Re: CITADEL Project No. 1485.1029.0
Phase I Environmental Site Assessment Report
320 Sheridan Drive
Menlo Park, California 94025

Dear Mr. Atlee:

Enclosed please find Citadel EHS's Phase I Environmental Site Assessment Report for the above-referenced location.

The Phase I Environmental Site Assessment Report was conducted for Alliant Strategic Development, in accordance with Citadel's Proposal 1485.1029.P, dated April 5, 2023, and a mutually agreed upon scope of work.

If after your review, you have any questions or require additional information, please do not hesitate to telephone me at the Citadel Office in Glendale at (818) 246-2707.

Sincerely,
CITADEL EHS

Mark Drollinger, M.Eng., CSP, CHMM
Principal, Engineering and Environmental Sciences

Citadel EHS (Citadel) was contracted by Alliant Strategic Development (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 320 Sheridan Drive, in the City of Menlo Park, San Mateo County, California; hereinafter referred to as the "Site."

Current Site Conditions

The Site consists of one vacant parcel with concrete floor slabs throughout the Site and a trash enclosure in the north portion of the Site. Access to the Site parking areas is near the west

boundary of the Site along Sheridan Drive. Sheridan Drive ends as an entrance to the Site. At the time of the Site reconnaissance, the Site was vacant and unoccupied.

No stationary equipment was observed at the Site. In general, the Site appeared to be moderately maintained. Citadel observed debris consisting of old carpet, tiles, an old basketball hoop, and rotting picnic tables throughout the Site. While the presence of debris is not expected to represent a significant environmental concern, the observed debris should be properly disposed of off-Site.

Site History

A review of historical sources showed that the Site was undeveloped as early as 1897 until at least 1953 with the development of two large structures as part of James E. Flood School. An additional structure in the south central portion of the Site appeared developed by 1958, and a small structure appeared developed in the southwest corner of the Site by 1991. All the Site structures appeared to have been demolished by 2020. The Site was generally occupied as a school from as early as 1953 until 2015.

The Site was occupied as James E. Flood School from 1969 to 2005; Redwood High School in 1978; Flood Park Alternative School and Union High School in 1981; Ravenswood City School from 1992 to 2000; Rivercom Web Services in 2005; and Center for a New Generation in 2010.

Environmental Databases

The Site was identified on the HAZNET and the Hazardous Waste Tracking System (HWTS) databases. HWTS is the Department of Toxic Substances Control's (DTSC) data repository for hazardous waste identification and manifest information. The Site was identified on these databases for generating other organic solids in 2004. The Site was also identified on the San Mateo County Business Inventory (BI), which is a list that includes Hazardous Materials Business Plans, hazardous waste generators, and underground storage tanks (USTs). The Site is listed on the BI list as an inactive facility under the stormwater program. Based on a lack of reported spills, leaks, or violations, this listing is not considered to represent a significant environmental concern.

Citadel reviewed information provided by Environmental Data Resources (EDR) regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to EDR, historical releases of petroleum products from a leaking underground storage tank (LUST) occurred within 0.25-mile and upgradient of the Site. Flood Park (SMCO), located at 215 Bay Road, is listed as a LUST site. According to EDR, the property adjoins the Site to the south and the gasoline leak was discovered in December 1987. The case was completed and closed by the San Mateo County Division of Environmental Health Services (DEHS) on September 10, 1997.

No properties were identified on the Historical Gas Station and Dry Cleaners databases as within 0.125-mile and upgradient, 365 feet and cross-gradient, or 100 feet and downgradient of the Site.

Environmental Databases

The DEHS Hazardous Materials Division (HMD) is the Certified Unified Program Agency (CUPA) for San Mateo County and is responsible for regulating facilities that: handle or store hazardous materials, are part of the California Accidental Release Prevention Program, generate or treat hazardous wastes, store at least 1,320 gallons of aboveground petroleum, and own or operate USTs. Citadel reviewed the Online Public Records System for DEH records. The Site was not identified in the database; however, Citadel submitted an environmental records request to the

DEHS. A permit to install one groundwater monitoring well for a geotechnical investigation to 40 feet below ground surface (bgs) in the southeast portion of the Site was issued in January 2021. A permit for the destruction of the groundwater monitoring well via pressure grouting was issued in April 2022. According to the Monitoring Well Log and Construction Diagram, groundwater was encountered approximately 18 to 19 feet bgs. Based on the permits provided, the previous presence of the groundwater monitoring well is not expected to represent a significant environmental concern.

RECOGNIZED ENVIRONMENTAL CONDITIONS

According to American Society for Testing and Materials (ASTM) Standard of Practice E1527-13, recognized environmental conditions (REC) fall under three specific categories when evaluating a site or properties within the site vicinity. These categories are defined below.

A recognized environmental condition, or REC, means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

A controlled recognized environmental condition, or CREC, is a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

An historical recognized environmental condition, or HREC, is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property (TP) caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Based on a review of historical and present records, and Site reconnaissance, Citadel believes that sufficient information was collected and evaluated for the Site to determine if a REC, HREC, CREC, or a de minimis condition exists. Based on our review, reported release incidents that would represent RECs in connection with the Site or a source of a release that would be likely to contribute to a VEC was not identified. No evidence for designating the Site as a REC, HREC, or CREC from reviews of historic documents and present Site conditions was found.

NON-ASTM SCOPE CONSIDERATIONS

The California Bureau of Mines and Geology and California Department of Public Health (CADPH) participated in the United States EPA's State Radon Survey, a Federal survey to measure levels of indoor radon in all states. Based on the results of this survey, CADPH predicted that approximately 0.5% of homes in Region 9 would have radon concentrations over the EPA action level of 4.0 picoCuries per liter (pCi/L).

The Federal EPA Radon Zone for San Mateo County is Zone 2, which indicates an average indoor concentration greater than or equal to 2.0 pCi/L of air and less than or equal to 4.0 pCi/L. In a survey, 101 tests were performed within the 94035 zip code for the presence of radon. Of these, 21 tests were found to contain radon in excess of 4.0 pCi/L. Site-specific radon values were not available and were not a part of this ASTM Phase I ESA.

A potable well was not observed on-Site, and the Site does not lie within a known or potential wetland. The northwest portion of the Site lies within a 500-year flood zone, per FEMA Flood Insurance Rate Map Number 06081C0306F.

1.0 INTRODUCTION

Citadel EHS (Citadel) was contracted by Alliant Strategic Development (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 320 Sheridan Drive, in the City of Menlo Park, San Mateo County, California; hereinafter referred to as the "Site."

1.1 PURPOSE

The purpose of the Phase I ESA was to review past and present land use practices and to evaluate the presence, or likely presence, of any hazardous substances or petroleum products that have been discharged into the property's structure, ground, groundwater, or surface water. This qualitative assessment was accomplished by review of current and readily available information regarding past and current land use for indications of the manufacture, generation, use, storage and/or disposal of hazardous substances at the Site. A Site visit was also conducted to observe existing Site conditions. This report provides the results of the Phase I ESA performed.

1.2 INVOLVED PARTIES

The involved party(s) in this study, to the best of our knowledge, is Alliant Strategic Development.

Citadel understands that this Phase I ESA is being requested in conjunction with due diligence activities by Alliant Strategic Development. Citadel recognizes that this report is to be used exclusively by Alliant Strategic Development and its successors, lenders, and assigns. It is a report upon which Alliant Strategic Development and its successors, lenders, and assigns, can rely.

This assessment and report were prepared on behalf of and for the exclusive use of Alliant Strategic Development, their lenders and assigns (Client) solely for its use and reliance, subject to the terms and conditions agreed upon between Citadel and the Client.

1.3 SCOPE OF SERVICES

This Phase I ESA was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-13 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature. The Phase I ESA also incorporates procedures as prescribed in the new ASTM Standard of Practice E1527-21.

The scope of services for this assessment consisted of the following:

- Performed a Site inspection to verify current Site conditions, and check for visible evidence of previously disposed and/or currently present hazardous waste, surface contamination, underground and above ground storage tanks (USTs/ASTs), suspect polychlorinated biphenyls (PCBs), and other potential environmental hazards.
- Conducted a visual survey of the adjacent properties and the immediate vicinity to determine if any nearby sites posed a significant environmental threat to the Site.
- Reviewed currently and readily available documents, including maps, aerial photographs, governmental databases of known hazardous waste sites and

underground tanks, other consultant reports (if any), fire insurance maps, and other accessible records.

- Reviewed results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.
- Consulted with appropriate governmental agencies having jurisdiction relative to past history of the property, complaints or incidents in the immediate area, and permits that may have been issued.
- Prepared a Phase I report, inclusive of our findings and recommendations, with applicable illustrations and documentation.

The scope of services outlined above is generally considered sufficient to properly assess the Site based on the data search, reasonably ascertainable documents, and Site inspection.

2.0 GENERAL SITE CHARACTERISTICS

2.1 LOCATION

The rectangular-shaped Site is located approximately 75 feet south-southwest of the U.S. Route 101, locally referred to as the Bayshore Freeway. The Site is bounded by Bayshore Freeway to the north; Van Buren Road and a multi-family residential property to the east; a park to the south; and Sheridan Drive and single-family residential properties to the west. The general Site vicinity is occupied by single and multi-family residential properties with municipal properties to the north and south.

According to the U.S. Geological Survey (USGS) Palo Alto Quadrangle (7.5 Minute Series), dated 2018, the Site is at an elevation of approximately 19 feet above mean sea level (AMSL) and appears to slope to the north-northeast. The Site is located at approximate coordinates of 37° 28' 36.78" North Latitude and 122° 10' 12.94" West Longitude.

A Site Location Map identified as Figure 1 is included in Appendix A.

2.2 SITE DESCRIPTION

According to the County of Los Angeles' Assessor's Parcel Maps, the Site is comprised of one parcel legally identified as Assessor's Parcel Number (APN) 055-303-110. The Site encompasses approximately 2.52 acres of land.

The Site consists of one vacant parcel with concrete floor slabs throughout the Site and a trash enclosure in the north portion of the Site. Access to the Site parking areas is near the west boundary of the Site along Sheridan Drive. Sheridan Drive ends as an entrance to the Site. At the time of the Site reconnaissance, the Site was vacant and unoccupied.

No stationary equipment was observed at the Site. In general, the Site appeared to be moderately maintained. Citadel observed debris consisting of old carpet, tiles, an old basketball hoop, and rotting picnic tables throughout the Site. While the presence of debris is not expected to represent a significant environmental concern, the observed debris should be properly disposed of off-Site.

A Site Plan is included as Figure 2 in Appendix A. Select photographs of the Site and vicinity is included as Appendix B.

2.3 ADJACENT PROPERTIES

The immediately surrounding properties of the Site consist of the following:

Direction from Site	Address – Tenant/Use
North	Bayshore Freeway, with a Pacific Gas and Electric Company (PG&E) substation and Menlo Park Community Center at 100 Terminal Avenue further north
East	260 Van Buren Road – LifeMoves Haven Family House, a homeless shelter
South	215 Bay Road – Flood Park, a county park
West	307 Hedge Road – Single-family residence 308 Sheridan Drive – Single-family residence 311 Sheridan Drive – Single-family residence

2.4 UTILITIES

Electrical and gas service are supplied to the Site by PG&E. General rubbish (non-hazardous) is removed from the Site on a regular basis by a contracted waste hauler. However, the Site is currently vacant.

3.0 ENVIRONMENTAL SETTING

3.1 PHYSICAL SITE CHARACTERISTICS

Based upon the North American Datum (NAD) of 1983, the Site is at an elevation of approximately 19 feet AMSL.

The Site is identified on the geologic map of Palo Alto and Mountain View quadrangles, California (Dibblee and Minch, 2007) as being Holocene aged surficial sediments (Qa.1). The surficial sediments are described as alluvial sand, fine-grained, silt, and gravel, where differentiated represents alluvial fan deposits at the base of slopes and upper fan areas. The United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) National Cooperative Soil Survey identifies the Site soils as Urban land-Orthents, cut and fill complex. The Urban Land soil is described as marine terraces and alluvial fans, and the Orthents soils are described as well drained.

USGS Topographic Map	Palo Alto Quadrangle
Groundwater Basin	Santa Clara Valley Groundwater Basin, San Mateo Plain Subbasin
Nearest Surface Water to Site	Don Edwards San Francisco Bay National Wildlife Refuge, approximately 0.75 mile north-northwest of the Site
Gradient Direction (Source)	North-northeast (topographic maps)
Estimated Depth to Groundwater (Source)	18 to 19 feet below ground surface (bgs) at the Site (Todd Groundwater, 2022)
Nearest Wetland to Site (Source)	Freshwater pond, approximately 0.46 mile north-northeast of the Site (National Wetlands Inventory)
Nearest 100 or 500-year Flood Zone	Northwest portion of the Site is located in the 500-year Flood Zone (Federal Emergency Management Agency)

4.0 SITE RECONNAISSANCE

Citadel representative Mr. Eric Theil conducted the Phase I ESA reconnaissance on April 12, 2023. Mr. Theil was unaccompanied during the Site reconnaissance, which consisted of an inspection of the Site and a perimeter survey of the surrounding properties. Ms. Shirley Lee served as the Project Manager and reviewed this Phase I ESA. Findings from the Site inspection, research and perimeter survey are presented below.

4.1 SITE RECONNAISSANCE FINDINGS

Yes	No	Observation
	X	Aboveground Storage Tanks (ASTs) and Underground Storage Tanks (USTs)
	X	Identified Hazardous Materials
	X	Polychlorinated Biphenyls (PCBs) – Electric or Mechanical Equipment Likely to Contain Fluids
	X	Radioactive Man-Made Materials
	X	Pits, Ponds, and Lagoons
	X	Septic Tanks and Cesspools
X		Wells, Cisterns, Sumps, and Drains
	X	Wastewater or Grease Interceptors
	X	Interior Stains or Corrosion
	X	Strong, Pungent, or Noxious Odors
	X	Pools of Liquid
	X	Stained Soil or Pavement
	X	Stressed Vegetation
X		Other

The above-identified observed items are further discussed below.

WELLS, CISTERNS, SUMPS, AND DRAINS

Several storm drains were observed in south portion of the Site. No hazardous substances or petroleum products were noted in the vicinity of the drains. Based on the use of the drains solely for water runoff, the presence of the drains is not expected to represent a significant environmental concern.

OTHER

Citadel observed debris consisting of old carpet, tiles, an old basketball hoop, and rotting picnic tables throughout the Site. While the presence of debris is not expected to represent a significant environmental concern, the observed debris should be properly disposed of off-Site.

4.2 NON-ASTM SERVICES

ASBESTOS CONTAINING MATERIALS

The EPA issued a final rule under Section 6 of Toxic Substances Control Act (TSCA) banning most asbestos-containing building materials (ACBMs) in 1989. The ban on ACBMs was vacated in 1991 allowing some building materials to continue to contain asbestos. The applicability of the EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP, 40 CFR Chapter 61, Subpart M) apply to the owner or operator of a facility where an inspection for the presence of asbestos-containing materials (ACM), including Category I (asbestos containing packings, gaskets, resilient floor coverings and asphalt roofing products), and Category II (all remaining types of non-friable asbestos containing material not included in Category I that when dry, cannot be crumbled, pulverized or reduced to powder by hand pressure), non-friable ACM must occur prior to the commencement of demolition or renovation activities.

Building materials, coatings, and/or finishes containing asbestos may be present in any structure regardless of the date of construction. In accordance with NESHAPS and local air pollution control district regulations, all suspect materials, finishes, and coatings that will be impacted by renovation or demolition regardless of the date of construction are required to be surveyed for the presence of asbestos by State-licensed asbestos consultants.

No structures were observed during the Site reconnaissance. A survey for asbestos-containing materials was not requested or conducted as part of this Phase I ESA.

LEAD-BASED/LEAD-CONTAINING PAINTS

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has greater than or equal to one milligram per square centimeter (mg/cm^2) (5,000 microgram per gram ($\mu\text{g}/\text{g}$) or 5,000 parts per million (ppm)) of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from $0.5 \text{ mg}/\text{cm}^2$ to $2.0 \text{ mg}/\text{cm}^2$. In 2009, the US Consumer Product Safety Commission (16 Code of Federal Regulations CFR 1303) banned paint containing more than 0.009% (90 ppm) lead for residential use. Buildings built before 1978 are much more likely to have LBP; however, all commercial structures regardless of the date of construction likely contain lead-based or lead-containing glazings, varnishes, stains, coatings, paints, and primers. Such materials that will be impacted by renovation, repair, or demolition should be tested beforehand and the results disclosed to trades or staff that will be doing such work. All associated waste streams should be accurately characterized for proper disposal requirements.

No structures were observed during the Site reconnaissance. A survey for lead containing materials was not requested or conducted as part of this Phase I ESA.

POLYCHLORINATED BIPHENYLS

Polychlorinated biphenyls (PCBs) were an ingredient added to a variety of building materials during manufacture, most notably, but not limited to, caulking, putty, and glazing, particularly around windows, door frames, and building joints. Building materials containing PCBs were used in many buildings in the 1950s through the 1970s, and potentially before the 1950s. There are significant regulations regarding the removal of these materials during demolition and/or renovation, both from an environmental protection standpoint as well as an occupational health and safety standpoint. In addition, under the Toxic Substances Control Act (TSCA), building materials that contain PCBs at or above 50 ppm are considered an "unauthorized use"

of PCBs, and removal can be compelled under TSCA. The presence of PCBs may have the potential to impact a property's future land use. Based on the construction date for the Site building, building materials containing PCBs may have been used in the construction of the Site building.

No structures were observed during the Site reconnaissance. A survey for PCBs is beyond the required scope of ASTM E1527-13 and was not specifically requested or conducted as part of this Phase I ESA.

DRINKING WATER

The Site is currently not supplied with drinking water. An assessment of lead in drinking water was not requested or conducted as part of this Phase I ESA.

RADON

The California Bureau of Mines and Geology and California Department of Public Health (CADPH) participated in the United States EPA's State Radon Survey, a Federal survey to measure levels of indoor radon in all states. Based on the results of this survey, CADPH predicted that approximately 0.5% of homes in Region 9 would have radon concentrations over the EPA action level of 4.0 picoCuries per liter (pCi/L).

The Federal EPA Radon Zone for San Mateo County is Zone 2, which indicates an average indoor concentration greater than or equal to 2.0 pCi/L of air and less than or equal to 4.0 pCi/L. In a survey, 101 tests were performed within the 94035 zip code for the presence of radon. Of these, 21 tests were found to contain radon in excess of 4.0 pCi/L. Site-specific radon values were not available and were not a part of this ASTM Phase I ESA.

METHANE

The Site is not located within a known or designated methane zone.

5.0 SITE HISTORY

The purpose of the records review is to obtain and review reasonably ascertainable/standard sources that will help identify recognized environmental conditions in connection with the property. Reasonably ascertainable records from standard sources is (1) information that is publicly available, (2) information that is obtainable from its source within reasonable time and cost constraints, and (3) information that is practically reviewable.

Reasonable time and cost means that the information will be provided by the source within 20 calendar days of receiving a written, telephone, or in-person request at no more than a nominal cost intended to cover the source's cost of retrieving and duplicating the information. Information that can only be reviewed by a visit to the source is reasonably ascertainable if the visit is permitted by the source within 20 days of request.

To investigate the history of the Site, Citadel reviewed select historic aerial photographs, building permits, city directories, and Sanborn Fire Insurance Maps provided by Environmental Data Resources Inc. (EDR). In addition, Citadel reviewed client-supplied information, and oil and gas maps, and Citadel interviewed selected individuals regarding historic Site use. Citadel's reviews of these reports and interviews are discussed below.

5.1 HISTORICAL AERIAL PHOTOGRAPHS

Historical aerial photographs of the Site and vicinity were obtained from EDR to ascertain historical land uses and to identify any evidence of hazardous material generation or storage. Below are brief descriptions of observations made from the aerial photographs of the Site and vicinity.

Dates(s)	Site Description	Surrounding Area Descriptions
1943	Undeveloped land	North: Bayshore Freeway appears developed as a highway East: Undeveloped land South: Undeveloped land West: Undeveloped land
1948	Relatively unchanged	North: Relatively unchanged East: Single-family and multi-family residences appear developed South: A baseball field and parking lot appear developed West: Sheridan Drive and single-family residences appear developed
1950	Relatively unchanged	North: Relatively unchanged East: Relatively unchanged South: Relatively unchanged West: Additional single-family residences appear developed
1958, 1963, 1968, 1974, 1982	Three large structures appear developed in the south-center and southeast portions of the Site	North: Bayshore Freeway appears to have been expanded East: Relatively unchanged South: Relatively unchanged West: Relatively unchanged
1991	A small structure appears developed in the southwest corner of the Site	North: Relatively unchanged East: Relatively unchanged South: Relatively unchanged West: Relatively unchanged
1998	A small structure appears developed north of the previously identified structures in the southeast portion of the Site	North: Relatively unchanged East: Relatively unchanged South: Relatively unchanged West: Relatively unchanged
2005, 2009, 2012	Relatively unchanged	North: Relatively unchanged East: Van Buren Road appears developed; the previously identified single-family and multi-family residences appear to have been replaced with the current multi-family residential structure South: Relatively unchanged West: Relatively unchanged
2020	The previously identified structures appear to have been demolished	North: Relatively unchanged East: Relatively unchanged South: Relatively unchanged West: Relatively unchanged

Copies of the Aerial Photographs provided by EDR can be found in Appendix C.

5.2 HISTORIC BUILDING PERMITS

EDR provides a listing of building permits for the Site and adjoining properties, if available. In addition, Citadel searched the County of Santa Mateo Planning and Building Department's All of California in One County database and City of Menlo Park Permit and Record Web Portal for the Site. Citadel also reviewed the Department of General Service's (DGS) Division of the State Architect (DSA) Online Project Status eTracker for the Site. No building permits were available for this address.

A copy of the EDR Building Permit Report is included as Appendix D.

5.3 HISTORICAL FIRE INSURANCE MAPS

Citadel requested that EDR review its collection of Sanborn Fire Insurance Maps for potential coverage of the Site and vicinity. Sanborn Map coverage was not available for the Site.

A copy of the EDR Sanborn Map Report is included as Appendix E.

5.4 CITY PARCEL PROFILE REPORT

A parcel profile report was not available for the Site.

5.5 HISTORICAL CITY DIRECTORIES

City directories were researched by EDR in order to identify previous Site tenants and/or neighboring properties with a potential for hazardous materials generation and/or storage. EDR researched city directory listings from 1957 through 2020 (non-inclusive) and provided their search results to Citadel for review. The following table summarizes information provided by the city directory search.

Dates(s)	Occupant Listed
320 SHERIDAN DRIVE – CURRENT SITE ADDRESS	
1957, 1963	Not listed
1969, 1973	Flood James School
1978	Redwood High School
1981	Flood Park Alternative; Union High School
1986	Not listed
1992	Ravenswood SC Flood
1995	James Flood Elementary School
2000	David A Dyer; Ravenswood City School District
2005	James Flood Magnet School; Rivercom Web Services
2010	Center for a New Generation
2014, 2017, 2020	Not listed

The following table summarizes information for the adjoining/adjacent properties provided by the city directory search.

Dates(s)	Occupant Listed
260 VAN BUREN ROAD – ADJOINING PROPERTY EAST OF THE SITE	
1978	Belle Haven Motel
1981	Belle Haven Motel; Thomas A Bolik

Dates(s)	Occupant Listed

5.6 CLIENT-SUPPLIED ENVIRONMENTAL INFORMATION

No prior reports or relevant documentation was provided to Citadel. No reports are included in Appendix G.

5.7 HISTORICAL TOPOGRAPHIC MAPS

Historical topographic maps were provided by EDR in order to identify natural features and changes in development over a long period of time. The topographic maps provides the user with a regional view of changes to the Site and vicinity that other historical databases such as aerial photographs may not provide. Below are brief descriptions of observations made from the topographic maps of the Site and vicinity.

Dates(s)	Site Description	Surrounding Area Descriptions
1897, 1899, 1902	Undeveloped land	North: Undeveloped land East: Undeveloped land South: Undeveloped land West: Undeveloped land
1943, 1947	Relatively unchanged	North: Bayshore Freeway is shown as Shore Boulevard with a railroad developed beyond East: Iris Lane and Del Norte Avenue appear developed further east South: Woodlands and Flood Park appears developed further south West: Relatively unchanged
1948	Relatively unchanged	North: Relatively unchanged East: Several small structures, likely single-family and multi-family residences, appear developed South: A small structure, likely an office, appears developed further south West: Hedge Road and several small structures, likely single-family residences, appear developed
1953	Two large structures appear developed as a part of James E. Flood School	North: Shore Boulevard is shown as Bayshore Highway; shading is indicative of urban development East: A large structure, likely a multi-family residence, appears developed; shading is indicative of urban development further east South: A channel appears developed further south West: Shading is indicative of urban development

Dates(s)	Site Description	Surrounding Area Descriptions
1961	An additional large structure appears developed west of the previously identified structures	North: Relatively unchanged East: The previously identified structure no longer appears developed South: Relatively unchanged West: Relatively unchanged
1968, 1973	Relatively unchanged	North: Relatively unchanged East: Relatively unchanged South: A road appears developed West: Relatively unchanged
1994, 1999	A small structure appears developed in the southwest portion of the Site	North: Relatively unchanged East: Relatively unchanged South: Relatively unchanged West: Relatively unchanged
2012, 2015	Structures not depicted on these maps	North: Structures not depicted on these maps East: Structures not depicted on these maps South: The previously identified road no longer appears developed; structures not depicted on these maps West: Sheridan Drive appears developed; structures not depicted on these maps
2018	The Site no longer appears developed with a school	Structures not depicted on this map

Copies of the historical topographic maps provided by EDR are included as Appendix H.

5.8 HISTORIC OIL AND GAS MAPS

Citadel reviewed information available on-line through the California Department of Conservation's website. The Geological Energy Management Division (CalGEM) Online Mapping System (COMS) shows that there are no oil wells within a one-mile radius of the Site.

5.9 INTERVIEWS

No interviews were conducted during the Site reconnaissance. Citadel submitted a User Questionnaire to Alliant Strategic Development. The Client was not aware of any historic or current environmental concerns or hazards at the Site. The completed User Questionnaire can be found in Appendix I.

5.10 ENVIRONMENTAL LIEN

Citadel contracted with EDR to perform an Environmental Lien Search for the Site. The Environmental Lien Search report reviewed did not identify any current environmental liens or other activity and use limitations (AUL) for the Site. No deeds from 1980 to present were included in the report. The current owner of the Site is Ravenswood Elementary School District.

A copy of the environmental lien and AUL search can be found in Appendix J.

5.11 SUMMARY OF SITE HISTORY

A review of historical sources showed that the Site was undeveloped as early as 1897 until at least 1953 with the development of two large structures as part of James E. Flood School. An

additional structure in the south central portion of the Site appeared developed by 1958, and a small structure appeared developed in the southwest corner of the Site by 1991. All the Site structures appeared to have been demolished by 2020. The Site was generally occupied as a school from as early as 1953 until 2015.

The Site was occupied as James E. Flood School from 1969 to 2005; Redwood High School in 1978; Flood Park Alternative School and Union High School in 1981; Ravenswood City School from 1992 to 2000; Rivercom Web Services in 2005; and Center for a New Generation in 2010.

Properties in the vicinity appeared undeveloped as early as 1897. Bayshore Freeway appeared developed by 1943; however, Bayshore Freeway was originally identified as Shore Boulevard until the name change by 1953. The adjoining property east of the Site appeared developed with several single-family and multi-family residences by 1948. The adjacent property further north of the Site appeared developed with a substation by 1958 and a park by 1963. The adjoining property east of the Site was occupied as Belle Haven Motel from 1978 to 1981; Haven Family house with various residential tenants from 1992 to 2010; Invision Shelter Network from 2014 to 2017; and various residential tenants in 2020. The adjoining property south of the Site appeared developed as Flood Park by 1943 and with a parking lot and baseball field by 1948. The adjoining property south of the Site was occupied as Flood Park from 1943 to at least 2020 and by San Mateo County Parks & Recreation from 1986 to 2020. The adjoining properties west of the Site appeared developed with Sheridan Drive and single-family residences by 1948. The adjoining properties west of the Site has been generally occupied by residential tenants.

6.0 REGULATORY AGENCY REVIEW

6.1 DATABASE REVIEW

As part of the Phase I ESA, Citadel utilized EDR of Milford, Connecticut, as an information source for regulatory agency database records.

The following summary of the database information is divided into five columns. The first column identifies the environmental database researched; the second column indicates the distance from the Site that was used for the research; the third column indicates if the Site was identified in the specified database; the fourth column lists the number of listings identified on the database within the specified distance of the Site; and the fifth column indicates if the sites identified are potential environmental concerns to the Site.

Although locations of the orphan sites are frequently unknown, Citadel attempts to evaluate the potential adverse environmental impact that these facilities may have on the Site. This evaluation consists of reviewing street names in an effort to learn whether the street on which the Site is located lies within the search distance of the subject property, a drive-by view of surrounding properties during the Site visit, and evaluating the Site type and information provided by government agencies. The orphan sites included in the following table are those Citadel identified as potentially located within the identified search distance.

Database	Radius	Site Identified	No. of Listings Identified	Potential Environmental Concern to the Site
National Priorities List	1 mile	No	0	
RCRA Corrective Action Treatment/Storage/Disposal (TSD) Facilities (CORRACTS)	1 mile	No	1	No

Database	Radius	Site Identified	No. of Listings Identified	Potential Environmental Concern to the Site
Delisted National Priorities List	1 mile	No	0	
CERCLIS Sites	½ mile	No	1	No
CERCLIS No Further Remedial Action Planned (NFRAP) Sites	½ mile	No	1	No
RCRA Non-Corrective Action TSD Facilities	½ mile	No	1	No
State/Tribal Voluntary Cleanup Sites	½ mile	No	1	No
State/Tribal Leaking Registered Storage Tank Sites	½ mile	No	15	
State/Tribal Brownfield Sites/CERCLIS Equivalent	1 mile	No	2	No
Historic CORTESE List	½ mile	No	7	No
State/Tribal Solid Waste Landfill Sites/Facilities	½ mile	No	0	
Federal/State/Tribal Engineering Controls Registries	½ mile	No	0	
Federal/State/Tribal Institutional Controls Registries	½ mile	No	1	No
RCRA Large Quantity Generators	¼ mile	No	0	
RCRA Small Quantity Generators	¼ mile	No	1	No
RCRA Non Generators	¼ mile	No	9	No
State/Tribal Registered Storage Tank Sites	¼ mile	No	0	
HIST UST	¼ mile	No	3	No
CA FID UST	¼ mile	No	1	No
SWEEPS UST	¼ mile	No	1	No
Facility Index System (FINDS)	Site	No	0	
HAZNET	Site	Yes	1	No, see discussion below
Orphan	N/A	No	3	No

A brief discussion of select facilities and their database listings are included following the table. The full report provided by EDR and reviewed by Citadel can be found in Appendix K.

Site Name	RWCSD-James Flood Magnet School; Ravenswood City School District/James Flood Elementary; EPA Academy Elementary-Stanford
Database(s)	HWTS, HAZNET, SAN MATEO COUNTY BI
Address	320 Sheridan Drive
Distance/Direction	Target Property
Comments	The Site was identified on the HAZNET and the Hazardous Waste Tracking System (HWTS) databases. HWTS is the Department of Toxic Substances Control's (DTSC) data repository for hazardous waste identification and manifest information. The

	Site was identified on these databases for generating other organic solids in 2004. The Site was also identified on the San Mateo County Business Inventory (BI), which is a list that includes Hazardous Materials Business Plans, hazardous waste generators, and USTs. The Site is listed on the BI list as an inactive facility under the stormwater program. Based on a lack of reported spills, leaks, or violations, this listing is not considered to represent a significant environmental concern.
--	--

Site Name	Flood Park (SMCO)
Database(s)	LUST, HIST UST, CORTESE, CERS
Address	215 Bay Road
Distance/Direction	0.21 mile west-southwest of the Site
Comments	The adjoining property south of the Site was identified on the leaking underground storage tank (LUST) and historical UST databases. According to the historical UST database, one 750-gallon gasoline UST and one diesel UST with unknown capacity were located at the Site. No violations were identified on the California Environmental Reporting System (CERS). This property and the LUST case is further discussed below in Sections 6.2 and 6.3.

Maps showing the location of these facilities and additional information are provided in the Government Records Report in Appendix K.

6.2 VAPOR ENCROACHMENT CONDITION

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property (TP) caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Tier 1 screening begins with the default area of concern (AOC) defined by the approximate minimum search distances adjusted as appropriate for local conditions, and then determining if known or suspected contaminated properties with contaminants of concern (COCs) exist within the established AOC. The default AOC is one third of a mile around the TP for COCs and one-tenth of a mile for petroleum hydrocarbon COCs. The AOC is measured from the TP boundary to a contaminated property with known or suspected COC contamination of soil or groundwater or both. The default AOC may be expanded or reduced by the environmental professional (adjusted AOC) using experience and professional judgment, based on factors like groundwater flow direction, subsurface characteristics, surficial features and man-made features.

If groundwater flow direction is known or can be inferred from the Phase I ESA investigation of the TP, the default AOC in the down-gradient direction may be reduced to the area within the critical distance of 100 feet. The AOC in the cross-gradient direction may also be reduced, depending upon the critical distance and the width of the COC-contaminated plume associated with a known or likely COC-contaminated property located in a cross-gradient direction from the TP. The critical distance is the lineal distance in any direction between the

nearest edge of the contaminated plume and the nearest TP boundary, and is equal to 100 feet for COCs or 30 feet for dissolved petroleum hydrocarbon COCs.

For a COC-contaminated property identified in Tier 1 located down-gradient from the TP, it is not necessary to have information on migrating groundwater contaminated plume dimensions as the critical distance is measured from the nearest TP boundary to the source of contamination at the off-site down-gradient property. In this case, the AOC may be reduced to the area within the critical distance.

For a contaminated property identified in Tier 1 located crossgradient from the TP, the AOC will be the area within the critical distance plus one half of a reasonable estimation of the contaminated plume width (at the point nearest the closest TP boundary) that might be associated with the nearby known or suspected COC-contaminated property (that is, the COC-contaminated property where the groundwater contamination originated). The environmental professional's judgment and experience can be used to estimate the width of the COC-contaminated plume that might be associated with the nearby known or suspected COC-contaminated property. If it is not possible to estimate the contaminated plume width, then the AOC cannot be reduced in the cross-gradient direction.

Citadel reviewed information provided by EDR regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to EDR, historical releases of petroleum products from a leaking underground storage tank (LUST) occurred within 0.25-mile and upgradient of the Site. Flood Park (SMCO), located at 215 Bay Road, is listed as a LUST site. According to EDR, the property adjoins the Site to the south and the gasoline leak was discovered in December 1987. The case was completed and closed by the San Mateo County Division of Environmental Health Services (DEHS) on September 10, 1997. The LUST case is further discussed below in Section 6.3.

No properties were identified on the Historical Gas Station and Dry Cleaners databases as within 0.125-mile and upgradient, 365 feet and cross-gradient, or 100 feet and downgradient of the Site.

A copy of the vapor encroachment screen provided by EDR is included as Appendix L.

6.3 REGULATORY AGENCIES

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous materials use, storage, and/or unauthorized releases that may have impacted the Site.

BUILDING DEPARTMENT

Citadel contacted the County of Santa Mateo Planning and Building Department for information regarding the Site in order to identify historical tenants and property use. Please see Section 5.2 for further discussion.

DIVISION OF ENVIRONMENTAL HEALTH SERVICES

The DEHS Hazardous Materials Division (HMD) is the Certified Unified Program Agency (CUPA) for San Mateo County and is responsible for regulating facilities that: handle or store hazardous materials, are part of the California Accidental Release Prevention Program, generate or treat

hazardous wastes, store at least 1,320 gallons of aboveground petroleum, and own or operate USTs. Citadel reviewed the Online Public Records System for DEHS records. The Site was not identified in the database; however, Citadel submitted an environmental records request to the DEHS. A permit to install one groundwater monitoring well for a geotechnical investigation to 40 feet bgs in the southeast portion of the Site was issued in January 2021. A permit for the destruction of the groundwater monitoring well via pressure grouting was issued in April 2022. According to the Monitoring Well Log and Construction Diagram, groundwater was encountered approximately 18 to 19 feet bgs. Based on the permits provided, the previous presence of the groundwater monitoring well is not expected to represent a significant environmental concern.

CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY

The California EPA (CalEPA) Regulated Site Portal combines data of environmentally regulated sites and facilities in California into a single, searchable database. The portal provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials. Citadel reviewed the Site Portal. The Site was not identified in the database.

AIR QUALITY MANAGEMENT DISTRICT

Citadel reviewed information available on-line through the Bay Area Air Quality Management District's Interactive Data Maps. The Site was not identified on the database.

REGIONAL WATER QUALITY CONTROL BOARD

The GeoTracker Database is the California State Water Resources Control Board's (SWRCB) Internet-accessible database system used by the SWRCB, regional boards, and local agencies to track and archive compliance data from authorized or unauthorized discharges of waste to land, or unauthorized releases of hazardous substances from underground storage tanks. According to GeoTracker, Flood Park (SMCO), located at 215 Bay Road, the adjoining property south of the Site, is listed as a LUST Cleanup Site. According to information provided by GeoTracker, a 750-gallon gasoline UST was removed from the property in 1986 as part of a park remodeling program. The former UST was located approximately 0.17 mile west-southwest of the Site. According to reviewed documents, soil samples collected beneath the UST revealed petroleum product contamination. Two borings were advanced adjacent to the former tank excavation in December 1987 to assess the extent of the contamination and were converted to groundwater monitoring wells. Floating petroleum product was reported in both groundwater monitoring wells.

According to the San Mateo County Remedial Oversight Program Case Closure Memorandum for Flood Park, total petroleum hydrocarbons as gasoline (TPHg) and benzene, toluene, ethylbenzene, and xylene (BTEX) were not detected in the groundwater samples collected from both groundwater monitoring wells in October 1990. Additional sampling in August 1991 reported no free product but minor dissolved hydrocarbons above detection limits. In April 1992, six temporary borings were installed to determine the possible migration of contaminants downgradient. Three additional borings were advanced in December 1992, approximately 100 feet downgradient to Hedge Road in attempt to chase the plume; TPHg and BTEX were not detected in the collected groundwater samples. Quarterly monitoring continued until May 1994. Due to the alluvial fan deposits and coarse-grained materials in the area of the wells and borings, it appeared that the free and dissolved phase hydrocarbons had migrated away from

the area. According to the memorandum, no remaining groundwater contamination existed in the immediate area and in downgradient areas over 250 feet away, and no further investigation, remedial/removal action, or monitoring was required at the property. According to the Well Abandonment Report prepared by Cambria Environmental Technology, Inc., the four monitoring wells were abandoned on July 19, 1997. The case was completed and closed by the DEHS on September 10, 1997. Based on the distance and closure status, this property is not a significant environmental concern.

7.0 DATA GAPS

A data gap is a lack of or inability to obtain information despite good faith efforts to gather such information. A data failure is a failure to achieve the historical research objectives even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful.

The following data gaps have been identified during the course of this investigation:

- Additional governmental agencies that are not included in the Government Records report may maintain information regarding environmental conditions at the Site and nearby facilities.

With regard to these data gaps, Citadel believes that the most significant potential sources for on-site contamination have been identified during the current investigation and the Phase I ESA was performed in compliance with all appropriate inquiry, published in 40 CFR 312.

8.0 FINDINGS

Citadel was contracted by Alliant Strategic Development (Client) to perform a Phase I ESA of the property located at 320 Sheridan Drive, in the City of Menlo Park, San Mateo County, California; hereinafter referred to as the "Site."

Current Site Conditions

The Site consists of one vacant parcel with concrete floor slabs throughout the Site and a trash enclosure in the north portion of the Site. Access to the Site parking areas is near the west boundary of the Site along Sheridan Drive. Sheridan Drive ends as an entrance to the Site. At the time of the Site reconnaissance, the Site was vacant and unoccupied.

No stationary equipment was observed at the Site. In general, the Site appeared to be moderately maintained. Citadel observed debris consisting of old carpet, tiles, an old basketball hoop, and rotting picnic tables throughout the Site. While the presence of debris is not expected to represent a significant environmental concern, the observed debris should be properly disposed of off-Site.

Site History

A review of historical sources showed that the Site was undeveloped as early as 1897 until at least 1953 with the development of two large structures as part of James E. Flood School. An additional structure in the south central portion of the Site appeared developed by 1958, and a small structure appeared developed in the southwest corner of the Site by 1991. All the Site

structures appeared to have been demolished by 2020. The Site was generally occupied as a school from as early as 1953 until 2015.

The Site was occupied as James E. Flood School from 1969 to 2005; Redwood High School in 1978; Flood Park Alternative School and Union High School in 1981; Ravenswood City School from 1992 to 2000; Rivercom Web Services in 2005; and Center for a New Generation in 2010.

Environmental Databases

The Site was identified on the HAZNET and the HWTS databases. HWTS is the DTSC's data repository for hazardous waste identification and manifest information. The Site was identified on these databases for generating other organic solids in 2004. The Site was also identified on the San Mateo County BI, which is a list that includes Hazardous Materials Business Plans, hazardous waste generators, and USTs. The Site is listed on the BI list as an inactive facility under the stormwater program. Based on a lack of reported spills, leaks, or violations, this listing is not considered to represent a significant environmental concern.

Citadel reviewed information provided by EDR regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to EDR, historical releases of petroleum products from a LUST occurred within 0.25-mile and upgradient of the Site. Flood Park (SMCO), located at 215 Bay Road, is listed as a LUST site. According to EDR, the property adjoins the Site to the south and the gasoline leak was discovered in December 1987. The case was completed and closed by the San Mateo County DEHS on September 10, 1997.

No properties were identified on the Historical Gas Station and Dry Cleaners databases as within 0.125-mile and upgradient, 365 feet and cross-gradient, or 100 feet and downgradient of the Site.

Environmental Databases

The DEHS HMD is the CUPA for San Mateo County and is responsible for regulating facilities that: handle or store hazardous materials, are part of the California Accidental Release Prevention Program, generate or treat hazardous wastes, store at least 1,320 gallons of aboveground petroleum, and own or operate USTs. Citadel reviewed the Online Public Records System for DEH records. The Site was not identified in the database; however, Citadel submitted an environmental records request to the DEHS. A permit to install one groundwater monitoring well for a geotechnical investigation to 40 feet bgs in the southeast portion of the Site was issued in January 2021. A permit for the destruction of the groundwater monitoring well via pressure grouting was issued in April 2022. According to the Monitoring Well Log and Construction Diagram, groundwater was encountered approximately 18 to 19 feet bgs. Based on the permits provided, the previous presence of the groundwater monitoring well is not expected to represent a significant environmental concern.

9.0 CONCLUSIONS AND RECOMMENDATIONS

According to ASTM Standard of Practice E1527-13, recognized environmental conditions (REC) fall under three specific categories when evaluating a site or properties within the site vicinity. These categories are defined below.

A REC means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

A CREC, is a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

An HREC, is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

According to ASTM E2600-10, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Based on a review of historical and present records, and Site reconnaissance, Citadel believes that sufficient information was collected and evaluated for the Site to determine if a REC, HREC, CREC, or a de minimis condition exists. Based on our review, reported release incidents that would represent RECs in connection with the Site or a source of a release that would be likely to contribute to a VEC was not identified. No evidence for designating the Site as a REC, HREC, or CREC from reviews of historic documents and present Site conditions was found.

10.0 LIMITATIONS

The information and opinions rendered in this report are exclusively for use by the Client. Citadel will not distribute this report without the Client's written consent, except as may be required by law or court order. The recommendations expressed in this report took into consideration the purpose and scope of this limited assignment. We accept responsibility for the competent performance of our duties in executing the assignment and preparing this report in accordance with the normal standards of our profession but disclaim any responsibility for consequential damages resulting from inaccuracies in information provided by the Client, federal, state, county, or local regulatory agencies.

11.0 DISCLAIMER

The services performed by Citadel Environmental Services, Inc. ("Citadel"), d.b.a. Citadel EHS, in connection with this Report were performed in accordance with generally and currently accepted engineering practices and principles; provided, however, Citadel completed such services as directed by the Client and the recommendations described in this Report are therefore limited in purpose and scope. The procedures and methodologies used by Citadel in its performance of services, and the recommendations contained herein, are not intended to meet the requirements under any specific laws or regulatory guidelines unless expressly set forth in the Proposal.

The recommendations and conclusions set forth in this Report are based on information and data available to Citadel during the course of its performance of the services. Citadel relied on the information and data provided by or on behalf of Client, including, if applicable, historical and present operations, conditions and test data, and Citadel assumed all such information and data was correct and complete. Citadel shall not be liable for any damages or losses resulting from inaccuracies of, or omissions from, information or data provided by or on behalf of the Client, any interested third-parties, or any federal, state, county, or local governmental authority, or otherwise available in the public domain.

The information contained in this Report and conclusions resulting therefrom are based solely on information available to Citadel at the time of its performance of services, and from observations and perceived conditions and materials existing on the date of Citadel's limited survey of the site, if applicable. Citadel disclaims any inaccuracy in the Report as a result of any part or parcel of property to which Citadel was not provided access, or which was concealed, including, but not limited to, wall cavities/chases, ceiling plenums, below floor finishes, crawlspaces, below grade, beneath existing structures, or behind electrical panels.

The findings and recommendations presented in this Report are based upon observations of present conditions and may not necessarily indicate future conditions. No conclusions should be construed or inferred other than those expressly stated in this Report. EXCEPT FOR ANY WARRANTIES EXPRESSLY SET FORTH IN THE PROPOSAL OR OTHER WRITTEN AGREEMENT BETWEEN CITADEL AND CLIENT, CITADEL MAKES NO WARRANTIES HEREUNDER WITH RESPECT TO ANY INFORMATION CONTAINED IN THIS REPORT, EXPRESS OR IMPLIED, AND CITADEL HEREBY DISCLAIMS ALL OTHER WARRANTIES.

All testing and remediation methods have reliability limitations and no method nor number of sampling locations can guarantee that a hazard will be discovered if contamination or other evidence of the hazard is not encountered within the performance of the services as authorized. Reliability of testing or remediation varies according to the sampling frequency and other service variables that were selected by Client. Citadel shall not be at fault or liable for any such limitations.

The information and opinions rendered in this report are exclusively for use and reliance by the Client. The information contained herein may not be used, disclosed, or copied without written permission of the Client and may not be relied upon without the written permission of Citadel.

13.0 PROFESSIONAL CERTIFICATION

Citadel has completed a Phase I ESA of the property located at 320 Sheridan Drive, in the City of Menlo Park, San Mateo County, California. The Phase I ESA was performed at the Client's request in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-2013 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The independent conclusions represent our professional judgment based on information and data available to Citadel during the course of this project. Information regarding historical and present operations, conditions and test data provided by the Client or their representative, is assumed to be correct and complete. The conclusions presented by this Phase I ESA are based on information provided to Citadel and from observations and perceived conditions existing on the date of the site reconnaissance.

In expressing the opinions stated in this report, Citadel has exercised the degree of skill and care ordinarily exercised by a reasonable prudent environmental professional. Documentation provided by the Client, Client-designated representatives, interested third-parties, or from the public domain, and referenced in preparation of the Phase I ESA report, have been assimilated with the understanding that Citadel assumes no responsibility or liability for their accuracy.

Senior Staff Environmental Specialist

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by the final All Appropriate Inquiry (AAI) Rule published in 40 CFR Part 312.10 (November 1, 2013). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting described in this Phase I ESA. I have developed and performed the AAI in conformance with the standard and care of this Rule.

Mark Drollinger, M. Eng., CSP, CHMM
Principal, Engineering and Environmental Sciences

Mark Drollinger, MEng, CSP, CHMM, EiT

Director of Environmental Geology & Engineering

EXPERIENCE

With over **35 years** of experience in environmental engineering, compliance, permitting and management projects, Mr. Drollinger has a strong working knowledge of EPA, DTSC, AQMD/APCD, OSHA and DOT regulations; and with local agencies, fire departments and public works. Mr. Drollinger has provided environmental engineering, assessment and compliance, safety management, and engineering construction management services on numerous projects for the US Navy, Veterans Administration, US Department of Agriculture, Cal Trans, EPA and numerous private projects throughout the western United States. In addition, Mr. Drollinger has developed and implemented programs to train managers and staff in storm water and NPDES compliance, soil and groundwater sample collection and data interpretation, Hazcomm, IIPP, and safe-work practices such as identifying and handling hazardous materials, fall protection, confined space, traffic control, LO/TO and ergonomics; and has conducted environmental and permitting audits of facilities including health and safety assessments.

ROLE

As Director of Environmental Geology & Engineering, Mr. Drollinger's primary responsibility includes developing and implementing health and safety protocols; safety training of management, staff and subcontractor personnel; establishing and managing budgets and personnel; negotiating with local, regional, state, and federal agencies; litigation support; and coordinating tasks with multi-discipline project teams.

Mr. Drollinger works closely with, and often develops protocols for conducting assessments related to Environmentally Regulated Materials Management (ERM), Industrial Hygiene (IH), and Occupational Safety and Training (OST) departments.

EDUCATION

Mr. Drollinger has a B.S. in Applied and Natural Sciences from the University of Alabama, and a M.Eng. in Advanced Safety Engineering and Management, University of Alabama, Birmingham.

Mr. Drollinger is also a certifying board member of the American Council of Accredited Certifications (formerly known as the American Indoor Air Quality Council), and is a member of the American Society of Safety Engineers, Board of Certified Safety Professionals, Institute of Hazardous Materials Management, Institute of Industrial Engineers and International Facilities Management Association.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Citadel Environmental Services on Apr 07, 2023.

TARGET PROPERTY

320 Sheridan Drive
Menlo Park, CA 94025

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeyman:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other common reasons for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- **Permit Number:** The alphanumeric designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- **Description:** A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- **Permit Type:** Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Contact: Annie Liu

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Citadel Environmental Services were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 085D-4C7D-903C

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Citadel Environmental Services (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Inquiry # 7302428.4

Client Name:

Citadel Environmental Services
1725 Victory Boulevard
Glendale, CA 91201
Contact: Annie Liu

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Citadel Environmental Services were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:**Coordinates:**

P.O.#	NA	Latitude:	37.476883 37° 28' 37" North
Project:	1485.1029.0	Longitude:	-122.1703 -122° 10' 13" West
		UTM Zone:	Zone 10 North
		UTM X Meters:	573360.52
		UTM Y Meters:	4148099.88
		Elevation:	19.00' above sea level

HOW SENT (Circle): Fax / Email FAX / EMAIL: _____

User Questionnaire	
Client	Alliant Strategic Development
Contact Name	Scott Nakaatari
Contact Title	Senior Vice President, Development
Phone/Fax/Email	(818) 737-8144/ scott.n@alliantstrategicdev.com
Completed by?	Thomas Atlee
Response Date	4/18/2023
Form of Response	Email
Current Use of the Property	Vacant Land
Reason for Performing Phase I	Due Diligence for Development of a multifamily building

Please include the name of the Companies who provide your utilities, so we can contact each agency:

Utilities	
Electricity	PG&E
Natural Gas	PG&E
Sewage	West Bay Sanitary District
Sanitary Sewerage	West Bay Sanitary District
Solid Waste Removal	Recology San Mateo County
Fuel Oil	
Steam	

Please include the Name and Company of Each of the following individuals:

User	Name	Company
Key Site Manager	Delma Maciel	Ravenswood Unified School District
Current Property Owner		Ravenswood Unified School District
Current Property Owner Representative	Delma Maciel	Ravenswood Unified School District
Occupants	N/a	
Major Occupants	N/a	
Current Operator Name	N/a	
Past Property Owner(s)	Unknown	
Past Property Owner Representative(s)	Unknown	
Other Past Property Owner(s)	Unknown	
Past Operator Name(s)	Unknown	
Past Occupant(s)	Unknown	
Past Major Occupant(s)	Unknown	
Broker(s)	Tatiana Hodapp	JLL
Property Manager	Unknown	
Building Engineer	N/a	
Other		

TITLE & JUDICIAL RECORDS

Per ASTM E 1527-13 Section 6.2, the User is required to provide and/or report to the environmental professional any title and/or judicial records so identified for the subject property.

Please provide any information on title and/or judicial records:

ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

Per ASTM E 1527-13 the User is required to provide and/or report to the environmental professional any environmental liens or AULs so identified for the subject property. The environmental professional per the ASTM practice is not responsible to undertake a review of information to identify environmental liens or AULs.

Please provide any information on environmental liens or activity and use limitations (AULs):

SPECIALIZED OR ACTUAL KNOWLEDGE OF USER

Per the ASTM standard, it is the User's responsibility to communicate to the environmental professional any information that is material to recognized environmental conditions in connection with the subject property based on such specialized knowledge, actual knowledge, experience, or commonly known and reasonably ascertainable information within the local community.

Please provide any information of the following items:

ASTM Scope Item	Property Contact Aware of them (Y/N)	Comment
USTs	N	
ASTs	N	
PCB Electrical Equipment	N	
Hydraulic Equipment	N	
Chemicals, Hazardous Materials, and Raw Materials Storage and Usage	N	
Waste Generation, Storage and Disposal	N	
Wells, Sumps, Pits, and Floor Drains	N	
Stormwater Runoff and Surface Water	N	
Lagoons, Septic Systems, Wastewater Treatment, and Separators	N	
Stressed Vegetation, Staining and Odors	N	
Surficial Disturbances	N	
On-Property Dry Cleaners	N	

NON-ASTM Scope Item	Property Contact Aware of them (Y/N)	Comment
Asbestos Containing Materials	N	
Radon	N	
Lead-Based Paint	N	
Lead in Drinking Water	N	
Potable Well	N	
Potential Wetlands	N	
Air Emissions	N	
Mold/Water Intrusion	N	

Please refer to “Helpful Documents” section below to provide any relevant reports associated with the above items.

VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

(For Property Owner) Per the ASTM standard, in a transaction involving the purchase of a parcel of commercial real estate, the user shall consider the relationship of the purchase price of the property to the fair market value of the property if the property was not affected by hazardous substances or petroleum products. The User should try to identify an explanation for a significantly lower price which does not reasonably reflect fair market value if the property was not contaminated, and make a written record of such explanation. The ASTM standard does not require that a real estate appraisal be obtained in order to ascertain fair market value of the property.

PROCEEDINGS INVOLVING THE PROPERTY

Per the ASTM standard, prior to the site visit, the User (if different from the property owner), Key site manager (if any is identified), and property owner shall be asked whether they know of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

- **Do you know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, or from the property? No**
If yes, please explain:

- **Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? No.**
If yes, please explain:

HELPFUL DOCUMENTS

Per the ASTM Standard, Prior to the property visit, the Property owner, key site manager (if any is identified), and User (if different from the property owner) shall be asked if they know whether any of the documents below exist and if so, whether copies can and will be provided within reasonable time and cost constraints:

	User		Key Site Manager		Property Owner	
	Exist	Provided	Exist	Provided	Exist	Provided
ESA Reports	Unknown					
Environmental Compliance Audit Reports	Unknown					
Environmental Permits UST/AST Registrations	Unknown

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 01/25/2023 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MENLO TECH INC.	188 CONSTITUTION DR	N 1/4 - 1/2 (0.392 mi.)	I33	252

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes

EXECUTIVE SUMMARY

available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/25/2023 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Federal institutional controls / engineering controls registries

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 10/27/2022 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/24/2022 has revealed that there are 7 ENVIROSTOR sites within approximately 1 mile of the target property.

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

VOCs. Confirmed use of chemicals: hydrochloric acid and caustic soda, waste oil; a 500-gal AGST stored TPH-d for an emergency generator. Warehouse bldg. a former liquor store; Phase I Soil & GW Investigation for the Heublein Bldg project was conducted in 1987 by Beta Associates for Lincoln Property Company. Two MWs were installed approximately 18.5 ft deep. Groundwater was encountered at 8.5 ft bgs; MW-2 (mostly sand below 8.5 ft) 630 ppb of TCE in GW; TCE in soil sample from MW-2 at 547 ppb, cis-1,2-DCE 60.4 ppb above action level of 5 and 16 ppb, respectively, TPH-d - < 50 ppb; ND for all constituents in soil samples. Additional 4 wells installed in 1987, no VOCs detected in soil samples. Groundwater monitoring data collected for over seven years indicated the presence of low levels of volatile organic compounds in shallow groundwater. Last groundwater sampling event in 1998. Concentrations of TCE had decreased significantly and only TCE was detectable in one well, MW-2, at a concentration of 5.3 ug/L. Board staff agreed that these chemicals most likely originated from an upgradient and off-site source. Permit from SMCo. obtained to decommission all onsite MWs in 1998. No further action letter sent to Exponent 10/21/1998.

 RWQCB Region: SAN FRANCISCO BAY RWQCB (REGION 2)
 Site History: Raychem Corporation's operations from 1978 to 1996 included chlorinated solvent (PCE) use and a solvent cleaning station. 1995 facility inspection reports document floor stains and a sump. TCE exceeds screening levels in groundwater. PCE, TCE, and VC exceed screening levels in soil vapor. As of 2020, the site is planned to be redeveloped into a six-story mixed use building with parking, commercial, and tenant amenities on the first and second floors and residential in the upper four floors. Remedial actions are being evaluated. A CLRRRA agreement is being considered. Offsite properties at 155 and 165 Jefferson Drive are not required. 190 Constitution Drive vapor intrusion assessment is being conducted.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA EnviroScreen 4 Score: 60-65%

Military DOD Site: No

Facility Project Subtype: Not reported

RWQCB Region: SAN FRANCISCO BAY RWQCB (REGION 2)

Site History: The site is comprised of 3 parcels at 141 Jefferson Drive and 172 - 188 Constitution Drive which have been used for various commercial and industrial shops since the 1960s. Groundwater and soil vapor are contaminated with volatile organic compounds including chlorinated solvents. As of 2020, the 3 parcels are planned for redevelopment into 3 new residential buildings: one building would be seven stories with ground-floor parking garage and 6 levels of apartments; one building would be seven stories with ground-floor parking garage, ground-floor retail space, and 6 levels of apartments; and the third building would be made of up six townhome buildings that would each contain seven three-story units. Volatile organic compounds, including trichloroethene, exceed environmental screening levels (ESLs) in groundwater and soil vapor in the eastern-most portion of the Site. The 3 eastern-most townhome buildings, which are planned to be built in the area of the groundwater and soil vapor ESL exceedances, will be built with vapor intrusion mitigation systems (VIMS). Long-term operation, maintenance, and monitoring may be needed, in accordance with VIMS guidance.

WDS:

Name: L3 COMMUNICATIONS CORP
Address: 1150 Chrysler Dr
City: MENLO PARK
Facility ID: San Francisco Bay 411013248
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 2
Facility Telephone: 6503269500
Facility Contact: HEATHER ZINN

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

site since 1965. PEA submitted in May 1991 indicates that nickel and cadmium may be present in soils above their respective TTLC and/or STLC. Elevated levels of solvents found in GW under the site. PCB found in soils at levels above the extremely hazardous waste TTLC. PCB has also migrated off-site via surface runoff. Draft ISE determination and RAO sent to TLO for review on June 11, 1991.

WDS:

Name: TYCO ELECTRONICS CORP
Address: 300 Constitution Dr
City: MENLO PARK
Facility ID: San Francisco Bay 411016702
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 2
Facility Telephone: 6503613022
Facility Contact: ADAIR ROBIN

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Quarterly Update: Tyco, previously known as Raychem is an electronic manufacturer. Raychem had a hazardous waste facility permit and closed its hazardous waste management units. DTSC has been overseeing corrective action at Tyco under a corrective action consent agreement. The main contaminant is PCBs. Soil removal was completed to industrial levels. LUC has been entered into and filed with County. Tyco is currently conducting long term groundwater monitoring.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/25/2023	Source: EPA
Date Data Arrived at EDR: 02/02/2023	Telephone: N/A
Date Made Active in Reports: 02/28/2023	Last EDR Contact: 04/03/2023
Number of Days to Update: 26	Next Scheduled EDR Contact: 07/10/2023
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: (415) 495-8895

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 03/20/2023	Last EDR Contact: 03/09/2023

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: (415) 495-8895

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: (415) 495-8895

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 10/27/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/16/2022	Telephone: 703-603-0695
Date Made Active in Reports: 02/09/2023	Last EDR Contact: 02/21/2023
Number of Days to Update: 85	Next Scheduled EDR Contact: 06/05/2023
	Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 10/27/2022	Source: Environmental Protection Agency

Data Release Frequency: Quarterly

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CERS HAZ WASTE: CERS HAZ WASTE

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 01/05/2023	Source: CalEPA
Date Data Arrived at EDR: 01/06/2023	Telephone: 916-323-2514
Date Made Active in Reports: 01/11/2023	Last EDR Contact: 01/06/2023
Number of Days to Update: 5	Next Scheduled EDR Contact: 05/01/2023
	Data Release Frequency: Quarterly

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 01/06/2023	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 02/02/2023	Telephone: 202-307-1000

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

Date of Government Version: 06/24/2020	Source: Department of Health & Human Services

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

320 SHERIDAN DRIVE
320 SHERIDAN DRIVE
MENLO PARK, CA 94025

TARGET PROPERTY COORDINATES

Latitude (North):	37.476883 - 37° 28' 36.78"
Longitude (West):	122.170261 - 122° 10' 12.94"
Universal Transverse Mercator:	Zone 10
UTM X (Meters):	573365.8
UTM Y (Meters):	4147895.5
Elevation:	19 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12016467 PALO ALTO, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
PALO ALTO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches		Not reported	Not reported	Max: 0.01 Min: 0	Max: Min:

Soil Map ID: 2

Soil Component Name: Orthents

Soil Surface Texture: variable

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.
