory internal quality control procedures, including analysis of method blanks, control spikes, and surrogate spiked samples, are detailed in the laboratory report (Appendix H). No quality assurance/quality control parameters were exceeded.

10.0 FINDINGS AND OPINIONS

At the time of the site reconnaissance, Farallon observed minor amounts of hazardous materials, including janitorial cleaning supplies, alcohols and acids, and maintenance-related products. The materials were observed to be properly labeled and stored in designated areas of the Site buildings. No evidence of releases was observed in or around the containers at the time of the site reconnaissance.

The ERIS Report identified the Site address in several databases. Current and historical tenants of the Site were identified as handlers and/or generators of hazardous materials or waste, with only minor violations noted. Farallon searched the GeoTracker and EnviroStor databases for records related to the Site, but found no listings.

A historical gasoline service station was present at 1300 Willow Road, southwest-adjacent to the Site, from at least 1957 through at least 1967. The property west of the Site across Willow Road at 1283 and 1291 Willow Road was identified as a gasoline service station from at least 1957 through at least 1977. The 1305 Willow Road address, north-adjacent to the Site across Willow Road, was identified as a gasoline service station from at least 1967 through at least 1973.

Farallon identified San Mateo County Environmental Health Services as the Certified Unified Program Agency for properties in the vicinity of the Site. Farallon contacted San Mateo County Environmental Health Services to request records of USTs or reported releases in connection with the historical gasoline service station identified at 1300 Willow Road. A representative of San Mateo County Environmental Health Services indicated that it had no records for the property. To further assess the potential migration of hazardous substances to the Site from this facility, Farallon performed a Phase II ESA on the Site, adjacent to 1300 Willow Road. Four groundwater samples collected as part of the Phase II ESA contained low concentrations of TPH and benzene, which did not exceed the applicable Water Board ESLs. Based on the low concentrations of TPH and benzene in groundwater, the potential migration of hazardous substances to the Site in connection with historical gasoline service station operations at 1300 Willow Road represents a de minimis environmental condition in connection with the Site. The Site Phase II ESA groundwater investigation findings also do not represent any risk of vapor intrusion at the Site, and based on the review of nearby properties, no vapor encroachment condition at the Site is considered likely.

11.0 CONCLUSIONS

Farallon conducted Phase I and II ESAs for the properties at 985 O'Brien Drive, 1001 to 1015 O'Brien Drive, and 1320 Willow Road in Menlo Park, California in conformance with the scope and limitations of ASTM E1527-13. Any exceptions to or deletions from this practice are described in Section 1.5, Deviations.

This assessment did not identify recognized environmental condition in connection with the Site.

Farallon understands that the Client intends to purchase this property to redevelop it for life sciences research and development and office use. In doing so, the existing buildings are to be demolished and two new commercial buildings covering approximately 50,000 square feet with a supporting garage and amenities building are to be constructed. This property is suitable for the intended use contemplated by the Client. However, the demolition and development phase should be informed by a Site Mitigation Plan that can address environmental issues, including soil profiling for off-Site disposal if required, and construction phase environmental monitoring.

13.0 LIMITATIONS

13.1 GENERAL LIMITATIONS

The conclusions contained in this report/assessment are based on professional opinions with regard to the subject matter. These opinions have been arrived at in accordance with currently accepted hydrogeologic and engineering standards and practices applicable to this location. The conclusions contained herein are subject to the following inherent limitations:

- **Accuracy of Information.** Farallon obtained, reviewed, and evaluated certain information used in this report/assessment from sources that were believed to be reliable. Farallon's conclusions, opinions, and recommendations are based in part on such information. Farallon's services did not include verification of its accuracy or authenticity. Should the information upon which Farallon relied prove to be inaccurate or unreliable, Farallon reserves the right to amend or revise its conclusions, opinions, and/or recommendations.
- **Reconnaissance and/or Characterization.** Farallon performed a reconnaissance and/or characterization of the Site that is the subject of this report/assessment to document current conditions. Farallon focused on areas deemed more likely to exhibit hazardous materials conditions. Contamination may exist in other areas of the Site that were not investigated or were inaccessible. Site activities beyond Farallon's control could change at any time after the completion of this report/assessment.

For the foregoing reasons, Farallon cannot and does not warrant or guarantee that the Site is free of hazardous or potentially hazardous substances or conditions, or that latent or undiscovered conditions will not become evident in the future. Farallon's observations, findings, and opinions can be considered valid only as of the date of the report.

This report/assessment has been prepared in accordance with the contract for services between Farallon and O'Brien Drive Portfolio, LLC c/o Tarlton Properties, and currently accepted industry standards. No other warranties, representations, or certifications are made.

13.2 LIMITATION ON RELIANCE BY THIRD PARTIES

Reliance by third parties is prohibited. This report/assessment has been prepared for the exclusive use of O'Brien Drive Portfolio, LLC to address the unique needs of O'Brien Drive Portfolio, LLC at the Site at a specific point in time.

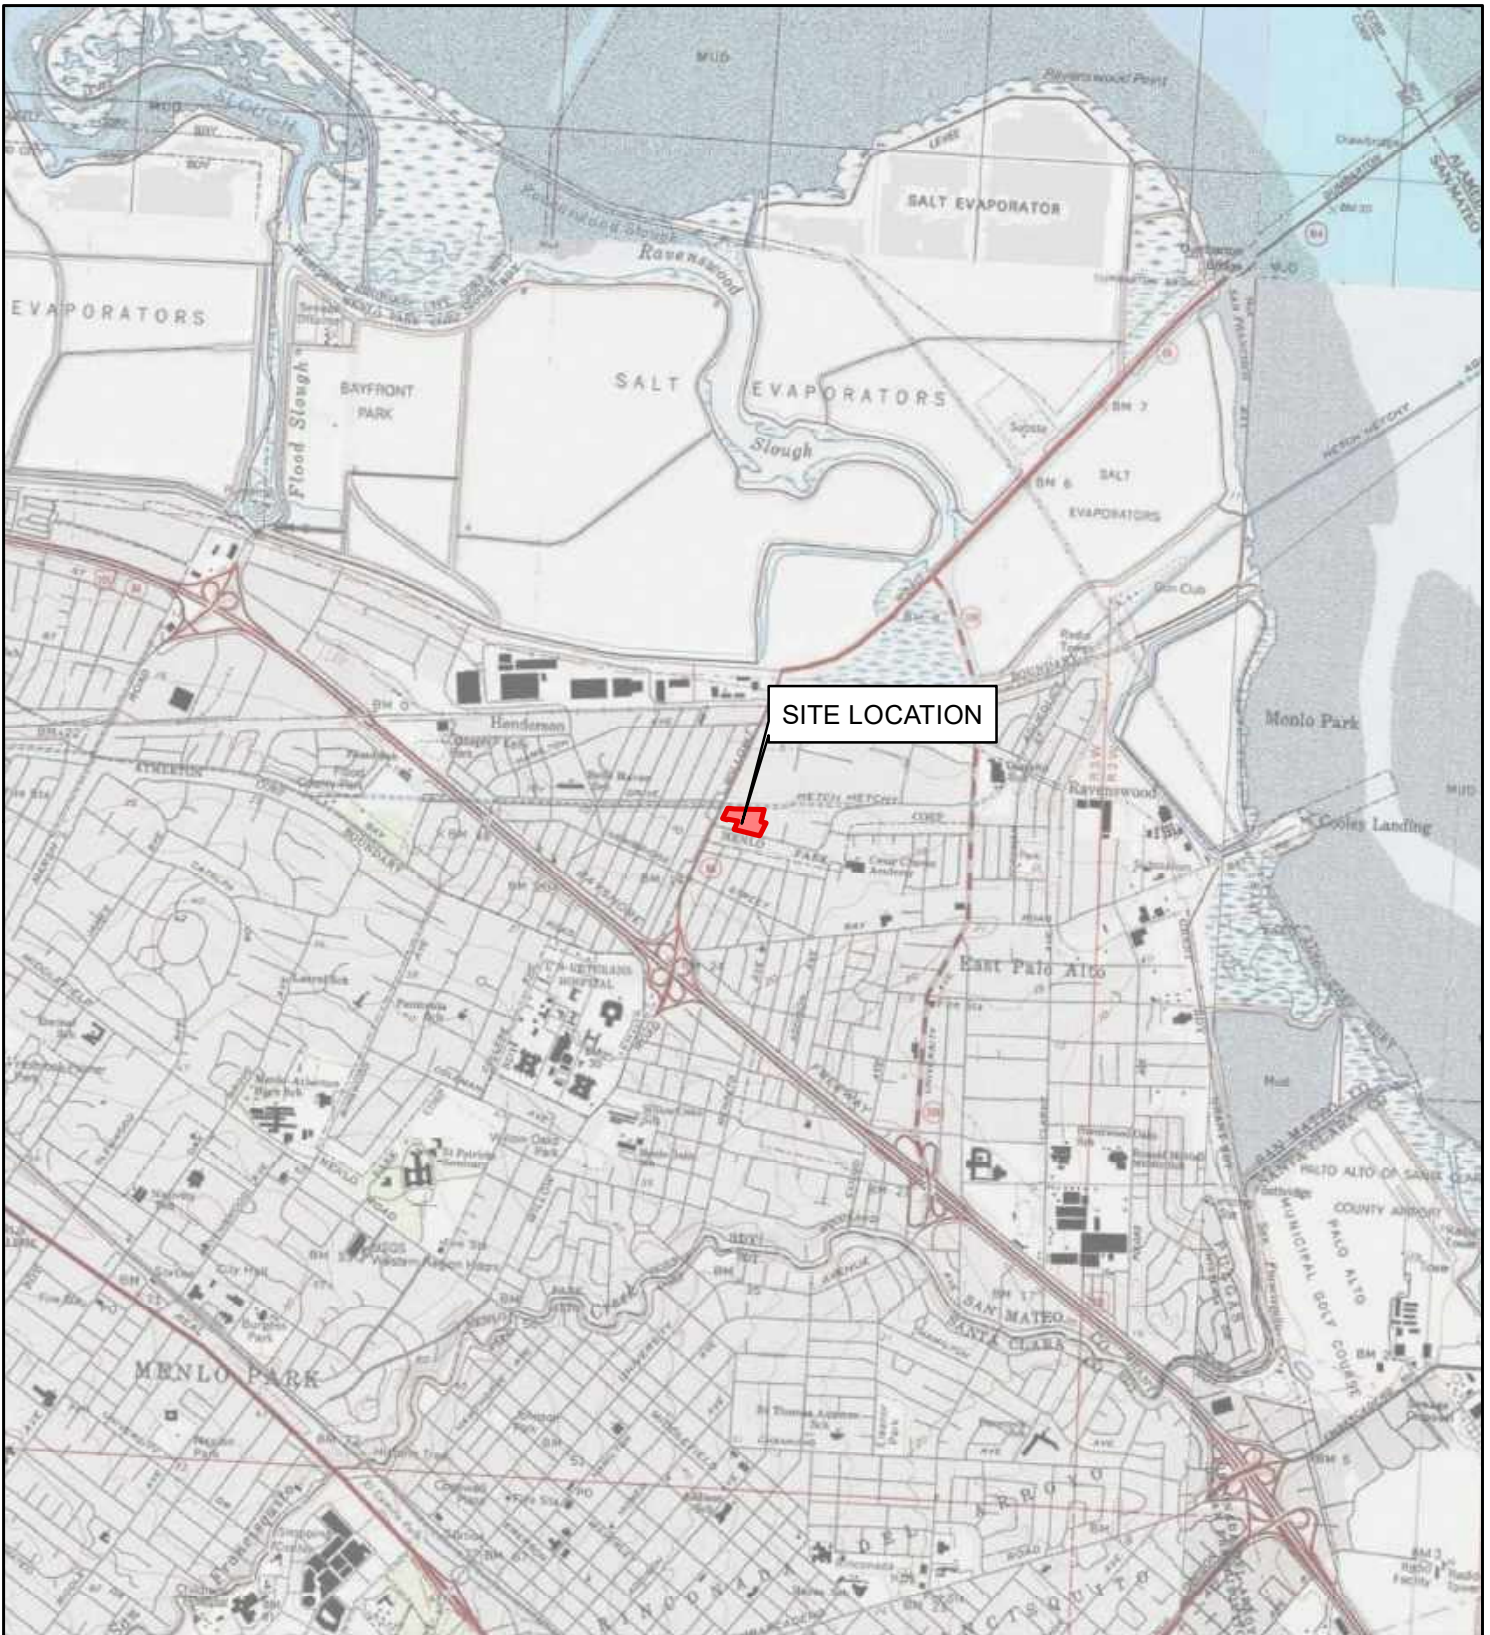

This is not a general grant of reliance. No one other than O'Brien Drive Portfolio, LLC may rely on this report unless Farallon agrees in advance to such reliance in writing. Any unauthorized use, interpretation, or reliance on this report/assessment is at the sole risk of that party, and Farallon will have no liability for such unauthorized use, interpretation, or reliance.

STEPHEN GAYNIER
Project Environmental Scientist

BS Environmental Geography
Graduate Certificate – Geographic Information Science
5 years' experience

Stephen Gaynier has over 5 years of combined professional environmental consulting experience and environmental education. Professional experience includes management of numerous extensive Phase I Environmental Site Assessments in locations across the United States. Stephen supports and manages due diligence projects and provides geographic information system analysis and support for Farallon's diverse portfolio of projects.

VINCENT TILOTTA, P.E., QISP
Associate Engineer

BS Civil and Environmental Engineering
MS Civil and Environmental Engineering
10 years' experience

Vincent Tilotta is a Professional Civil Engineer, registered in California and Washington State, with over 10 years of environmental engineering experience. His experience includes project management and design for small- and large-scale investigations, site remediation, Brownfield redevelopment, property transaction due diligence and negotiations, construction management and oversight, stormwater compliance and design, and detailed data analysis using databases and geographic information systems. He specializes in environmental due-diligence investigations for residential, commercial, and industrial properties; site remediation; regulatory closure of post-remediation properties; and post-remediation compliance.

RICHARD MAKDISI, P.G.
Principal Geochemist

MS Geochemistry
BA Geology
36 years' experience

Richard Makdisi has more than 36 years of experience in hazardous management, geoscience engineering, geochemistry, and geohydrology. He has hands-on experience managing regional and site facility-scale projects for a wide range of issues, from immediate response assessments to long-term planning studies. He has worked closely with the U.S. Environmental Protection Agency; the California Environmental Protection Agency; California Water Boards; and county and city agencies on Resource Conservation and Recovery Act and Comprehensive Environmental Response, Compensation, and Liability Act sites to design and implement remedies to achieve regulatory closure for commercial and government clients. He has extensive experience in evaluating pathways of exposure to identify and design remediation systems and oversee their implementation.

CRAIG WARE, R.G., L.G.
Principal Hydrogeologist

BA Geology
30 years' experience

Craig Ware has 30 years of experience in the geological and environmental consulting field, successfully working with clients along the West Coast and nationwide. For over 22 years, Craig has focused his expertise on the Pacific Northwest, teaming with both private and public sector clients on a wide variety of acquisition, cleanup, reclamation, and redevelopment projects. Specialty areas include environmental due diligence; Remedial Investigation and Feasibility Studies; human health and ecological risk assessment; remedial action and removal action planning and implementation; landfill redevelopment and methane mitigation; redevelopment planning and Brownfield investigation and cleanup; and reclamation planning, permitting, and habitat improvements.

Oil/Gas Well	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
Water Well	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
Environmental Cleanup	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
Environmental Permit	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	

■ OFF-SITE ENVIRONMENTAL CONDITIONS

On adjoining property, are there any: Gasoline Stations? Yes No Drycleaners? Yes No

Are you aware of any other environmental conditions or concerns on adjacent or nearby properties?

Yes No

Comments

(1) Environmental cleanup liens that have been filed or recorded against the Site (Part 312.25 of Title 40 of the Code of Federal Regulations [40 CFR 312.25])

Are you aware of any environmental cleanup liens against the Site that have been filed or recorded under federal, tribal, state, or local law?

N/A

(2) Activity and land use limitations that are in place at the Site or that have been filed or recorded in a registry (40 CFR 312.26)

Are you aware of any activity and land use limitation (such as engineering controls, land use restrictions, or institutional controls) that are in place at the Site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

N/A

(3) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)

As the user of the Phase I ESA Report, do you have any specialized knowledge or experience related to the Site or nearby properties? For example, are you involved in the same line of business as the current or former occupant(s) of the Site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

N/A

(4) Relationship of the purchase price to the fair market value of the Site if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this Site reasonably reflect the fair market value of the Site? If you conclude that there is a difference between the purchase price and the fair market value, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Site?

N/A

(5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the Site that would help Farallon Consulting, L.L.C. to identify conditions indicative of a chemical or other release or threatened release? For example, as user of the Phase I ESA Report:

Do you know the past use(s) of the Site? (If yes, please specify.) Above Tenant use

Do you know of a specific chemical(s) present at the Site, or present at one time? (If yes, please specify.)
N/A

Do you know of a chemical and/or other spill(s) or release(s) that have taken place at the Site? (If yes, please specify.) No

Do you know of any environmental cleanup(s) that have taken place at the Site? (If yes, please specify.)
No

(6) The degree of obviousness of the presence or likely presence of contamination at the Site, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

As the user of the Phase I ESA Report, based on your knowledge and experience related to the Site, is there any obvious indicator(s) that point to the presence or likely presence of contamination at the Site? (If yes, please specify.)

No

Identify all parties who will rely on the Phase I ESA Report, including:

Name of Business: O'Brien Drive Portfolio, LLC c/o Tarlton Properties, Inc

Name of Contact: Anthony Bonifacio, VP of Construction

Address: 1530 O'Brien Drive, Suite C, Menlo Park CA 94025

Telephone Number: 650-330-3600

E-mail Address: abonifacio@tarlton.com

Has any party that will rely on the Phase I ESA Report required services beyond the standard ASTM E1527-05? (For example, an asbestos, lead-based paint, lead in drinking water, or wetlands investigation) (If yes, please specify.) No

Who is the Site contact, and how can the contact be reached?

Name of Business: O'Brien Drive Portfolio, LLC c/o Tarlton Properties, Inc

Name of Contact: Melissa Philbrick

Address: 1530 O'Brien Drive, Suite C, Menlo Park CA 94025

Telephone Number: (650) 380-9853

E-mail Address: mphilbrick@tarlton.com

Are there any special terms and conditions that must be agreed upon by Farallon Consulting, L.L.C.?
(If yes, please specify.)

None

Regulated Programs

EI ID: 10341604 **EI Description:** Chemical Storage Facilities

Violations

Violation Date: 09/22/2017 **Violation Source:** CERS
Violation Program: HMRRP **Violation Division:** San Mateo County Environmental Health
Citation: HSC 6.95 25505.1 - California Health and Safety Code, Chapter 6.95, Section(s) 25505.1
Violation Notes:

Returned to compliance on 10/03/2017. Facility has not provided property owner written notification of the storage of hazardous materials. Please use the template provided to notify the property owner of the storage of hazardous materials and availability of the HMBP with a copy to the inspector within 30 days.

Violation Description:

Failure to provide a copy of the business plan to the owner or the owner's agent within five working days after receiving a request for a copy from the owner or the owner's agent.

Violations

Violation Date: 09/22/2017 **Violation Source:** CERS
Violation Program: HMRRP **Violation Division:** San Mateo County Environmental Health
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Notes:

Returned to compliance on 10/03/2017. Ensure annual training for your employee in spill cleanup and emergency response. This training must be document and conducted as a refresher annually. Please send copy of training roster to inspector within 30 days.

Violation Description:

Failure to electronically update business plan within 30 days of any one of the following events:
 A 100 percent or more increase in the quantity of a previously disclosed material.
 Any handling of a previously undisclosed hazardous materials at or above reportable quantities.
 A change of business address, business ownership, or business name.
 A substantial change in the handler's operations that requires modification to any portion of the business plan.

 Generator Code Description: Small Quantity Generator
 Source Type: Notification

Waste Code Details

Hazardous Waste Code: D000
 Waste Code Description: DESCRIPTION

Hazardous Waste Code: D001
 Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: D002
 Waste Code Description: CORROSIVE WASTE

Hazardous Waste Code: D003
 Waste Code Description: REACTIVE WASTE

Hazardous Waste Code: D006
 Waste Code Description: CADMIUM

Hazardous Waste Code: D007
 Waste Code Description: CHROMIUM

Hazardous Waste Code: D035
 Waste Code Description: METHYL ETHYL KETONE

Hazardous Waste Code: F005
 Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F006
 Waste Code Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Hazardous Waste Code: F007
 Waste Code Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Hazardous Waste Code: F008
 Waste Code Description: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Hazardous Waste Code: F009

EI ID: 10615594 **EI Description:** Chemical Storage Facilities

Violations

Violation Date: 03/21/2019 **Violation Source:** CERS
Violation Program: HMRRP **Violation Division:** San Mateo County Environmental Health
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Notes:

Returned to compliance on 04/16/2019. Refresher training documentation unavailable during inspection. Please provide documentation within 30 days. Also provide documentation of the initial training of your latest employee within 30 days. This training has already been completed but was not documented.

Violation Description:

Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violations

Violation Date:	02/24/2015	Violation Source:	CERS
Violation Program:	HW	Violation Division:	San Mateo County Environmental Health
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31		
Violation Notes:			

Returned to compliance on 02/26/2015.

Violation Description:

Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment..

Violations

Violation Date:	02/24/2015	Violation Source:	CERS
Violation Program:	HMRPP	Violation Division:	San Mateo County Environmental Health
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)		
Violation Notes:			

Returned to compliance on 02/26/2015. Eyewash not maintained

Violation Description:

Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.

Violations

Violation Date:	03/07/2017	Violation Source:	CERS
Violation Program:	HW	Violation Division:	San Mateo County Environmental Health
Citation:	40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174		
Violation Notes:			

Returned to compliance on 06/08/2017. Observations of the hazardous waste storage issues (incorrect accumulation start date on acetone waste drum, unlabeled and open hazardous waste containers, etc.) indicate that weekly inspections are not occurring. Weekly inspections of hazardous waste storage areas are required. Begin these inspection immediately and provide records in the inspector after 30 days have passed.

Violation Description:

Failure to inspect hazardous waste storage areas at least weekly and look for leaking and deteriorating containers.

Violations

Violation Date:	02/24/2015	Violation Source:	CERS
Violation Program:	HW	Violation Division:	San Mateo County Environmental Health
Citation:	22 CCR 15 66265.32 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.32		
Violation Notes:			

Returned to compliance on 02/26/2015.

Violation Description:

Failure of the facility to maintain the following emergency equipment or equivalents:

- 1) An internal communications or alarm system capable of providing immediate emergency instruction (voice or signal) to facility personnel;
- 2) A device, such as a telephone (immediately available at the scene of Operations/ Maintenance) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams;
- 3) Portable fire extinguishers, fire control equipment (including special extinguishing equipment, such as that using foam, inert gas, or dry chemicals), spill control equipment, and decontamination equipment; and

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.

Violations

Citation: 40 CFR 1 265.177 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.177
Violation Source: CERS
Violation Division: San Mateo County Environmental Health
Violation Notes:

Chromic acid rinse was observed stored in the corrosives (bases) bin. Please sort all chemicals stored in all bins in the rear of the facility and store compatibly. Confirm with inspector within 30 days.

Violation Description:

Failure to separate incompatible wastes from the same container, nearby containers, or unwashed containers which previously contained incompatible waste or materials.

Violations

Violation Date: 09/03/2019
Violation Program: HMRRP
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Source: CERS
Violation Division: San Mateo County Environmental Health
Violation Notes:

Returned to compliance on 01/02/2020. Did not observe 175 pounds nitric acid in rear corrosive shed. All gasoline containers found to be empty - you do not have to list these if they will never be filled. Suggest disposal. For Tanks C-04, B-16, B-05, D-12, placard on tank and inventory differ. Please resolve difference, and revise placard, inventory, and map as required within 30 days.

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violations

Violation Date: 03/07/2017
Violation Program: HW
Citation: 40 CFR 1 265.177 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.177
Violation Source: CERS
Violation Division: San Mateo County Environmental Health
Violation Notes:

Returned to compliance on 04/12/2017. Chromic acid rinse was observed stored in the corrosives (bases) bin. Please sort all chemicals stored in all bins in the rear of the facility and store compatibly. Confirm with inspector within 30 days.

Violation Description:

Failure to separate incompatible wastes from the same container, nearby containers, or unwashed containers which previously contained incompatible waste or materials.

Violations

Violation Date: 03/07/2017
Violation Program: HW
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Source: CERS
Violation Division: San Mateo County Environmental Health
Violation Notes:

Returned to compliance on 06/08/2017.

Violation Description:

Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.

Violations

Violation Date: 03/07/2017 **Violation Source:** CERS
Violation Program: HW **Violation Division:** San Mateo County Environmental Health
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Notes:

Returned to compliance on 06/08/2017. Sanford currently addresses spills (including from drag-out) by immediately cleaning up larger spills with absorbent and by allowing smaller spills to evaporate or by cleaning them up by the end of the week. A week is not a reasonable time to allow spills to accumulate and evaporation is not an acceptable means of removing spills. Spill cleanup delay can lead to release to the environment if the berm has a leak or breach. Develop a system for addressing spills. Large spills should be cleaned up immediately as is currently the case. San Mateo recommends that staff inspect the facility for small spills at the end of every day and clean up these small spills within 48 hours. The system should also schedule regular cleanup of the non-RCRA hazardous waste solids (precipitate near the caustic tanks or "other organic solids"), and non-RCRA regulated solid, known as "floor sweep" or "other inorganic solids." Please develop and train your staff on a written procedure for cleanup of [Truncated]

Violation Description:

Hazardous Waste Generator Program - Release/Leaks/Spills - General

Violations

Violation Date: 03/01/2017 **Violation Source:** CERS
Violation Program: HW **Violation Division:** San Mateo County Environmental Health
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Notes:

Leaks in roof of rear chemical stg bins have allowed entry of rain water. In corrosives bin, contaminated runoff from open or improperly closed containers was observed on the floor. Clean bin floors, dispose of waste/cleaned up materials as hazardous waste and repair storage bin roofs to prevent leaks. Provide confirmation (photos and manifests) to inspector within 30 days. Sanford currently addresses spills (including from drag-out) by immediately cleaning up larger spills with absorbent and by allowing smaller spills to evaporate or by cleaning them up by the end of the week. A week is not a reasonable time to allow spills to accumulate and evaporation is not an acceptable means of removing spills. Spill cleanup delay can lead to release to the environment if the berm has a leak or breach. Develop a system for addressing spills. Citation:	HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple		
Violation Notes:			

Returned to compliance on 04/18/2019. Observed old chemicals stored in an inherently waste-like manner. Also observed unlabeled unempty bottles intended for re-use as solvent containers, stored in an inherently waste-like manner. Please address the unlabeled containers within 10 days and ensure within 96 hours that old chemicals are not leaking or stored precariously. See 66261.2(f).

Violation Description:

RCRA Large Quantity Generator - Abandonment/Illegal Disposal/Unauthorized Treatment - General

Violations

Violation Notes:			

Returned to compliance on 06/11/2014. Facility had one container over the 90 day limit. However all other containers throughout the facility were in

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

compliance with accumulation times. Advised facility to be diligent during hazardous waste inspections to not exceed accumulation times or this can result in a serious violation.

Violation Description:

Failure to obtain a permit or grant of interim status to accumulate hazardous waste longer than 90 days.

Violations

Violation Date: 03/14/2018
Violation Program: HWLQG
Citation: 22 CCR 15 66265.174 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.174
Violation Source: CERS
Violation Division: San Mateo County Environmental Health
Violation Notes:

Returned to compliance on 04/13/2018. Hazardous waste inspection records missing for parts of January and March and all of February for the QA labs. Please ensure regular compliance inspections are conducted in these labs. Immediately re-start these inspections and send the inspector these inspection forms weekly for the next 30 days.

Violation Description:

Failure to inspect weekly areas where hazardous waste containers are stored. The owner or operator must look for leaking containers and for deterioration of containers caused by corrosion or other factors.

Violations

Violation Date: 03/14/2018
Violation Program: HWLQG

Violation Division: San Mateo County Environmental Health
Violation Notes:

Returned to compliance on 04/12/2018. Observed in chemical storage bunker, an acid product cabinet that would not close. It held TFA and strong odors were released upon opening. Please repair or replace this cabinet within 30 days and ensure ongoing maintenance of safety equipment.

Violation Description:

Failure of the facility to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency.

Violations

Violation Date: 07/24/2020
Violation Program: HWLQG
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Source: CERS
Violation Division: San Mateo County Environmental Health
Violation Notes:

Returned to compliance on 07/29/2020. Observed many hazardous waste containers with unplugged openings. These containers are considered to be unclosed. These include a 5-gallon white square plastic container with ACN and methanol in R&D, two round 5-gallon spring cap containers (one with a drilled hole on the top and the other with an open barbed adaptor). Also observed 2 metal hazardous waste containers (DMF) with open adaptors in Synthesis(?). Please send verification of closure of these containers within 7 days.

Violation Description:

Failure to meet the following container management requirements:
 (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste.
 (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Source: CERS
Violation Division: San Mateo County Environmental Health

Returned to compliance on 04/18/2019. In purification observed 30-gallon hazardous waste tank essentially open. The threaded fixture connecting the tank to the process equipment did not fit. An appropriate fitting was not immediately available. The same type of container was observed in the purification hazardous waste room with no fitting for this opening. Please obtain and use fittings for this type of hazardous waste container. Observed vented hazardous waste containers with no filter in purification. Please obtain and employ filters. Also observed red cans synthesis waste (DMF, dichloromethane) without plugs in vent holes. Verify all of these corrections with inspector within 30 days.

Violation Description:

Failure to meet the following container management requirements:
 (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste.
 (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes:

Violation Source: CERS
Violation Division: San Mateo County Environmental Health

Returned to compliance on 03/30/2018. Facility was unable to demonstrate method for tracking the date of the first satellite waste disposal in the central storage area drum receiving satellite waste. Due to the frequency of disposal of the satellite container waste (many emptied daily), general hazardous waste accumulation appears to be more appropriate than satellite for the majority of hazardous waste generated at this facility. San Mateo County recommends that the facility cease satellite accumulation except for situations when the waste is accumulated slowly over time. Please begin general accumulation, immediately communicate this to all hazardous waste generator and handlers, and change training materials.

Violation Description:

Failure to meet the following conditions of satellite accumulation regulations,

- Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator
- Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first.
- The generator complies with sections 66265.171, 66264.172, and 66265.173(a).
- The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words "Hazardous Waste" including specified information
- Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a "90 day" accumulation area
- 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

Returned to compliance on 09/23/2020. Report not submitted. Please submit within 60 days.

Violation Description:

Failure of a large quantity generator to prepare a summary progress report every four years, using DTSC's Form # 1262 (3/99) titled "Summary Progress Report".

Violations

Violation Date: 07/24/2020
Violation Program: HWLQG
Citation: HSC 6.5 25244.21 - California Health and Safety Code, Chapter 6.5, Section(s) 25244.21
Violation Source: CERS
Violation Division: San Mateo County Environmental Health
Violation Notes:

Returned to compliance on 09/23/2020. Report not submitted. Please submit within 60 days.

Violation Description:

Failure to adequately complete, and maintain for review, all requirements of the source reduction evaluation review and plan (SB-14).

Violations

Violation Date: 03/14/2018
Violation Program: HWLQG
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Source: CERS
Violation Division: San Mateo County Environmental Health
Violation Notes:

Returned to compliance on 10/04/2018. Observed open hazardous waste drums and solvent drums in one of the purification labs (Mark Reyes) and strong solvent odor. Simon Chen explained that the waste draining into the drums may in some cases be re-run through the column to remove more product, in which case, the liquid draining into the drum is not waste. However, all waste drums were labeled as hazardous waste. Based on absorption reading the technician directed flow out of the equipment to either a product bottle or an open 55-gallon waste container. Within 30 days send the inspector a plan to develop a system in which both the input solvent and the output product/waste is contained in a closed loop system or as close to a closed loop system as possible. Because as Simon Chen explained the technician may not know whether the waste is hazardous, it should always be treated as hazardous waste. Its container should be labeled and closed using a cap similar to the HPLC type cap used in the R&D lab. [Truncated]

Violation Description:

Failure to meet the following container management requirements:
 (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste.
 (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Returned to compliance on 04/13/2018. Reviewed jobs, their descriptions, and training requirements. Business records show at least one person in GMP Purification without required hazardous waste handling training. During the second day of inspection (March 20) facility was unable to demonstrate that all staff requiring annual hazardous waste handling training had been trained. Please provide hazardous waste training for all staff in positions requiring this training and provide verification to the inspector within 30 days. Include both the general training provided by your contractor and any specialized training requested or provided by supervisors as noted in your Hazardous Waste Training SOP dated 10-1-2015. Within 30 days, provide information on a plan to develop a system to easily track training.

Violation Description:

Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Eval Notes:						

Peptide science including R&D and manufacturing for pharmaceutical developers. Waste streams generated through synthesis and () and purification (ACN, methanol) of peptides in both mfg and research processes. In last 12 months, facility generated almost 48,000 gallons of hazardous waste. Neat chemicals are piped from tanks in the materials room to process rooms. Hazardous waste is pumped to the hazardous waste room from the purification process. This process is subject to RCRA emissions regulations. Other hazardous waste is handled in various sized containers at points of generation and in the central waste storage area. The facility plans to move R&D to Santa Clara County likely this summer. Facility is considering installed a 3000-gallon tank to hold hazardous waste.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Violations Found: No
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: San Mateo County Environmental Health
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

This facility is not a hazardous waste (HW) generator. Please revise the CERS submission to uncheck the box identifying the facility as a HW generator. Two groundwater monitoring wells were observed onsite. Determine their origin and destroy as needed under permit with San Mateo County. The county will review internal records to assist this effort.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Violations

Violation Date:	01/16/2019	Violation Source:	CERS
Violation Program:	HMRPP	Violation Division:	San Mateo County Environmental Health
Citation:	HSC 6.95 25505.1 - California Health and Safety Code, Chapter 6.95, Section(s) 25505.1		
Violation Notes:			

Letter notifying property owner of the presence of hazardous materials and availability of the HMBP not available during inspection. Please provide verification of notification (Using template attached to email) to inspector within 30 days.

Violation Description:

Failure to notify property owner in writing that the business is subject to the business plan program and has complied with its provisions.

Violations

Violation Date:	02/03/2017	Violation Source:	CERS
Violation Program:	HW	Violation Division:	San Mateo County Environmental Health
Citation:	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12		
Violation Notes:			

Returned to compliance on 02/09/2017. EPAID# inactive. Please re-activate using information provided. Ensure EPAID# remains active by responding to June survey that DTSC send every year. Contact inspector when EPAID# is re-activated.

Violation Description:

Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.

Eval Notes:

Facility storing less than threshold quantities of solids and liquids during this inspection. The threshold is based on the capacity of your hazardous waste containers rather than the actual amount present, which can fluctuate beyond the threshold when using a 55-gallon drum. If you verify that you use a 30-gallon drum for liquid hazardous waste, the county will remove you from the business plan program. ; Note: data in [EVAL Notes] field for some records is truncated from the source.

Potential Media Affected: OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL VAPOR
Potential Contaminant of Concern:

1,2-DICHLOROETHYLENE (CIS), TETRACHLOROETHYLENE (PCE), TRICHLOROETHYLENE (TCE), VINYL CHLORIDE

Site History:

The Willow Office Park site is owned by Peninsula Innovation Partners, LLC. The Site is approximately 56.4 acres in size and is bordered by the Southern Pacific Railroad track, a storage facility, and Bayfront Expressway to the north; Mid-Peninsula High School and commercial businesses to the south; warehouses/commercial uses to the east; and apartments, restaurants, and a gasoline station to the west along Willow Road.

Historical uses of the site include helicopter testing and manufacturing, and production of reconnaissance satellites. The site is currently used as a business park. The proponent entered into a Voluntary Cleanup Agreement (VCA) with DTSC in 2018 to address possible contamination including tetrachloroethylene (PCE), trichloroethylene (TCE), and vinyl chloride in soil gas, and TCE and cis 1,2-dichloroethene in groundwater. Further groundwater characterization has been performed at the site under a Work Plan for Supplemental Groundwater Quality Investigation. DTSC is reviewing the characterization report to determine appropriate remedial measures.

Special Program:	VOLUNTARY CLEANUP PROGRAM				Acres:	56 ACRES
Funding:	SITE PROPONENT				Supervisor:	KIMBERLY WALSH
Cleanup Status:	ACTIVE AS OF 1/4/2018					
Cleanup Oversight Agencies:	DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY					
School District:						
Past Use that Caused Contam:	AIRCRAFT MAINTENANCE, AIRFIELD OPERATIONS					
Potential Media Affected:	OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL VAPOR					
Potential Contaminant of Concern:						

1,2-DICHLOROETHYLENE (CIS), TETRACHLOROETHYLENE (PCE), TRICHLOROETHYLENE (TCE), VINYL CHLORIDE

Site History:

The Willow Office Park site is owned by Peninsula Innovation Partners, LLC. The Site is approximately 56.4 acres in size and is bordered by the Southern Pacific Railroad track, a storage facility, and Bayfront Expressway to the north; Mid-Peninsula High School and commercial businesses to the south; warehouses/commercial uses to the east; and apartments, restaurants, and a gasoline station to the west along Willow Road.

Historical uses of the site include helicopter testing and manufacturing, and production of reconnaissance satellites. The site is currently used as a business park. The proponent entered into a Voluntary Cleanup Agreement (VCA) with DTSC in 2018 to address possible contamination including tetrachloroethylene (PCE), trichloroethylene (TCE), and vinyl chloride in soil gas, and TCE and cis 1,2-dichloroethene in groundwater. Further groundwater characterization has been performed at the site under a Work Plan for Supplemental Groundwater Quality Investigation. DTSC is reviewing the characterization report to determine appropriate remedial measures.

KS 8/2020

Violations

Violation Date: 06/07/2020 **Violation Source:** CERS
Violation Program: UST **Violation Division:** San Mateo County Environmental Health
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Notes:

Spill buckets failed to meet 5-gallon required capacity. Permit for replacement received 6-5.

Violation Description:

"Failure to meet one or more of the following requirements:

Install or maintain a liquid-tight spill container.

Have a minimum capacity of five gallons.

Have a functional drain valve or other method for the removal of liquid from the spill container.

Be resistant to galvanic corrosion.

Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container.

Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Tested by a certified UST service technician.

Maintain records of spill containment testing for 36 months.

DWR GW Subbasin Name: Santa Clara Valley - San Mateo Plain (2-009.03)

Disadvantaged Community:

Site History:

Information from Green Environemnt's 11/19/2013 Phase II Environemntal Site Assessment Report, 711 to 855 Hamilton Avenue, Menlo Park. San Mateo County does not take responsibility for the accuracy of the information from the report. The 771 – 821 Hamilton Site is identified by the following block of parcels: APNs 055-398-020, 055-398-030, 055-398-040, 055-398-050, 055-398-060, 055-398-070, 055-398-080 and 055-398-250. The total contiguous area is approximately 2.18 acres. The site was undeveloped open ground in disuse since approximately 2002 when the former onsite buildings were demolished and removed by the City of Menlo Park. Historical records reviewed by GEI indicate the 777 – 821 Hamilton Site was first developed in circa 1948 with a single building in the vicinity of the parcels referenced to 811 – 821 Hamilton Avenue. Other buildings constructed after 1948 include an additional small commercial building at 807 – 811 Hamilton Avenue, a commercial building and several smaller structures at 791 Hamilton Avenue, and a retail market building at 735 or 785 Hamilton Avenue. The initial building was occupied by a redwood tub manufacturer from circa 1948 until 1954. After 1965, 821 Hamilton Avenue was integrated into the storage yard of 811 Hamilton Avenue. Subsequent occupants at 801, 811 and 821 Hamilton Avenue included electrical contractors, auto repair businesses, and a drilling company. Historical occupants of 791 Hamilton Avenue included a heating and ventilation contractor, an electronic spray painting business, drilling companies, and an equipment transport service provider. Historical occupants at 735 or 785 Hamilton Avenue included food markets. The western-most parcel at 777 Hamilton Avenue was apparently never fully developed. Documented past hazardous materials usage and storage includes gasoline and diesel fuel in USTs, and above-ground storage of transmission fluid, motor oil, and diesel at 811 Hamilton Avenue; and above-ground storage of oil (including waste oil) and diesel at 791 Hamilton Avenue where vehicle maintenance reportedly occurred at the rear of the parcel. GEI also discovered a record of several drums containing unknown liquids present in 1998 at 777 Hamilton Avenue. All hazardous materials storage tanks and containers were reportedly removed under the oversight of SMCoeH. A complaint received by SMCoeH on October 30, 1998 claimed improper discharge to the sewer, and two (2) 55-gallon drums buried at 811 Hamilton Avenue. Past subsurface sampling (latest in March 2000) discovered low concentrations of polychlorinated biphenyls (PCBs) in soil at 777 Hamilton Avenue; benzene, toluene, xylenes and methyl tert butyl ether (MTBE) in soil at 811 Hamilton Avenue; MTBE in groundwater at 811 Hamilton Avenue; and diesel-range hydrocarbons in soil at 791 Hamilton Avenue. Buried construction debris was reportedly encountered in the eastern portion of 811 Hamilton Avenue. In GEI's site inspection in November 2012, the 777 – 821 Hamilton Site was vacant, unoccupied land in disuse. GEI observed an abandoned, unlabeled 55-gallon drum lying on its side on dirt at the north edge of the western portion of the site. There was no visible evidence of a release from the drum. GEI observed polyvinyl chloride (PVC) conduit piping mounted to the interior side of solid metal fencing on the north edge of the central portion of the site with observed labeling suggesting that the piping may have been once connected to a compressor(s); if true, the piping may at one time have contained compressor oil. GEI did not observe any visible staining on the asphalt pavement beneath the piping, although mulched and landscaping debris covered much of the existing pavement. GEI observed the eastern portion of the site was largely covered with vegetative mulch debris. Borings B-15 through B-32, and A through O were completed at the 777 – 821 Hamilton Site which is currently vacant ground with no building or structures. The results of soil and groundwater sample analyses are summarized in Table 2 to Table 8. Soil Samples: 777 and 735/785 Hamilton Avenue Area Borings B-16, B-17, and A through F were completed in the area of 777 and 735/785 Hamilton Avenue, the western portion of the block of parcels represented by 777 to 821 Hamilton Avenue. Although the TPH, VOCs, and SVOCs results of soil samples collected from this set of borings meet the CHHSLs and ESLs for residential land use, PCBs results for samples from within 1.5 feet depth at Boring B-16, B and C exceed risk-based screening levels for potential human health exposure. The PCBs results of Sample B16-1 (950 ig/Kg) from 1 to 1.5 feet depth at Boring B-16, Sample B-0-6 (440 ig/Kg) from within 0.5 feet depth at Boring B, Sample B-12-18 (120 ig/Kg) from 1.0 to 1.5 feet depth at Boring B, and Sample C-0-6 (97 ig/Kg) from within 0.5 feet depth at Boring C exceed the residential CHHSL of 89 ig/Kg. Samples B16-1 and B-0-6 also exceed the residential ESL of 220 ig/Kg. PCBs appear to be concentrated in the area of 777 Hamilton Avenue and limited to within 1.5 feet depth inasmuch as PCBs were not reported present above detection limits (11 to 34 ig/Kg range) in deeper soil samples collected from 1.5 to 3.75 feet depth at Borings B-16, B, and C. Furthermore, PCBs were not detected above the laboratory reporting limits (10 to 250 ig/Kg) in soil samples from Borings A, D, E and F (Table 2, Table 3, and Table 4). Chemical characterization via EPA 8270C identified traces of the following SVOCs in Sample A-12-18 from 1.0 to 1.5 feet depth at Boring A: benzo(a)pyrene (0.019 ig/Kg), benzo(b)fluoranthene (0.016 ig/Kg), bis (2-ethylhexyl) phthalate (0.020 ig/Kg), fluoranthene (0.023 ig/Kg), phenanthrene (0.014 ig/Kg), and pyrene (0.023 ig/Kg). In addition, traces of bis (2-ethylhexyl) phthalate (0.012 ig/Kg) and pyrene (0.0084 ig/Kg) were reported in Sample E-12-18 from 1.0 to 1.5 feet depth at Boring E, and pyrene (0.008 ig/Kg) in Sample D-12-18 from 1.0 to 1.5 feet depth at Boring D. The SVOCs results of soil samples, however, meet available ESLs for residential land use (Table 4). The laboratory reported no detectable levels of OCPs above laboratory reporting limits of 2.4 to 510 ig/Kg, except for 4,4'-DDE (59 ig/Kg), dieldrin (41 ig/Kg), and chlordane (270 ig/Kg technical, 54 ig/Kg alpha, and 71 ig/Kg gamma isomers) in Sample A-12-18; and dieldrin (5.2 ig/Kg) and chlordane (46 ig/Kg technical, 6.2 ig/Kg alpha, and 8.7 ig/Kg gamma isomers) in Sample E-12-18. Except for dieldrin in Sample A-12-18 above the CHHSL of 35 ig/Kg and ESL of 2.3 ig/Kg, and dieldrin in Sample E-12-18 only above the ESL of 2.3 ig/Kg, the OCPs data for soil samples from the area of 777 and 735/785 Hamilton Avenue meet CHHSLs and ESLs for residential land use (Table 2). CAM 17 metals analytical results for Sample B16-1 from 1.0 to 1.5 feet depth at Boring B-16 detected the following metals (Table 5): barium (130 mg/Kg), cadmium (0.98 mg/Kg), chromium (64 mg/Kg), cobalt (13 mg/Kg), copper (66 mg/Kg), lead (27 mg/Kg), mercury (0.067 mg/Kg), nickel (54 mg/Kg), vanadium (58 mg/Kg) and zinc (130 mg/Kg). LUFT 5 metals analytical results detected chromium (64 mg/Kg), lead (10 mg/Kg), nickel (54 mg/Kg), and zinc (81 mg/Kg) in Sample B15-3.5/4 from 3.5 to 4.0 feet depth at Boring B-15; and chromium (66 mg/Kg), lead (44 mg/Kg), nickel (58 mg/Kg), and zinc (210 mg/Kg) in Sample B17-2.25/3.75 from 2.25 to 3.75 feet depth at Boring B-17. Soil samples from 1.0 to 1.5 feet depth at Borings A, C, D and E were only analyzed for arsenic and lead, and the analytical results ranged from 4.3 to 8.7 mg/Kg arsenic and 11 to 35 mg/Kg lead. The metal results meet the corresponding CHHSLs and ESLs for residential land use, and are within the upper range of background screening levels for metals. The arsenic results also appear not to be significant inasmuch as arsenic is naturally occurring in California soils and the arsenic results for the area of 777 and 735/785 Hamilton Avenue are comparable to background levels. Background screening levels for arsenic and other metals in soil are available in Scott (1995), Bradford et al (March 1996), LBNL (April 2008), and SLAC (August 23, 2003). Asbestos was not detected above the laboratory reporting limit of 0.25% in Sample B16-1, representing fill intermixed with clay from 1.0 to 1.5 feet depth at Boring B-16 (Table 6). Groundwater Samples: 777 and 735/785 Hamilton Avenue Area The groundwater analytical results for Borings B-15, B-16 and B-17 indicated no detectable levels of organic COCs above laboratory reporting limits of 50 to 120 ig/L for TPH, 0.54 to 0.60 ig/L for PCBs, 0.50 to 50 ig/L for VOCs, 2.2 to 11 ig/L for SVOCs, and 0.063 to 1.0 ig/L for OCPs (Table 7). Except for barium at 110 ig/L, molybdenum at 14 ig/L, and zinc at 29 ig/L, the laboratory reported no detectable levels of CAM 17 metals in groundwater sampled from Boring B-16. Except for zinc at 33 ig/L in the groundwater sample from Boring B-17, the analytical results of LUFT 5 metals for Borings B-15 and B-17 indicated no detectable levels of metals above laboratory reporting limits of 2 to 20 ig/L. With respect to risk-based screening levels, the metals data for groundwater sampled from the area of 777 and 735/785 Hamilton Avenue meet MCLs and ESLs for drinking water resource protection (Table 8).

Site History:

Information from Green Environment's 11/19/2013 Phase II Environmental Site Assessment Report, 711 to 855 Hamilton Avenue, Menlo Park. San Mateo County does not take responsibility for the accuracy of the information from the report.

The 771 - 821 Hamilton Site is identified by the following block of parcels: APNs 055-398-020, 055-398-030, 055-398-040, 055-398-050, 055-398-060, 055-398-070, 055-398-080 and 055-398-250. The total contiguous area is approximately 2.18 acres. The site was undeveloped open ground in disuse since approximately 2002 when the former onsite buildings were demolished and removed by the City of Menlo Park.

Historical records reviewed by GEI indicate the 777 - 821 Hamilton Site was first developed in circa 1948 with a single building in the vicinity of the parcels referenced to 811 - 821 Hamilton Avenue. Other buildings constructed after 1948 include an additional small commercial building at 807 - 811 Hamilton Avenue, a commercial building and several smaller structures at 791 Hamilton Avenue, and a retail market building at 735 or 785 Hamilton Avenue. The initial building was occupied by a redwood tub manufacturer from circa 1948 until 1954. After 1965, 821 Hamilton Avenue was integrated into the storage yard of 811 Hamilton Avenue. Subsequent occupants at 801, 811 and 821 Hamilton Avenue included electrical contractors, auto repair businesses, and a drilling company. Historical occupants of 791 Hamilton Avenue included a heating and ventilation contractor, an electronic spray painting business, drilling companies, and an equipment transport service provider. Historical occupants at 735 or 785 Hamilton Avenue included food markets. The western-most parcel at 777 Hamilton Avenue was apparently never fully developed.

Documented past hazardous materials usage and storage includes gasoline and diesel fuel in USTs, and above-ground storage of transmission fluid, motor oil, and diesel at 811 Hamilton Avenue; and above-ground storage of oil (including waste oil) and diesel at 791 Hamilton Avenue where vehicle maintenance reportedly occurred at the rear of the parcel. GEI also discovered a record of several drums containing unknown liquids present in 1998 at 777 Hamilton Avenue. All hazardous materials storage tanks and containers were reportedly removed under the oversight of SMCoeH. A complaint received by SMCoeH on October 30, 1998 claimed improper discharge to the sewer, and two (2) 55-gallon drums buried at 811 Hamilton Avenue. Past subsurface sampling (latest in March 2000) discovered low concentrations of polychlorinated biphenyls (PCBs) in soil at 777 Hamilton Avenue; benzene, toluene, xylenes and methyl tert butyl ether (MTBE) in soil at 811 Hamilton Avenue; MTBE in groundwater at 811 Hamilton Avenue; and diesel-range hydrocarbons in soil at 791 Hamilton Avenue. Buried construction debris was reportedly encountered in the eastern portion of 811 Hamilton Avenue.

In GEI's site inspection in November 2012, the 777 - 821 Hamilton Site was vacant, unoccupied land in disuse. GEI observed an abandoned, unlabeled 55-gallon drum lying on its side on dirt at the north edge of the western portion of the site. There was no visible evidence of a release from the drum. GEI observed polyvinyl chloride (PVC) conduit piping mounted to the interior side of solid metal fencing on the north edge of the central portion of the site with observed labeling suggesting that the piping may have been once connected to a compressor(s); if true, the piping may at one time have contained compressor oil. GEI did not observe any visible staining on the asphalt pavement beneath the piping, although mulched and landscaping debris covered much of the existing pavement. GEI observed the eastern portion of the site was largely covered with vegetative mulch debris.

Borings B-15 through B-32, and A through O were completed at the 777 - 821 Hamilton Site which is currently vacant ground with no building or structures. The results of soil and groundwater sample analyses are summarized in Table 2 to Table 8.

Soil Samples: 777 and 735/785 Hamilton Avenue Area Borings B-16, B-17, and A through F were completed in the area of 777 and 735/785 Hamilton Avenue, the western portion of the block of parcels represented by 777 to 821 Hamilton Avenue. Although the TPH, VOCs, and SVOCs results of soil samples collected from this set of borings meet the CHHSLs and ESLs for residential land use, PCBs results for samples from within 1.5 feet depth at Boring B-16, B and C exceed risk-based screening levels for potential human health exposure. The PCBs results of Sample B16-1 (950 ig/Kg) from 1 to 1.5 feet depth at Boring B-16, Sample B-0-6 (440 ig/Kg) from within 0.5 feet depth at Boring B, Sample B-12-18 (120 ig/Kg) from 1.0 to 1.5 feet depth at Boring B, and Sample C-0-6 (97 ig/Kg) from within 0.5 feet depth at Boring C exceed the residential CHHSL of 89 ig/Kg. Samples B16-1 and B-0-6 also exceed the residential ESL of 220 ig/Kg. PCBs appear to be concentrated in the area of 777 Hamilton Avenue and limited to within 1.5 feet depth inasmuch as PCBs were not reported present above detection limits (11 to 34 ig/Kg range) in deeper soil samples collected from 1.5 to 3.75 feet depth at Borings B-16, B, and C. Furthermore, PCBs were not detected above the laboratory reporting limits (10 to 250 ig/Kg) in soil samples from Borings A, D, E and F (Table 2, Table 3, and Table 4).

Chemical characterization via EPA 8270C identified traces of the following SVOCs in Sample A-12-18 from 1.0 to 1.5 feet depth at Boring A: benzo(a) pyrene (0.019 ig/Kg), benzo(b)fluoranthene (0.016 ig/Kg), bis (2-ethylhexyl) phthalate (0.020 ig/Kg), fluoranthene (0.023 ig/Kg), phenanthrene (0.014

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

ig/Kg), and pyrene (0.023 ig/Kg). In addition, traces of bis (2-ethylhexyl) phthalate (0.012 ig/Kg) and pyrene (0.0084 ig/Kg) were reported in Sample E-12-18 from 1.0 to 1.5 feet depth at Boring E, and pyrene (0.008 ig/Kg) in Sample D-12-18 from 1.0 to 1.5 feet depth at Boring D. The SVOCs results of soil samples, however, meet available ESLs for residential land use (Table 4).

The laboratory reported no detectable levels of OCPs above laboratory reporting limits of 2.4 to 510 ig/Kg, except for 4,4'-DDE (59 ig/Kg), dieldrin (41 ig/Kg), and chlordane (270 ig/Kg technical, 54 ig/Kg alpha, and 71 ig/Kg gamma isomers) in Sample A-12-18; and dieldrin (5.2 ig/Kg) and chlordane (46 ig/Kg technical, 6.2 ig/Kg alpha, and 8.7 ig/Kg gamma isomers) in Sample E-12-18. Except for dieldrin in Sample A-12-18 above the CHHSL of 35 ig/Kg and ESL of 2.3 ig/Kg, and dieldrin in Sample E-12-18 only above the ESL of 2.3 ig/Kg, the OCPs data for soil samples from the area of 777 and 735/785 Hamilton Avenue meet CHHSLs and ESLs for residential land use (Table 2).

CAM 17 metals analytical results for Sample B16-1 from 1.0 to 1.5 feet depth at Boring B-16 detected the following metals (Table 5): barium (130 mg/Kg), cadmium (0.98 mg/Kg), chromium (64 mg/Kg), cobalt (13 mg/Kg), copper (66 mg/Kg), lead (27 mg/Kg), mercury (0.067 mg/Kg), nickel (54 mg/Kg), vanadium (58 mg/Kg) and zinc (130 mg/Kg). LUFT 5 metals analytical results detected chromium (64 mg/Kg), lead (10 mg/Kg), nickel (54 mg/Kg), and zinc (81 mg/Kg) in Sample B15-3.5/4 from 3.5 to 4.0 feet depth at Boring B-15; and chromium (66 mg/Kg), lead (44 mg/Kg), nickel (58 mg/Kg), and zinc (210 mg/Kg) in Sample B17-2.25/3.75 from 2.25 to 3.75 feet depth at Boring B-17. Soil samples from 1.0 to 1.5 feet depth at Borings A, C, D and E were only analyzed for arsenic and lead, and the analytical results ranged from 4.3 to 8.7 mg/Kg arsenic and 11 to 35 mg/Kg lead. The metal results meet the corresponding CHHSLs and ESLs for residential land use, and are within the upper range of background screening levels for metals. The arsenic results also appear not to be significant inasmuch as arsenic is naturally occurring in California soils and the arsenic results for the area of 777 and 735/785 Hamilton Avenue are comparable to background levels. Background screening levels for arsenic and other metals in soil are available in Scott (1995), Bradford et al (March 1996), LBNL (April 2008), and SLAC (August 23, 2003).

Asbestos was not detected above the laboratory reporting limit of 0.25% in Sample B16-1, representing fill intermixed with clay from 1.0 to 1.5 feet depth at Boring B-16 (Table 6).

Groundwater Samples: 777 and 735/785 Hamilton Avenue Area

The groundwater analytical results for Borings B-15, B-16 and B-17 indicated no detectable levels of organic COCs above laboratory reporting limits of 50 to 120 ig/L for TPH, 0.54 to 0.60 ig/L for PCBs, 0.50 to 50 ig/L for VOCs, 2.2 to 11 ig/L for SVOCs, and 0.063 to 1.0 ig/L for OCPs (Table 7).

Except for barium at 110 ig/L, molybdenum at 14 ig/L, and zinc at 29 ig/L, the laboratory reported no detectable levels of CAM 17 metals in groundwater sampled from Boring B-16.

Except for zinc at 33 ig/L in the groundwater sample from Boring B-17, the analytical results of LUFT 5 metals for Borings B-15 and B-17 indicated no detectable levels of metals above laboratory reporting limits of 2 to 20 ig/L. With respect to risk-based screening levels, the metals data for groundwater sampled from the area of 777 and 735/785 Hamilton Avenue meet MCLs and ESLs for drinking water resource protection (Table 8).

Site History:			

Information taken from Green Environment's 11/19/2013 Phase II Environmental Site Assessment Report, 711 to 851 Hamilton Avenue, Menlo Park. San Mateo County does not take responsibility for the accuracy of the information taken from the report. The 735 – 763 Hamilton Site is identified by a block of contiguous parcels comprised of APNs 055-396-030, 055-396-060, 055-397-010, 055-396-020 and 055-397-030. The site of approximately 1.71 acres is improved with commercial warehouse-type buildings, one at 755 Hamilton Avenue and the other at 763 Hamilton Avenue, and paved and unpaved storage yards. Historical records reviewed by GEI indicate the 735 – 763 Hamilton Site was first developed with the building at 755 Hamilton Avenue in the early 1950's, with the building at 763 Hamilton Avenue added by 1965. Since the 1950s, the site has been primarily occupied by construction equipment sales and rental companies. Gasoline and diesel fuel were once stored in three (3) underground storage tanks (USTs) and dispensed onsite for fueling vehicles and equipment in the area of the 755 Hamilton Building. The fuel USTs were formerly located in the Hamilton Avenue frontage area and connected to fuel dispensers located approximately 30 feet north of the USTs. In the 1980s, the USTs were discovered to be leaking and the lead regulatory agency, the San Mateo County Environmental Health Agency (SMCoEH) opened a Leaking Underground Storage Tank (LUST) case referenced as LUST Case #440007, Allen Equipment Company. The USTs and some contaminated soil were removed in the 1980s with SMCoEH oversight. Based on soil and groundwater sampling and analyses performed during and after the USTs and soil removal, SMCoEH issued case closure in 1996. The closure letter for the two (2) fuel USTs formerly located in the Hamilton frontage area, stated that an estimated five (5) cubic yards of fuel-affected soil remained in-situ, specified that development or excavation required agency notification, and promulgated that appropriate corrective actions would be reviewed by the regulatory agency if land use were to change in the future. Public records reviewed by GEI and the types of historical operations suggest that motor oil, waste oil, antifreeze, fuels, degreasing solvents, and waste products were used or generated onsite in the past. In GEI's site inspection in November 2012, GEI observed an outdoor washrack area equipped with a sump and used for equipment and vehicle washing, located to the north of the 755 Hamilton Building. A total of nine (9) borings (B-4 to B-12) were completed in December 2012 at the 735 – 763 Hamilton Site. The results of soil and groundwater sample analyses are summarized in Table 2 to Table 8. Soil Samples Borings B-6 to B-10 were completed in the vicinity of former USTs, outdoor equipment storage areas, and an outdoor washrack associated with the 755 Hamilton Building. Petroleum hydrocarbons in excess of residential ESLs were detected in soil samples from one (1) to five (5) feet depth at Borings B-7, B-9 and B-10. For Boring B-7 in the former equipment storage yard, the TPH analytical results indicated 2.8 mg/Kg TPHg, 2,200 mg/Kg TPHd, and 1,300 mg/Kg TPHmo in Sample B7-1/1.5. VOCs detected above laboratory reporting limits (3.7 to 44 ig/Kg) included 80 ig/Kg acetone, 110 ig/Kg naphthalene, 95 ig/Kg butylbenzene, 56 ig/Kg propylbenzene, and 16 ig/Kg 1,2,4-trimethylbenzene. The vertical extent of petroleum hydrocarbons and VOCs impact at Boring B-7 appears to be limited inasmuch as a deeper soil sample from 3.5 to 4.0 feet depth had no petroleum hydrocarbons and naphthalene above laboratory reporting limits of 1.3 to 64 mg/Kg for TPH and 9.5 ig/Kg for naphthalene (Table 2 and Table 3). For Boring B-10 in the equipment washrack area, the TPH analytical results indicated 90 mg/Kg TPHg, 2,100 mg/Kg TPHd, and 2,600 mg/Kg TPHmo in Sample B10-3/3.5 from 3.0 to 3.5 feet depth, and 14 mg/Kg TPHg, 790 mg/Kg TPHd, and 1,000 mg/Kg TPHmo in Sample B10-4.5/5 from 4.5 to 5.0 feet depth. VOCs were only detected in Sample B10-4.5/5 and included 86 ig/Kg acetone, 20 ig/Kg naphthalene, 94 ig/Kg butylbenzene, and 30 ig/Kg propylbenzene (Table 2 and Table 3). For Boring B-9 in the area of former fuel dispensers and piping, the TPH analytical results indicated 1,700 mg/Kg TPHd and 270 ig/Kg naphthalene in Sample B9-5.25/5.75 from 5.25 to 5.75 feet depth, and 120 mg/Kg TPHd in Sample B9-3/3.5 from 3.0 to 3.5 feet depth (Table 2 and Table 3). The deeper of the two (2) soil samples is suspected to represent the smear zone above the top of the saturated zone, reflecting the occurrence of petroleum hydrocarbons in solution in groundwater around Boring B-9. Borings B-4, B-5, B-11 and B-12 were completed in other historical operational areas of the 755 – 763 Hamilton Site. The TPH analytical results of soil samples from these borings meet ESLs for residential land use. Maximum TPH results were

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

100 mg/Kg TPHd and 300 mg/Kg TPHmo in Sample B12-1.5/2 from 1.5 to 2.0 feet depth at Boring B-12 along the site's north perimeter with the DRC drainage swale. VOCs and SVOCs were not detected in Sample B12-1.5/2 above laboratory reporting limits of 3.7 to 37 ig/Kg for VOCs, and 0.40 to 4.9 ig/Kg for SVOCs. Similarly, Boring B-5 was completed near the DRC drainage swale at site's north perimeter. Except for traces of di-n-butyl phthalate (0.50 ig/Kg), SVOCs and VOCs were not detected above laboratory reporting limits (0.16 to 1.5 ig/Kg for SVOCs and 5.2 to 52 ig/Kg for VOCs) in Sample B5-1/1.5 from 1.0 to 1.5 feet depth at Boring B-5. OCPs were not detected above laboratory reporting limits (2.3 to 240 ig/Kg) in the soil samples from Borings B-5 and B-12 (Table 2, Table 3 and Table 4). Except for traces in Sample B12-1.5/2 (83 ig/Kg), PCBs were not detected in soil samples collected from the 755 – 763 Hamilton Site. Laboratory reporting limits for PCBs ranged between 59 and 65 ig/Kg (Table 2). Metals analytical results identified the occurrence of the following metals in fill and soil sampled from the 755 – 763 Hamilton Site (Table 5): arsenic, barium, cadmium, chromium, cobalt, copper, lead, mercury, nickel, vanadium, and zinc. Except for copper, the metal results meet available CHHSLs and ESLs for residential land use, and are in the range of background screening levels. Although arsenic results (27 mg/Kg maximum) in excess of residential CHHSLs and ESLs are noted in the sample set, arsenic is naturally occurring in soils throughout California. The arsenic results for the 755 – 763 Hamilton Site are comparable to background levels reported elsewhere in California. Background screening levels for arsenic and other metals in soil are available in Scott (1995), Bradford et al (March 1996), LBNL (April 2008), and SLAC (August 23, 2003). Although the copper analytical result of Sample B5/1/1.5 (890 mg/Kg) meets CHHSLs and ESLs for potential residential human exposure risk, the sample result exceeds the urban ecotoxicity-based ESL of 230 mg/Kg in RWQCB (May 2013). Furthermore, the sample result exceeds background screening levels for copper published in Scott (1995), Bradford et al (March 1996), LBNL (April 2008), and SLAC (August 23, 2003). Sample B5-1/1.5 represents fill intermixed with clay collected in the former equipment storage yard near the DRC drainage swale along the north perimeter of the subject property. The anomalous copper result suggests a localized release of copper, or the occurrence of copper-bearing constituents in the near-surface fill in the area of Boring B-5. Asbestos was not detected above the laboratory reporting limit of 0.25% in Sample B5-1/1.5 from Boring B-5 and in Sample B12-1.5/2 from Boring B-12; both samples representing fill intermixed with clayey soil (Table 6). Groundwater Samples Except for groundwaters sampled from Borings B-9 and B-10, the groundwater analytical results for the 755 – 763 Hamilton Site indicated no detectable levels of petroleumhydrocarbons and VOCs above laboratory reporting limits of 50 to 120 ig/L for TPH, and 0.50 to 50 ig/L for VOCs (Table 7). For Boring B-10 in the equipment washrack area, the analytical results indicated 590 ig/L TPHg, 1,200 ig/L TPHd, and 1,900 ig/L TPHmo along with traces of chloroform (5.5 ig/L) and tetrachloroethene (PCE, 0.69 ig/L). For Boring B-9 in the former fuel dispenser area, the laboratory reported 330 ig/L TPHg and 1,200 ig/L TPHd with traces of naphthalene (5.0 ig/L). These groundwater results complement the soil sampling data and indicate a historical release of petroleum hydrocarbons, dominated by diesel to oil range products, in the area of the 755 Hamilton Building. Although the TPH results of the groundwater samples from Borings B-9 and B-10 exceed ESLs for drinking water resource protection, the sample results for VOCs meet MCLs and ESLs for drinking water resource protection (Table 7). Other chemical characterization of groundwater sampled from the 755 – 763 Hamilton Site include PCBs results for Borings B-4 to B-7, B-10 and B-11, and SVOCs and OCPs results for Borings B-5 and B-12. The groundwater analytical results indicated no detectable levels of these COCs above laboratory reporting limits of 0.54 to 0.77 ig/L for PCBs, 2.1 to 11 ig/L for SVOCs, and 0.066 to 1.1 ig/L for OCPs (Table 7). Metals analytical results identified the occurrence of the following metals in solution in one or more of the groundwater samples collected from the 755 – 763 Hamilton Site (Table 8): barium, chromium, lead, molybdenum, and zinc. Except for the lead result for Boring B-8, the metal results meet the corresponding MCLs and ESLs for drinking water resource protection. The lead result for Sample B8-GW (36 ig/L) exceeds the drinking water toxicity-based MCL and ESL of 15 ig/L.

Site History:

Information taken from Green Environment's 11/19/2013 Phase II Environmental Site Assessment Report, 711 to 851 Hamilton Avenue, Menlo Park. San mateo County does not take responsibility for the accuracy of the information taken from the report.

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

The 735 - 763 Hamilton Site is identified by a block of contiguous parcels comprised of APNs 055-396-030, 055-396-060, 055-397-010, 055-396-020 and 055-397-030. The site of approximately 1.71 acres is improved with commercial warehouse-type buildings, one at 755 Hamilton Avenue and the other at 763 Hamilton Avenue, and paved and unpaved storage yards.

Historical records reviewed by GEI indicate the 735 - 763 Hamilton Site was first developed with the building at 755 Hamilton Avenue in the early 1950's, with the building at 763 Hamilton Avenue added by 1965. Since the 1950s, the site has been primarily occupied by construction equipment sales and rental companies.

Gasoline and diesel fuel were once stored in three (3) underground storage tanks (USTs) and dispensed onsite for fueling vehicles and equipment in the area of the 755 Hamilton Building. The fuel USTs were formerly located in the Hamilton Avenue frontage area and connected to fuel dispensers located approximately 30 feet north of the USTs. In the 1980s, the USTs were discovered to be leaking and the lead regulatory agency, the San Mateo County Environmental Health Agency (SMCoEH) opened a Leaking Underground Storage Tank (LUST) case referenced as LUST Case #440007, Allen Equipment Company. The USTs and some contaminated soil were removed in the 1980s with SMCoEH oversight.

Based on soil and groundwater sampling and analyses performed during and after the USTs and soil removal, SMCoEH issued case closure in 1996.

The closure letter for the two (2) fuel USTs formerly located in the Hamilton frontage area, stated that an estimated five (5) cubic yards of fuel-affected soil remained in-situ, specified that development or excavation required agency notification, and promulgated that appropriate corrective actions would be reviewed by the regulatory agency if land use were to change in the future.

Public records reviewed by GEI and the types of historical operations suggest that motor oil, waste oil, antifreeze, fuels, degreasing solvents, and waste products were used or generated onsite in the past. In GEI's site inspection in November 2012, GEI observed an outdoor washrack area equipped with a sump and used for equipment and vehicle washing, located to the north of the 755 Hamilton Building.

A total of nine (9) borings (B-4 to B-12) were completed in December 2012 at the 735 - 763 Hamilton Site. The results of soil and groundwater sample analyses are summarized in Table 2 to Table 8.

Soil Samples

Borings B-6 to B-10 were completed in the vicinity of former USTs, outdoor equipment storage areas, and an outdoor washrack associated with the 755 Hamilton Building.

Petroleum hydrocarbons in excess of residential ESLs were detected in soil samples from one (1) to five (5) feet depth at Borings B-7, B-9 and B-10. For Boring B-7 in the former equipment storage yard, the TPH analytical results indicated 2.8 mg/Kg TPHg, 2,200 mg/Kg TPHd, and 1,300 mg/Kg TPHmo in Sample B7-1/1.5. VOCs detected above laboratory reporting limits (3.7 to 44 ig/Kg) included 80 ig/Kg acetone, 110 ig/Kg naphthalene, 95 ig/Kg butylbenzene, 56 ig/Kg propylbenzene, and 16 ig/Kg 1,2,4-trimethylbenzene. The vertical extent of petroleum hydrocarbons and VOCs impact at Boring B-7 appears to be limited inasmuch as a deeper soil sample from 3.5 to 4.0 feet depth had no petroleum hydrocarbons and naphthalene above laboratory reporting limits of 1.3 to 64 mg/Kg for TPH and 9.5 ig/Kg for naphthalene (Table 2 and Table 3).

For Boring B-10 in the equipment washrack area, the TPH analytical results indicated 90 mg/Kg TPHg, 2,100 mg/Kg TPHd, and 2,600 mg/Kg TPHmo in Sample B10-3/3.5 from 3.0 to 3.5 feet depth, and 14 mg/Kg TPHg, 790 mg/Kg TPHd, and 1,000 mg/Kg TPHmo in Sample B10-4.5/5 from 4.5 to 5.0 feet depth. VOCs were only detected in Sample B10-4.5/5 and included 86 ig/Kg acetone, 20 ig/Kg naphthalene, 94 ig/Kg butylbenzene, and 30 ig/Kg propylbenzene (Table 2 and Table 3).

For Boring B-9 in the area of former fuel dispensers and piping, the TPH analytical results indicated 1,700 mg/Kg TPHd and 270 ig/Kg naphthalene in Sample B9-5.25/5.75 from 5.25 to 5.75 feet depth, and 120 mg/Kg TPHd in Sample B9-3/3.5 from 3.0 to 3.5 feet depth (Table 2 and Table 3). The deeper of the two (2) soil samples is suspected to represent the smear zone about the top of the saturated zone, reflecting the occurrence of petroleum hydrocarbons in solution in groundwater around Boring B-9.

Borings B-4, B-5, B-11 and B-12 were completed in other historical operational areas of the 755 - 763 Hamilton Site. The TPH analytical results of soil samples from these borings meet ESLs for residential land use. Maximum TPH results were 100 mg/Kg TPHd and 300 mg/Kg TPHmo in Sample B12-1.5/2 from 1.5 to 2.0 feet depth at Boring B-12 along the site's north perimeter with the DRC drainage swale. VOCs and SVOCs were not detected in Sample B12-1.5/2 above laboratory reporting limits of 3.7 to 37 ig/Kg for VOCs, and 0.40 to 4.9 ig/Kg for SVOCs. Similarly, Boring B-5 was completed near the DRC drainage swale at site's north perimeter. Except for traces of di-n-butyl phthalate (0.50 ig/Kg), SVOCs and VOCs were not detected above laboratory reporting limits (0.16 to 1.5 ig/Kg for SVOCs and 5.2 to 52 ig/Kg for VOCs) in Sample B5-1/1.5 from 1.0 to 1.5 feet depth at Boring B-5. OCPs were not detected above laboratory reporting limits (2.3 to 240 ig/Kg) in the soil samples from Borings B-5 and B-12 (Table 2, Table 3 and Table 4).

Except for traces in Sample B12-1.5/2 (83 ig/Kg), PCBs were not detected in soil samples collected from the 755 - 763 Hamilton Site. Laboratory reporting limits for PCBs ranged between 59 and 65 ig/Kg (Table 2).

Metals analytical results identified the occurrence of the following metals in fill and soil sampled from the 755 - 763 Hamilton Site (Table 5): arsenic, barium, cadmium, chromium, cobalt, copper, lead, mercury, nickel, vanadium, and zinc. Except for copper, the metal results meet available CHHSLs and ESLs for residential land use, and are in the range of background screening levels. Although arsenic results (27 mg/Kg maximum) in excess of residential CHHSLs and ESLs are noted in the sample set, arsenic is naturally occurring in soils throughout California. The arsenic results for the 755 - 763 Hamilton Site are comparable to background levels reported elsewhere in California. Background screening levels for arsenic and other metals in soil are available in Scott (1995), Bradford et al (March 1996), LBNL (April 2008), and SLAC (August 23, 2003).

Although the copper analytical result of Sample B5/1/1.5 (890 mg/Kg) meets CHHSLs and ESLs for potential residential human exposure risk, the sample result exceeds the urban ecotoxicity-based ESL of 230 mg/Kg in RWQCB (May 2013). Furthermore, the sample result exceeds background screening levels for copper published in Scott (1995), Bradford et al (March 1996), LBNL (April 2008), and SLAC (August 23, 2003). Sample B5-1/1.5 represents fill intermixed with clay collected in the former equipment storage yard near the DRC drainage swale along the north perimeter of the subject property. The anomalous copper result suggests a localized release of copper, or the occurrence of copper-bearing constituents in the near-surface fill in the area of Boring B-5.

Asbestos was not detected above the laboratory reporting limit of 0.25% in Sample B5-1/1.5 from Boring B-5 and in Sample B12-1.5/2 from Boring B-12; both samples representing fill intermixed with clayey soil (Table 6).

Groundwater Samples

Except for groundwater sampled from Borings B-9 and B-10, the groundwater analytical results for the 755 - 763 Hamilton Site indicated no detectable levels of petroleum hydrocarbons and VOCs above laboratory reporting limits of 50 to 120 ig/L for TPH, and 0.50 to 50 ig/L for VOCs (Table 7). For Boring B-10 in the equipment washrack area, the analytical results indicated 590 ig/L TPHg, 1,200 ig/L TPHd, and 1,900 ig/L TPHmo along with traces of chloroform (5.5 ig/L) and tetrachloroethene (PCE, 0.69 ig/L). For Boring B-9 in the former fuel dispenser area, the laboratory reported 330 ig/L TPHg and 1,200 ig/L TPHd with traces of naphthalene (5.0 ig/L). These groundwater results complement the soil sampling data and indicate a historical release of petroleum hydrocarbons, dominated by diesel to oil range products, in the area of the 755 Hamilton Building.

Although the TPH results of the groundwater samples from Borings B-9 and B-10 exceed ESLs for drinking water resource protection, the sample results for VOCs meet MCLs and ESLs for drinking water resource protection (Table 7).

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

Other chemical characterization of groundwater sampled from the 755 - 763 Hamilton Site include PCBs results for Borings B-4 to B-7, B-10 and B-11, and SVOCs and OCPs results for Borings B-5 and B-12. The groundwater analytical results indicated no detectable levels of these COCs above laboratory reporting limits of 0.54 to 0.77 ig/L for PCBs, 2.1 to 11 ig/L for SVOCs, and 0.066 to 1.1 ig/L for OCPs (Table 7). Metals analytical results identified the occurrence of the following metals in solution in one or more of the groundwater samples collected from the 755 - 763 Hamilton Site (Table 8): barium, chromium, lead, molybdenum, and zinc. Except for the lead result for Boring B-8, the metal results meet the corresponding MCLs and ESLs for drinking water resource protection. The lead result for Sample B8-GW (36 ig/L) exceeds the drinking water toxicity-based MCL and ESL of 15 ig/L.

Potential Contamin of Concern:			

1,1-DICHLOROETHANE, ARSENIC, CHLOROBENZENE, POLYCHLORINATED BIPHENYLS (PCBS), TOTAL CHROMIUM (1:6 RATIO CR VI:CR III)

Site History:

Raychem Corporation (Raychem) operated a facility which manufactured high technology plastic and electrical insulation products and also engaged in management of hazardous waste pursuant to a hazardous waste facility permit (Permit). The Permit, issued in 1983 by the California Department of Health Services, the predecessor of DTSC, allowed operation of a wastewater treatment system, a hazardous waste storage yard and a potassium ferrocyanide tank farm. On January 9, 1997, DTSC approved the closure activities of the aboveground portions of these hazardous waste management units.

In 1999, Raychem merged with Tyco Electronics Corporation (Tyco). On June 26, 1996 and September 2000, Raychem/Tyco entered into Corrective Action Consent Agreements with DTSC to first address the release of hazardous waste in soil and groundwater and then to complete Interim Measures, a Corrective Measures Study, Remedy Selection and Corrective Measures Implementation for the Former Raychem/Tyco Facility.

As a result of the implementation of corrective action investigations, it was determined that soil and groundwater contamination exists at the Former Raychem/Tyco Facility. Tyco is required to address the corrective action for any on-site contaminated soil and groundwater as well as addressing on-site contamination that may migrate off the Former Raychem/Tyco Facility.

The Menlo Park West Campus is the site designation name for the East side of the Former Raychem/Tyco Facility that was purchased in 2011. A Remedial Action Plan for the West Campus was implemented in 2012. Land use restrictions, groundwater monitoring, and any other post-Certification activities for the West Campus are available on the Tyco Electronics Envirostor page (site code 520017). JP 09/07/2018

Status: CERTIFIED / OPERATION & MAINTENANCE - LAND USE RESTRICTIONS

School District:	
APN: 055260210, 055260220	
Cleanup Status: CERTIFIED / OPERATION & MAINTENANCE AS OF 6/30/2015	
Cleanup Oversight Agencies: DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY	
Site Type: VOLUNTARY CLEANUP	
Office: CLEANUP BERKELEY	
Past Use that Caused Contam: MANUFACTURING - ELECTRONIC	
Potential Media Affected: OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL	
Potential Contamin of Concern:	

1,1-DICHLOROETHANE, ARSENIC, CHLOROBENZENE, POLYCHLORINATED BIPHENYLS (PCBS), TOTAL CHROMIUM (1:6 RATIO CR VI:CR III)

Site History:

Raychem Corporation (Raychem) operated a facility which manufactured high technology plastic and electrical insulation products and also engaged in management of hazardous waste pursuant to a hazardous waste facility permit (Permit). The Permit, issued in 1983 by the California Department of Health Services, the predecessor of DTSC, allowed operation of a wastewater treatment system, a hazardous waste storage yard and a potassium ferrocyanide tank farm. On January 9, 1997, DTSC approved the closure activities of the aboveground portions of these hazardous waste management

----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

units.

In 1999, Raychem merged with Tyco Electronics Corporation (Tyco). On June 26, 1996 and September 2000, Raychem/Tyco entered into Corrective Action Consent Agreements with DTSC to first address the release of hazardous waste in soil and groundwater and then to complete Interim Measures, a Corrective Measures Study, Remedy Selection and Corrective Measures Implementation for the Former Raychem/Tyco Facility.

As a result of the implementation of corrective action investigations, it was determined that soil and groundwater contamination exists at the Former Raychem/Tyco Facility. Tyco is required to address the corrective action for any on-site contaminated soil and groundwater as well as addressing on-site contamination that may migrate off the Former Raychem/Tyco Facility.

The Menlo Park West Campus is the site designation name for the East side of the Former Raychem/Tyco Facility that was purchased in 2011. A Remedial Action Plan for the West Campus was implemented in 2012. Land use restrictions, groundwater monitoring, and any other post-Certification activities for the West Campus are available on the Tyco Electronics Envirostor page (site code 520017). JP 09/07/2018

Status: CERTIFIED / OPERATION & MAINTENANCE - LAND USE RESTRICTIONS
Program Type: VOLUNTARY CLEANUP
CalEnviroScreen Score: 46-50%
Summary Link: http://www.envirostor.dtsc.ca.gov/public/profile_report?global_id=60001437

Land Use Restrictions

Site Management Requirements: ACTIVITIES PROHIBITED WHICH DISTURB THE REMEDY AND MONITORING SYSTEMS WITHOUT APPROVAL
DAY CARE CENTER PROHIBITED
HOSPITAL USE PROHIBITED
LAND USE COVENANT
MAINTAIN MONITORING OF GROUNDWATER
NO EXCAVATION OF CONTAMINATED SOILS WITHOUT AGENCY REVIEW AND APPROVAL
NO EXCAVATION OR ACTIVITIES WHICH DISTURB THE SOIL BELOW A SPECIFIED DEPTH (SEE COVENANT FOR DEPTH) WITHOUT AGENCY REVIEW AND APPROVAL OF A SOIL MANAGEMENT PLAN
NO GROUNDWATER EXTRACTION AT ANY DEPTH WITHOUT APPROVAL
NO OIL OR GAS EXTRACTION AT ANY DEPTH
NOTIFY AFTER CHANGE OF PROPERTY OWNER
NOTIFY DAMAGES TO REMEDY AND MONITORING SYSTEMS UPON DISCOVERY
NOTIFY PRIOR TO CHANGE IN LAND USE
NOTIFY PRIOR TO DEVELOPMENT
NOTIFY PRIOR TO SUBSURFACE WORK
ONLY EXTRACTION OF GROUNDWATER FOR SITE REMEDIATION PERMITTED
PERFORM H&S PLAN PRIOR TO SUBSURFACE WORK
PUBLIC OR PRIVATE SCHOOL FOR PERSONS UNDER 21 PROHIBITED
RAISING OF FOOD PROHIBITED
RESIDENCE USE PROHIBITED

Potential Contaminant of Concern:						

1,1-DICHLOROETHANE, ARSENIC, CHLOROBENZENE, POLYCHLORINATED BIPHENYLS (PCBS), TOTAL CHROMIUM (1:6 RATIO CR VI:CR III)

Site History:

Raychem Corporation (Raychem) operated a facility which manufactured high technology plastic and electrical insulation products and also engaged in management of hazardous waste pursuant to a hazardous waste facility permit (Permit). The Permit, issued in 1983 by the California Department of Health Services, the predecessor of DTSC, allowed operation of a wastewater treatment system, a hazardous waste storage yard and a potassium ferrocyanide tank farm. On January 9, 1997, DTSC approved the closure activities of the aboveground portions of these hazardous waste management units.

In 1999, Raychem merged with Tyco Electronics Corporation (Tyco). On June 26, 1996 and September 2000, Raychem/Tyco entered into Corrective Action Consent Agreements with DTSC to first address the release of hazardous waste in soil and groundwater and then to complete Interim Measures, a Corrective Measures Study, Remedy Selection and Corrective Measures Implementation for the Former Raychem/Tyco Facility.

As a result of the implementation of corrective action investigations, it was determined that soil and groundwater contamination exists at the Former Raychem/Tyco Facility. Tyco is required to address the corrective action for any on-site contaminated soil and groundwater as well as addressing on-site contamination that may migrate off the Former Raychem/Tyco Facility.

The Menlo Park West Campus is the site designation name for the East side of the Former Raychem/Tyco Facility that was purchased in 2011. A Remedial Action Plan for the West Campus was implemented in 2012. Land use restrictions, groundwater monitoring, and any other post-Certification activities for the West Campus are available on the Tyco Electronics Envirostor page (site code 520017). JP 09/07/2018

Status:	CERTIFIED / OPERATION & MAINTENANCE - LAND USE RESTRICTIONS

CYANIDE (FREE), METALS, POLYCHLORINATED BIPHENYLS (PCBS), UNCATEGORIZED

Site History:

This site is an active high technology plastics and electric conductive and insulation manufacturer. A chemical plant and a R&D pilot plant (now dismantled) were located at the site. Polychlorinated biphenyls (PCBs) were used as a heat transfer medium, and industrial solvents have been found in the soils and groundwater. The site is a RCRA facility undergoing closure activities. The company wishes to convert to generator status. From 1974 to 1978, wash water and solvents from a paint booth were dumped in an unlined ditch in the central portion of the site. Samples from the ditch showed soils were contaminated with levels of cadmium above the Total Threshold Limit Concentration (TTL). Possible receptors of exposure include the site's employees, and residents of the adjacent Belle Haven Neighborhood of Menlo Park coming into direct contact with contaminated soils; users of the local groundwater from the site; and contaminants from the site leaching into the Ravenswood Slough and effecting the wildlife of the surrounding wetlands. Several investigations have been conducted by Raychem, but these investigations focused on small areas and did not address the site as a whole or the local groundwater issues.

Title Link:						
Area Name:						
Area Link:						
Sub Area:						
Sub Area Link:						
Document Type:		Preliminary Endangerment Assessment Report				
Date Completed:		6/20/1991				
Comments:		Raychem Corporation submitted a PEA to the Dept on 5/17/91. Results of the PEA indicate PCB in soil above extremely hazardous tlc. Contaminated GW under site. A residential neighborhood and a school are located less than 200' to the South of site. A tidal slough and sensitive wetland are adjacent to the north boundary of the site. High-tech chemical, plastics and materials manufacturer operated at site since 1965. PEA submitted in May 1991 indicates that nickel and cadmium may be present in soils above their respective TTLC and/or STLC. Elevated levels of solvents found in GW under the site. PCB found in soils at levels above the extremely hazardous waste TTLC. PCB has also migrated off-site via surface runoff. Draft ISE determination and RAO sent to TLO for review on June 11, 1991.

CHLORDANE, DDE, DDT, DIELDRIN

Site History:

The project consists of 1.5 acres of vacant land bordered by residential properties. There are currently no structures on the Site. Organochlorine pesticides have been detected in the soil and they are suspected to be from historic agricultural use. The Site was used for agriculture and commercial greenhouse operations occurred on the Site from the 1950s to late 1980s or early 1990s. The land is currently owned by the Jacobsen Family Trust. DTSC entered into a Voluntary Oversight Agreement with the Jacobsen Family Trust on October 3, 2018 to review a Preliminary Endangerment Assessment Report. The Report summarized the removal of impacted soil from the Site done prior to entry into the Voluntary Oversight Agreement (and thus not done under DTSC oversight). The Report also discussed the results of the confirmation sampling conducted after the soil removal which showed that the Site had been remediated to levels safe for unrestricted use. DTSC has issued a No Further Action Letter for this Site.

Status: NO FURTHER ACTION
A2 Program Type: VOLUNTARY CLEANUP
CalEnviroScreen Score: 86-90%

Sub Area Link:
Document Type: Standard Voluntary Agreement
Date Completed: 10/3/2018
Comments: Voluntary Oversight Agreement between DTSC and the Richard and Susan Jacobsen Family Trust. DTSC will review the submitted data to determine if remediation conducted without DTSC oversight fully addressed hazardous substances on the Site that may pose a significant risk to human health and the environment.

Title: Preliminary Endangerment Assessment Report
Title Link: http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=60002708&doc_id=60450692
Area Name:
Area Link:
Sub Area:
Sub Area Link:
Document Type: Preliminary Endangerment Assessment Report
Date Completed: 10/23/2018
Comments: Organochlorine pesticides from past agricultural use were detected in shallow soil samples collected at the Site. Arsenic, dieldrin, DDE/DDT, chlordane, and beta-BHC were the only contaminants detected at concentrations above the applicable residential DTSC screening levels and the USEPA Regional Screening Levels. Arsenic concentrations were consistent with naturally-occurring background concentrations in Santa Clara County. Soil with contaminant concentrations above residential screening levels were excavated from the Site. This work was conducted without DTSC oversight and summarized in the report reviewed by DTSC. DTSC concludes that no further action is required at the Site.

Waste Code Details

Hazardous Waste Code: 121
Waste Code Description: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

Hazardous Waste Code: 122
Waste Code Description: Alkaline solution without metals (pH > 12.5)

Hazardous Waste Code: 141
Waste Code Description: Off-specification, aged, or surplus inorganics

Hazardous Waste Code: 181
Waste Code Description: Other inorganic solid waste

Hazardous Waste Code: 212
Waste Code Description: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

Hazardous Waste Code: 213
Waste Code Description: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

Hazardous Waste Code: 214
Waste Code Description: Unspecified solvent mixture

Hazardous Waste Code: 252
Waste Code Description: Other still bottom waste

Hazardous Waste Code: 331
Waste Code Description: Off-specification, aged, or surplus organics

Hazardous Waste Code: 341
Waste Code Description: Organic liquids (nonsolvents) with halogens

Hazardous Waste Code: 352
Waste Code Description: Other organic solids

Hazardous Waste Code: 461
Waste Code Description: Degreasing sludge

Hazardous Waste Code: 551
Waste Code Description: Laboratory waste chemicals

Hazardous Waste Code: 591
Waste Code Description: Baghouse waste

Hazardous Waste Code: 724
Waste Code Description: Liquids with lead > 500 mg/l

Hazardous Waste Code: 725
Waste Code Description: Liquids with mercury > 20 mg/l

Hazardous Waste Code: 791
Waste Code Description: Liquids with pH < 2

Hazardous Waste Code: 792

Hazardous Waste Code: D022
Waste Code Description: CHLOROFORM

Hazardous Waste Code: D035
Waste Code Description: METHYL ETHYL KETONE

Hazardous Waste Code: D039
Waste Code Description: TETRACHLOROETHYLENE

Hazardous Waste Code: F002
Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF

<i>Map Key</i>	<i>Number of Records</i>	<i>Direction</i>	<i>Distance (mi/ft)</i>	<i>Elev/Diff (ft)</i>	<i>Site</i>	<i>DB</i>
					THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.	
Hazardous Waste Code:					F003	
Waste Code Description:					THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.	
Hazardous Waste Code:					F005	
Waste Code Description:					THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.	
Hazardous Waste Code:					P098	
Waste Code Description:					POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)	
Hazardous Waste Code:					U002	
Waste Code Description:					2-PROPANONE (I) (OR) ACETONE (I)	
Hazardous Waste Code:					U044	
Waste Code Description:					CHLOROFORM (OR) METHANE, TRICHLORO-	
Hazardous Waste Code:					U057	
Waste Code Description:					CYCLOHEXANONE (I)	
Hazardous Waste Code:					U069	
Waste Code Description:					1,2-BENZENEDICARBOXYLIC ACID, DIBUTYL ESTER (OR) DIBUTYL PHTHALATE	
Hazardous Waste Code:					U147	
Waste Code Description:					2,5-FURANDIONE (OR) MALEIC ANHYDRIDE

Waste Code Description:		THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.				
Hazardous Waste Code:		F003				
Waste Code Description:		THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.				
Hazardous Waste Code:		F005				
Waste Code Description:		THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.				

Hazardous Waste Handler Details

Sequence No: 4
Receive Date: 20160225
Handler Name: TYCO ELECTRONICS CORPORATION
Federal Waste Generator Code: 1
Generator Code Description: Large Quantity Generator
Source Type: Annual/Biennial Report update with Notification

Waste Code Details

Hazardous Waste Code: 122
Waste Code Description: Alkaline solution without metals (pH > 12.5)

Hazardous Waste Code: 181
Waste Code Description: Other inorganic solid waste

Hazardous Waste Code: 212
Waste Code Description: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

Hazardous Waste Code: 214
Waste Code Description: Unspecified solvent mixture

Hazardous Waste Code: 352
Waste Code Description: Other organic solids

Hazardous Waste Code: 551
Waste Code Description: Laboratory waste chemicals

Hazardous Waste Code: 591
Waste Code Description: Baghouse waste

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

Formerly Utilized Sites Remedial Action Program:

DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

National Priority List:

NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Feb 23, 2021

National Priority List - Proposed:

PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Feb 23, 2021

Deleted NPL:

DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Feb 23, 2021

SEMS List 8R Active Site Inventory:

SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Jan 28, 2021

Inventory of Open Dumps, June 1985:

ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites:

[SEMS ARCHIVE](#)

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: Jan 28, 2021

Comprehensive Environmental Response, Compensation and Liability Information System -

[CERCLIS](#)

CERCLIS:

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands:

[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned:

[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:

[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:

[RCRA CORRACTS](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 22, 2021

RCRA non-CORRACTS TSD Facilities:

[RCRA TSD](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Jan 22, 2021

RCRA Generator List:

[RCRA LQG](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 22, 2021

RCRA Small Quantity Generators List:

[RCRA SQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 22, 2021

RCRA Very Small Quantity Generators List:

[RCRA VSQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 22, 2021

RCRA Non-Generators:

[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 22, 2021

Federal Engineering Controls-ECs:

[FED ENG](#)

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Feb 23, 2021

Federal Institutional Controls- ICs:

[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Feb 23, 2021

Land Use Control Information System:

[LUCIS](#)

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Emergency Response Notification System:

[ERNS 1982 TO 1986](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

[ERNS 1987 TO 1989](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

[ERNS](#)

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Nov 9, 2020

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

[FED BROWNFIELDS](#)

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 6, 2021

FEMA Underground Storage Tank Listing:

[FEMA UST](#)

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan:

[FRP](#)

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 2, 2020

Historical Gas Stations:

[HIST GAS STATIONS](#)

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries:

[REFN](#)

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Jul 10, 2020

Petroleum Product and Crude Oil Rail Terminals:

[BULK TERMINAL](#)

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Apr 28, 2020

LIEN on Property:

[SEMS LIEN](#)

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: Mar 23, 2021

Superfund Decision Documents:

[SUPERFUND ROD](#)

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: Feb 23, 2021

State

State Response Sites:

[RESPONSE](#)

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Jan 13, 2021

EnviroStor Database:

[ENVIROSTOR](#)

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Jan 13, 2021

Delisted State Response Sites:

[DELISTED ENVS](#)

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Jan 13, 2021

Solid Waste Information System (SWIS):

[SWF/LF](#)

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: Feb 8, 2021

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels:

[SWRCB SWF](#)

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

EnviroStor Hazardous Waste Facilities:

[HWP](#)

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Jan 13, 2021

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report:

[SWAT](#)

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Construction and Demolition Debris Recyclers:

[C&D DEBRIS RECY](#)

This listing of Construction and Demolition Debris Recyclers is maintained by the California Intergrated Waste Management Board-common C&D materials include lumber, drywall, metals, masonry (brick, concrete, etc.), carpet, plastic, pipe, rocks, dirt, paper, cardboard, or green waste related to land development.

Government Publication Date: Jun 20, 2018

Recycling Centers:

[RECYCLING](#)

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Nov 2, 2020

Listing of Certified Processors:

[PROCESSORS](#)

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 27, 2020

Listing of Certified Dropoff, Collection, and Community Service Programs:

[CONTAINER RECY](#)

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Dec 16, 2020

Land Disposal Sites:

[LDS](#)

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Mar 9, 2021

Leaking Underground Fuel Tank Reports:

[LUST](#)

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Mar 9, 2021

Delisted Leaking Storage Tanks:

[DELISTED LST](#)

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Mar 9, 2021

Permitted Underground Storage Tank (UST) in GeoTracker:

[UST](#)

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Mar 23, 2021

Proposed Closure of Underground Storage Tank Cases:

[UST CLOSURE](#)

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: Feb 2, 2021

Historical Hazardous Substance Storage Information Database:

[HHSS](#)

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Statewide Environmental Evaluation and Planning System:

[UST SWEEPS](#)

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

Aboveground Storage Tanks:

[AST](#)

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

SWRCB Historical Aboveground Storage Tanks:

[AST SWRCB](#)

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

Oil and Gas Facility Tanks:

[TANK OIL GAS](#)

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Apr 14, 2021

Delisted Storage Tanks:

[DELISTED TNK](#)

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Apr 14, 2021

California Environmental Reporting System (CERS) Tanks:

[CERS TANK](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Feb 9, 2021

Delisted California Environmental Reporting System (CERS) Tanks:

[DELISTED CTNK](#)

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Feb 9, 2021

Historical Hazardous Substance Storage Container Information - Facility Summary:

[HIST TANK](#)

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in th 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions:

[LUR](#)

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Jan 13, 2021

CALSITES Database:

[CALSITES](#)

This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

Government Publication Date: May 1, 2004

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions:

[HLUR](#)

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Feb 18, 2021

Deed Restrictions and Land Use Restrictions:

[DEED](#)

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Mar 9, 2021

Voluntary Cleanup Program:

[VCP](#)

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Jan 13, 2021

GeoTracker Cleanup Program Sites:

[CLEANUP SITES](#)

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Mar 9, 2021

Delisted County Records:

[DELISTED COUNTY](#)

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands:
LUSTs on Tribal/Indian Lands in Region 9, which includes California.
Government Publication Date: Apr 8, 2020

INDIAN LUST

Underground Storage Tanks (USTs) on Indian Lands:
USTs on Tribal/Indian Lands in Region 9, which includes California.
Government Publication Date: Apr 8, 2020

INDIAN UST

Delisted Tribal Leaking Storage Tanks:
Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.
Government Publication Date: Apr 14, 2020

DELISTED ILST

Delisted Tribal Underground Storage Tanks:
Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.
Government Publication Date: Apr 14, 2020

DELISTED IUST

County

San Mateo County - LOP List:
A list of Leaking Underground Storage Tank (LUST) facilities in San Mateo County. This list is made available by San Mateo County Environmental Health Services Division.
Government Publication Date: Dec 14, 2020

SANMATEO LOP

San Mateo County - CUPA Facilities List:
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Mateo County. This list is made available by San Mateo County Environmental Health Department which has been designated as the CUPA for the County.
Government Publication Date: Feb 20, 2020

SANMATEO CUPA

Additional Environmental Record Sources

Federal

PFOA/PFOS Contaminated Sites:
List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).
Government Publication Date: Mar 1, 2021

PFAS NPL

Facility Registry Service/Facility Index:
The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).
Government Publication Date: Nov 2, 2020

FINDS/FRS

Toxics Release Inventory (TRI) Program:
The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U. S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

TRIS

Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Releases:

[PFAS TRI](#)

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Water Quality:

[PFAS WATER](#)

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

Hazardous Materials Information Reporting System:

[HMIRS](#)

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs:

[NCDL](#)

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Oct 5, 2020

Toxic Substances Control Act:

[TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA:

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

[FTTS INSP](#)

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

[PRP](#)

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Feb 23, 2021

State Coalition for Remediation of Drycleaners Listing:

SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

ICIS

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Mar 24, 2021

Drycleaner Facilities:

FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Feb 17, 2021

Delisted Drycleaner Facilities:

DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Feb 17, 2021

Formerly Used Defense Sites:

FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: Jan 28, 2020

Former Military Nike Missile Sites:

FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 1, 1984

PHMSA Pipeline Safety Flagged Incidents:

PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Jul 7, 2020

Material Licensing Tracking System (MLTS):

MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: Aug 5, 2020

Historic Material Licensing Tracking System (MLTS) sites:

HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Mines Master Index File:

[MINES](#)

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: Nov 3, 2020

Surface Mining Control and Reclamation Act Sites:

[SMCRA](#)

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Dec 18, 2020

Mineral Resource Data System:

[MRDS](#)

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2006

Uranium Mill Tailings Radiation Control Act Sites:

[URANIUM](#)

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

Government Publication Date: Mar 4, 2017

Alternative Fueling Stations:

[ALT FUELS](#)

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Jan 18, 2021

Registered Pesticide Establishments:

[SSTS](#)

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 31, 2020

Polychlorinated Biphenyl (PCB) Notifiers:

[PCB](#)

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 19, 2020

State

Dry Cleaning Facilities:

[DRYCLEANERS](#)

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Feb 22, 2021

Delisted Drycleaners:

[DELISTED DRYCLEANERS](#)

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Feb 22, 2021

Non-Toxic Dry Cleaning Incentive Program:

[DRYC GRANT](#)

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Feb 28, 2018

Per- and Polyfluoroalkyl Substances (PFAS):

[PFAS](#)

List of sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Mar 9, 2021

PFOA/PFOS Groundwater:

[PFAS GW](#)

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

Government Publication Date: Oct 22, 2020

Hazardous Waste and Substances Site List - Site Cleanup:

[HWSS CLEANUP](#)

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: Nov 10, 2020

List of Hazardous Waste Facilities Subject to Corrective Action:

[DTSC HWF](#)

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement:

[INSP COMP ENF](#)

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Oct 7, 2020

School Property Evaluation Program Sites:

[SCH](#)

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Jan 13, 2021

California Hazardous Material Incident Report System (CHMIRS):

[CHMIRS](#)

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 21, 2021

Historical California Hazardous Material Incident Report System (CHMIRS):

[HIST CHMIRS](#)

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Hazardous Waste Manifest Data:

[HAZNET](#)

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Oct 24, 2016

Historical Hazardous Waste Manifest Data:

[HIST MANIFEST](#)

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

DTSC Registered Hazardous Waste Transporters:

[HW TRANSPORT](#)

The California Department of Toxic Substances Control (DTSC) maintains this list of Registered Hazardous Waste Transporters.

Government Publication Date: Oct 19, 2020

Registered Waste Tire Haulers:

[WASTE TIRE](#)

This list of registered waste tire haulers is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Dec 16, 2020

California Medical Waste Management Program Facility List:

[MEDICAL WASTE](#)

This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.

Government Publication Date: Dec 31, 2020

Historical Cortese List:

[HIST CORTESE](#)

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders:

[CDO/CAO](#)

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Feb 16, 2012

California Environmental Reporting System (CERS) Hazardous Waste Sites:

[CERS HAZ](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Feb 9, 2021

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites:

[DELISTED HAZ](#)

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker:

[GEOTRACKER](#)

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Mar 9, 2021

Mines Listing:

[MINE](#)

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data. Please note: Mine location information is provided to assist experts in determining the location of mine operators in accordance with California Civil Code section 1103.4 and reflects information reported by mine operators in annual reports provided under Public Resources Code section 2207. While the Division of Mine Reclamation (DMR) attempts to populate MOL with accurate location information, the DMR cannot guarantee the accuracy of operator reported location information.

Government Publication Date: Jan 12, 2021

Recorded Environmental Cleanup Liens:

[LIEN](#)

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

Government Publication Date: Nov 16, 2020

Waste Discharge Requirements:

[WASTE DISCHG](#)

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Mar 9, 2021

Toxic Pollutant Emissions Facilities:

[EMISSIONS](#)

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2018

Clandestine Drug Lab Sites:

[CDL](#)

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/ clandestine drug laboratories.

Government Publication Date: Jan 19, 2021

Tribal

No Tribal additional environmental record sources available for this State.

County

San Mateo County Medical Waste Facility List:

[SANMATEO MED](#)

The San Mateo County Environmental Health Services Division maintains this list of medical waste facilities. The Medical Waste Program regulates the generation, disposal, and transportation of medical waste. Medical waste consists of sharps (needles, razor blades, pipette bits), bloody materials, bandages, and any other waste contaminated with body fluids. This listing only contains medical waste facilities operating in San Mateo County.

Government Publication Date: Sep 21, 2020

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

NOTES:

< denotes analyte not detected at or exceeding the reporting limit listed.

¹Analyzed by U.S. Environmental Protection Agency Method 8015.

²TPHmo is composed of long chain compounds (C24-C36+) having negligible solubility. Detections in water samples typically are petroleum HOPs, nonaqueous-phase liquid (NAPL or free product), and/or contaminated sediment.

³Analyzed by U.S. Environmental Protection Agency Method 8260B.

⁴Analyzed by U.S. Environmental Protection Agency Method 6010B.

⁵San Francisco Bay Regional Water Quality Control Board (RWQCB) Tier 1 Environmental Screening Levels (ESLs) for groundwater, dated 2019 (Rev. 2).

⁶San Francisco Bay RWQCB Groundwater Vapor Intrusion Human Health Risk Levels (Table GW-3), dated 2019 (Rev. 2).

B = analyte found in associated method blank

ESL = Environmental Screening Level

HOP = hydrocarbon oxidation products

J = result is an estimate

NE = not established

TPHd = total petroleum hydrocarbons (TPH) as diesel-range organics

TPHg = TPH as gasoline-range organics

TPHmo = TPH as motor oil-range organics

CASE NARRATIVE

All sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times, unless qualified or notated within the report. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

GLOSSARY OF TERMS

Guide to Reading and Understanding Your Laboratory Report

The information below is designed to better explain the various terms used in your report of analytical results from the Laboratory. This is not intended as a comprehensive explanation, and if you have additional questions please contact your project representative.

Results Disclaimer - Information that may be provided by the customer, and contained within this report, include Permit Limits, Project Name, Sample ID, Sample Matrix, Sample Preservation, Field Blanks, Field Spikes, Field Duplicates, On-Site Data, Sampling Collection Dates/Times, and Sampling Location. Results relate to the accuracy of this information provided, and as the samples are received.

Abbreviations and Definitions

MDL	Method Detection Limit.
RDL	Reported Detection Limit.
Rec.	Recovery.
RPD	Relative Percent Difference.
SDG	Sample Delivery Group.
(S)	Surrogate (Surrogate Standard) - Analytes added to every blank, sample, Laboratory Control Sample/Duplicate and Matrix Spike/Duplicate; used to evaluate analytical efficiency by measuring recovery. Surrogates are not expected to be detected in all environmental media.
U	Not detected at the Reporting Limit (or MDL where applicable).
Analyte	The name of the particular compound or analysis performed. Some Analyses and Methods will have multiple analytes reported.
Dilution	If the sample matrix contains an interfering material, the sample preparation volume or weight values differ from the standard, or if concentrations of analytes in the sample are higher than the highest limit of concentration that the laboratory can accurately report, the sample may be diluted for analysis. If a value different than 1 is used in this field, the result reported has already been corrected for this factor.
Limits	These are the target % recovery ranges or % difference value that the laboratory has historically determined as normal for the method and analyte being reported. Successful QC Sample analysis will target all analytes recovered or duplicated within these ranges.
Original Sample	The non-spiked sample in the prep batch used to determine the Relative Percent Difference (RPD) from a quality control sample. The Original Sample may not be included within the reported SDG.
Qualifier	This column provides a letter and/or number designation that corresponds to additional information concerning the result reported. If a Qualifier is present, a definition per Qualifier is provided within the Glossary and Definitions page and potentially a discussion of possible implications of the Qualifier in the Case Narrative if applicable.
Result	The actual analytical final result (corrected for any sample specific characteristics) reported for your sample. If there was no measurable result returned for a specific analyte, the result in this column may state "ND" (Not Detected) or "BDL" (Below Detectable Levels). The information in the results column should always be accompanied by either an MDL (Method Detection Limit) or RDL (Reporting Detection Limit) that defines the lowest value that the laboratory could detect or report for this analyte.
Uncertainty (Radiochemistry)	Confidence level of 2 sigma.
Case Narrative (Cn)	A brief discussion about the included sample results, including a discussion of any non-conformances to protocol observed either at sample receipt by the laboratory from the field or during the analytical process. If present, there will be a section in the Case Narrative to discuss the meaning of any data qualifiers used in the report.
Quality Control Summary (Qc)	This section of the report includes the results of the laboratory quality control analyses required by procedure or analytical methods to assist in evaluating the validity of the results reported for your samples. These analyses are not being performed on your samples typically, but on laboratory generated material.
Sample Chain of Custody (Sc)	This is the document created in the field when your samples were initially collected. This is used to verify the time and date of collection, the person collecting the samples, and the analyses that the laboratory is requested to perform. This chain of custody also documents all persons (excluding commercial shippers) that have had control or possession of the samples from the time of collection until delivery to the laboratory for analysis.
Sample Results (Sr)	This section of your report will provide the results of all testing performed on your samples. These results are provided by sample ID and are separated by the analyses performed on each sample. The header line of each analysis section for each sample will provide the name and method number for the analysis reported.
Sample Summary (Ss)	This section of the Analytical Report defines the specific analyses performed for each sample ID, including the dates and times of preparation and/or analysis.
Qualifier	Description
B	The same analyte is found in the associated blank.
J	The identification of the analyte is acceptable; the reported value is an estimate.
