Environmental Impact Report  
REPORTER'S TRANSCRIPT OF PROCEEDINGS  
AGENDA ITEMS F2 and G1  
MONDAY, DECEMBER 18, 2023

Reported by AMBER ABREU-PEIXOTO  
Certified Shorthand Reporter No. 13546  
State of California

1 ATTENDEES

2

3 The Planning Commission:

- 4 Linh Dan Do (Chair)
- 5 Jennifer Schindler (Vice Chair)
- 6 Andrew Ehrich
- 7 Henry Riggs
- 8 Katie Ferrick

7

ABSENT: Andrew Barnes

8

9 SUPPORT STAFF:

- 10 Fahteen Khan, Associate Planner
- 11 Matt Pruter, Associate Planner

11

PROJECT PRESENTERS:

- 12 Michelle Loeb, LDP Architect

13

CONSULTANTS:

- 14 Kristy Weis, DJP&A

15

17

18

19 BE IT REMEMBERED that, pursuant to Notice of the  
 20 Meeting, and on December 18, 2023, before me, AMBER  
 21 ABREU-PEIXOTO, CSR 13546, State of California, there  
 22 commenced a Planning Commission meeting under the  
 23 provisions of the City of Menlo Park.

## 1 P R O C E E D I N G S

2

3 CHAIR DO: So this is Item F2, request for an  
4 Environmental Impact Report, EIR, Scoping Session for a  
5 project at 3705 Haven Avenue to comprehensively redevelop  
6 the .66-acre site zoned Residential, Mixed-Use, Bonus,  
7 R-MU-B, with a bonus level development project consisting  
8 of an eight-story, mixed-use building with 99 dwelling  
9 units and approximately 1,550 square feet of commercial  
10 space. The proposed project would demolish an existing  
11 10,361-square-foot commercial building. The project  
12 includes a total of approximately 14,629 square feet of  
13 common open space, including approximately 4,670 square  
14 feet of publicly-accessible outdoor space. In addition,  
15 the project would potentially include a battery-powered  
16 electric emergency generator.

17 The proposed project would be developed using the  
18 bonus level development allowed by the City's Municipal  
19 Code, which provides for an increase in density, gross  
20 floor area or intensity, and/or height in exchange for the  
21 provision of community amenities.

22 Additionally, the applicant is proposing to  
23 utilize State Density Bonus Law to incorporate additional  
24 density and square footage when on-site below market (BMR)  
25 housing units are provided.

1           The proposed community amenity would not involve  
2 any additional building construction. It would either be  
3 provided on site within the proposed building, payment of  
4 an in-lieu fee, or a combination of an on-site amenity and  
5 a fee.

6           With the City's bonus level density, the allowed  
7 density would result in 66 units. Of the 66 units, the  
8 project is providing 15 percent, equal to 10 units, as  
9 below market rate units affordable to very-low-income  
10 households, which makes the project eligible for the  
11 following State Density Bonus Law benefits: A 50 percent  
12 density bonus for up to 99 units, three concessions,  
13 unlimited waivers, and use of State Density Bonus Law  
14 parking standards.

15           The applicant has requested concessions and  
16 waivers pursuant to the State Density Bonus Law to  
17 increase the density and gross floor area of the project,  
18 as well as to increase the building height and modify the  
19 parking requirements. The proposed building would contain  
20 approximately 117,335 square feet of gross floor area of  
21 residential uses, and 1,550 square feet of gross floor  
22 area of commercial space, for a total floor area ratio of  
23 413 percent.

24           The project includes the removal of 13 trees,  
25 three of which are heritage trees. The proposed project

1 is considered a housing development project pursuant to  
2 the Housing Accountability Act. Environmental review is  
3 required to assess the potential environmental impacts of  
4 the report.

5           The Notice of Preparation, or NOP, was released  
6 on December 1st, 2023. The NOP provides a description of  
7 the proposed project, the location of the proposed  
8 project, and a discussion of the project's probable  
9 environmental effects. The EIR will address potential  
10 physical environmental effects of the proposed project, as  
11 outlined in the California Environmental Quality Act, or  
12 CEQA. An initial study was not completed, as it is  
13 anticipated this will be a full EIR and no topic areas  
14 will be scoped out, with the exception of agricultural and  
15 forestry resources, mineral resources and wildfire that  
16 are topic areas not anticipated to require further  
17 analysis.

18           The City is requesting comments on the scope and  
19 content of this EIR. The project location does not  
20 contain a toxic site pursuant to Section 6596.2 of the  
21 Government Code. Comments on the scope and content of the  
22 EIR are due by 5:00 p.m., Wednesday, January 10th, 2024.

23           And Ms. Khan.

24           MS. KHAN: Good evening Chair Do, Planning  
25 Commissioners, and members of the public. I'll start off

1 with a presentation, and I'll share my screen to begin.

2           Tonight we'll be undergoing an EIR Scoping  
3 Session and Study Session for 3705 Haven Avenue. These  
4 are two separate public meetings. First, we'll do the EIR  
5 Scoping Session, followed by the Study Session. The  
6 Scoping Session for an EIR is initiated by the publication  
7 of the NOP, which has been done earlier this month.  
8 Public comments are due by January 10th, 2024. The  
9 project requires a full EIR. Through the Scoping Session,  
10 there's an opportunity to comment on the EIR topics that  
11 will be studied, which are provided in more details in the  
12 staff report.

13           As for the Study Session, we're looking for  
14 general feedback on the project. There will be no action  
15 taken tonight on the project.

16           Staff recommends tonight's meeting format as  
17 shown on the slide, which includes staff's introductory  
18 presentation, after which the applicant team will present,  
19 and our final presentation will be by the environmental  
20 consultant, after which we will open it to the public  
21 comment and commissioners' questions and comments.

22           With that we'll close out the Scoping Session and  
23 move towards the Study Session portion of tonight's  
24 project.

25           Staff thought it would be beneficial for the

1 Planning Commission and members of the public to receive  
2 the applicant's presentation during the EIR Scoping  
3 Session portion of the public hearing to provide a summary  
4 of the proposed project.

5           The project is located north of 101, west of  
6 Marsh and Bayfront Expressway, at the bend of Haven  
7 Avenue. The parcels to the west shown here in brown and  
8 yellow stripes are in the high-density residential  
9 affordable housing overlay. Parcels in red are zoned as  
10 office. The subject property and the one directly across  
11 it in brown are zoned residential, mixed-use, bonus.  
12 Parcels further in pink, with white dots, are previously  
13 M2-zone parcels.

14           As a mixed-use project, with more than two-thirds  
15 residential, it qualifies as a housing project under  
16 Senate Bill 330. An SB 330 project, under the Project  
17 Streamlining Act, caps the number of public meetings to  
18 five. Tonight's meeting counts towards one of the five.

19           The project -- the proposed project is a 99-unit  
20 residential development project with ancillary commercial  
21 use of 1550 square feet. Of the 99 units, ten of them  
22 will be affordable to very-low housing income households.  
23 The project will be utilizing the City's bonus level in  
24 exchange for community amenity and state density bonus,  
25 which allows for three concessions and unlimited waivers.

1 The applicant is requesting one concession and four  
2 waivers at this time.

3 The concession includes the -- includes -- not to  
4 include the cost of parking in the overall cost for the  
5 tenants residing in the affordable units, waivers to  
6 further increase height and floor area ratio, reduce  
7 ground floor commercial area parking, which is four  
8 spaces. And, lastly, reduce the ground floor commercial  
9 height from 15 feet to 10 feet.

10 The applicant is still considering whether they  
11 would like to request additional concessions or waivers to  
12 partially offset cost.

13 With this, I conclude staff's presentation on the  
14 EIR Scoping Session, and I welcome the applicant team to  
15 the desk to present their presentation.

16 EMERALD XU: Hello? Good evening, Planning  
17 Commissioners and audience. My name is Emerald Xu, and  
18 I'm with 3705 Haven LLC, March Capital, representing the  
19 developer team. We're a team founded in 2014, women and  
20 minority owned real estate investment and development firm  
21 headquartered in San Francisco. We're focused on  
22 repositioning and developing and extracting the best and  
23 highest use of underutilized properties. And today's  
24 presentation will largely be presented by our architect  
25 pointer, LDP Architecture.

1           And here it is, Michelle.

2           MS. LOEB: Good evening, Commissioners. My name  
3 is Michelle Loeb. I'm a principal at LDP Architecture.  
4 We're a women-owned small business enterprise based in San  
5 Francisco, founded in 1979. And we specialize in  
6 multi-family housing throughout the Bay Area.

7           Staff gave a great presentation about the site,  
8 but including some additional graphics here. 3705 Haven  
9 is located near the 101 and 84 in the Belle Haven  
10 neighborhood. This area has a mixture of warehouses,  
11 commercial and residential uses, along with a proposed  
12 eight-story hotel just to the north of the site.

13           These photos are the existing one-story cement  
14 plaster office building and parking area at grade to be  
15 demolished.

16           As mentioned, the site is an R-MU-B, residential,  
17 mixed-use, bonus district. And the site is 28,808 square  
18 feet. Some of the items to note on this table are that  
19 the allowed density at a bonus level is 100 dwelling units  
20 per acre, or 66 units. The max floor area ratio at a  
21 bonus level is 225 percent, or 64,818 square feet.

22           The development is utilizing the State Density  
23 Bonus. This project will provide 10 very-low-income  
24 units, 15 percent of the 66-base units. This allows a 50  
25 percent bonus, equating to 33 additional units.

1           The total unit count of the proposed project will  
2 be 99 units, which is a density of 150 dwelling units per  
3 acre. And the gross floor area of the project is 114,155  
4 -- or 114,155 square feet.

5           As mentioned, we're seeking one concession and  
6 four waivers. And moving on.

7           This graphic shows the unit mix. There's a  
8 mixture of units from Jr. 1 bedrooms, up to three-bedroom  
9 units. And also listed here are the associated square  
10 footages.

11           On the right you can see the variety of the 10  
12 below-market-rate units provided throughout the project.  
13 They're highlighted in orange at the lower portion of this  
14 slide.

15           We've been working with the City staff for more  
16 than a year and a half with the preliminary SB 330  
17 application submitted in May of 2022. The EIR consultant,  
18 DJP&A, was approved by the City Council in July of this  
19 year, bringing us to today's meeting.

20           So some sustainable features of this project  
21 site, we're targeting LEED Gold Certification. We're  
22 providing electric vehicle charging spaces. We have a  
23 solar-ready zone on the roof. We're dual plumbing, and  
24 are providing water-efficient fixtures throughout the  
25 project.

1           We have an elevated first floor level to mitigate  
2 sea level rise and to deal with the flood zone of the  
3 adjacent bay. And we have on-site required storm  
4 management and street-level storm water treatment,  
5 bio-retention planters.

6           The design is a contemporary take on a courtyard  
7 building. The building mass steps back, presenting  
8 requirements with a base 48'3" provided. There's a 55'  
9 max allowed in this area.

10           We're providing high-quality exterior materials  
11 to add visual interest and size, different volumes, along  
12 with various window sizes and patterns to help break down  
13 the form.

14           Getting into the elevations, this is Haven Avenue  
15 east, with the central courtyard featured on the third  
16 floor level. We're stepping back at the fifth floor, for  
17 allowing sunlight into the courtyard, which we have  
18 studied in shadow studies, and also to provide a resident  
19 amenity to the residents.

20           This is Haven Avenue south, which is the primary  
21 pedestrian entrance. Both Haven Avenue along the east  
22 side and the south side will also have the vehicle  
23 entrances. The west elevation features undulating bays  
24 and floating balconies to create visual interest along the  
25 north elevation and the west elevation.

1           And here on the north elevation, you can also see  
2 the eighth-floor roof deck above.

3           As mentioned, a variety of materials are featured  
4 in the development to really emphasize the massing of the  
5 building. Materials include cement plaster; fiber cement  
6 panels; box corrugated metal panels, which are offset to  
7 add interest; and wood-look aluminum slats. The building  
8 also features sun shades and metal guardrail elements,  
9 particularly for the decks and outdoor spaces.

10           Here you can see some of the site improvements.  
11 We're highlighting here the new street pavement, new  
12 sidewalks, and new driveways the development will be  
13 providing. We'll be under-grounding utilities along the  
14 frontage.

15           Another thing to note on this slide is that we  
16 are respecting a nine-foot, non-buildable easement along  
17 the north side of the site that is below grade, adjacent  
18 to the property line.

19           Publicly-accessible open space is all around the  
20 building, with lighting and sculptural seating on the  
21 north and west sides of the building. A gathering space  
22 with a seat wall and a little free library is proposed at  
23 the corner to help serve the community.

24           And we're removing 13 existing trees, saving  
25 four. And we will be providing 15 new trees at the street

1 level. Additional trees are provided in the open spaces  
2 above.

3           The private open spaces intended to be used by  
4 the residents are layered in the building, with the  
5 courtyard mentioned at level three. This has a pool and  
6 resident amenity spaces that open onto that area. Common  
7 resident roof decks are featured at floors five and eight,  
8 corresponding with the setbacks of the building.

9           A variety of Mediterranean style native and  
10 drought-tolerant species are proposed throughout the  
11 project.

12           This diagram highlights the circulation,  
13 particularly the pedestrian circulation around the  
14 building in light green, as well as bike and vehicle  
15 access to the site. Note the two driveways are located  
16 similar to the existing conditions, with one at the south  
17 and one at the east corners of the site.

18           Looking at the ground floor and the second floor  
19 plans here. We're providing 16 short-term bike parking  
20 spaces at grade, adjacent to the entry. Long-term bike  
21 parking is included; one at the ground floor at the  
22 commercial space, and 149 long-term storage at the second  
23 floor level for the residents.

24           Resident parking is one-to-one, with 99 spaces,  
25 including five ADA, 10 electric vehicle supply equipment

1 spaces, and five EV-ready spaces.

2 Also note that the parking is on two separate  
3 levels in this development.

4 Moving up, the building amenity space -- spaces  
5 are shown in purple, resident units in yellow, and BMR  
6 units in orange again. You can see the private open space  
7 mentioned at floors three, five, and eight on this slide,  
8 and the stepping back of the building in these plans per  
9 requirements.

10 And to close, thank you, Commissioners, for your  
11 time. Please let us know if you have any questions or  
12 comments.

13 CHAIR DO: Great. Thank you.

14 MS. WEIS: Hi. Can you guys hear me okay?

15 Okay. Great. Good evening, Chair Do, and  
16 Planning Commissioners. My name is Kristy Weis. I'm with  
17 David J. Powers & Associates, and our firm was hired to  
18 assist the City in preparing the EIR for this project.

19 So the purpose of this EIR scoping meeting is to  
20 provide an overview of the California Environmental  
21 Quality Act or CEQA, and the Environmental Impact Report,  
22 or EIR, process, and also to provide an opportunity for  
23 the public to comment on the scope and content of the EIR.

24 So for my presentation, I will go over the  
25 purpose of CEQA and an EIR, the EIR resource areas to be

1 studied, and the EIR process and schedule.

2 And I'll also be here to listen and take note of  
3 the public's comments on the scope and content of the EIR.

4 So the purpose of CEQA is to disclose  
5 environmental impacts, identify and prevent environmental  
6 damage, disclose decisionmaking, enhance public  
7 participation, and foster inter-governmental coordination.

8 The purpose of an EIR is to inform decisionmakers  
9 and the public about the project's impacts and identify  
10 ways to mitigate or avoid impacts. The EIR will also  
11 evaluate a range of feasible alternatives to the project  
12 that will meet most of the project's basic objectives and  
13 avoid or substantially lessen the environmental impacts of  
14 the project. I also want to note that the purpose of an  
15 EIR is not to advocate for approval or denial of the  
16 project.

17 So the resource areas to be studied in the EIR  
18 are listed on this slide. The EIR will evaluate existing  
19 conditions and the project's impacts on these resource  
20 areas. In addition, a Housing Needs Assessment and a  
21 Fiscal Impact Analysis will be prepared for the project.

22 The EIR process and schedule includes six primary  
23 steps, which are identified on this slide. The first step  
24 is to circulate a Notice of Preparation, or NOP, for the  
25 Draft EIR. The NOP for the project started circulating on

1 December 1st and will conclude on January 10th. During  
2 the NOP circulation period, the City will host a scoping  
3 meeting, which is what we're doing right now.

4           The comments received on the NOP and at this  
5 scoping meeting will be taken into consideration when  
6 preparing the Draft EIR. The City anticipates circulating  
7 the Draft EIR in September of 2024, and it would circulate  
8 for 45 days for public comment. While not required under  
9 CEQA, the City will also host a public meeting to receive  
10 comments on the Draft EIR during that circulation period.

11           After the Draft EIR comment period ends, the City  
12 will prepare a Final EIR which will include responses to  
13 comments received on the draft and any edits to the Draft  
14 EIR. It's anticipated that the Final EIR will circulate  
15 in fall of 2024.

16           After a 10-day review period of the Final EIR,  
17 public hearings will be held to consider the certification  
18 of the EIR and approval of the project. Note that the  
19 asterisks on this slide indicate opportunities for public  
20 comment. When providing comments during the scoping  
21 meeting, questions to consider are what environmental  
22 issues should be analyzed, are there alternatives that  
23 should be evaluated, and what mitigation measures would  
24 help avoid or mitigate any negative impacts.

25           So there's an opportunity this evening for oral

1 comments on the scope and content of the EIR. And the  
2 public can also provide written comments until January  
3 10th, at 5:00 p.m., to Fahteen, at the address shown on  
4 this slide. If you send an e-mail -- if the public sends  
5 an e-mail -- or anybody, please make sure to put "3705  
6 Haven Avenue EIR" in the subject heading.

7 And that concludes my presentation. And I'll  
8 hand it back to Fahteen.

9 MS. KHAN: Thank you. With that, we conclude the  
10 presentation for the EIR Scoping Session by staff, the  
11 applicant, and our environmental consultant.

12 With that, I hand it back to you, Chair Do.

13 CHAIR DO: Okay. Thank you.

14 So are there any clarifying questions -- and only  
15 on the EIR scoping portion at this moment; right?  
16 Clarifying questions from the commission to staff,  
17 applicant, or consultant? No?

18 Mr. Pruter, then let's go ahead and open public  
19 comment on the EIR scoping portion of this discussion  
20 tonight.

21 MR. PRUTER: Thank you, Chair Do.

22 At this time, members of the public are welcome  
23 to raise their hand with the hand icon via Zoom or by  
24 pressing star nine, if calling in by phone.

25 We have one hand up at this time. So I'm happy

1 to allow that person to speak at this time. All right.

2 Excuse me.

3 We have a person named Naomi Goodman. I'm just  
4 going to put the timer up, and then I will allow you to  
5 speak. Pardon me for that. Just one moment.

6 And at this time, I -- yes. You are now able to  
7 un-mute yourself, and you will have three minutes to  
8 speak. Thank you.

9 NAOMI GOODMAN: All right. Thank you. My name  
10 is Naomi Goodman. I'm speaking as a resident of Menlo  
11 Park and also on behalf of the Sequoia Audubon Society.

12 As a resident of Menlo Park, I'm concerned about  
13 the impacts of 99 more residential units on traffic at the  
14 Willow Road Highway 84 intersection, which is already  
15 heavily impacted.

16 I'm also concerned that the residents of this  
17 densely-populated area have few options for public  
18 transportation, schools and shops in this city. The 270  
19 bus line connects to Redwood City, not Menlo Park. Please  
20 evaluate these issues in the EIR.

21 On behalf of SAS, Sequoia Audubon, I'm concerned  
22 about the closeness of this tall building to the Don  
23 Edwards Wildlife Refuge and Bedwell Bayfront Park.

24 First, the project plan and Draft EIR should  
25 provide specifics on measures to minimize bird collision

1 with windows. We appreciate the commitment to bird safe  
2 design expressed in the October 2023 project description  
3 letter. However, to evaluate these measures in the Draft  
4 EIR, we will need more detail. The photos of the roof  
5 deck, on Sheet (inaudible) 3 of the plan shows transparent  
6 panels that will pose a serious risk to birds. Please  
7 require that the final project plan include the specific  
8 requirements that were in the Willow Village EIR for bird  
9 safe design. Those were included in the April 2023 plans,  
10 but are missing from the September 2023 revision.

11           Second, the building should minimize  
12 high-intensity lighting and avoid light pollution at the  
13 bay lands to the extent possible.

14           Artificial light at night is bad for both  
15 wildlife and human health. We appreciate the commitment  
16 to dark-sky-friendly external lighting expressed in the  
17 October 2023 letter, but the plan proposes -- excuse me --  
18 4000 Kelvin LED street lights without full shielding.

19           The Draft EIR should list specific measures to  
20 avoid light pollution, such as fully shielded street  
21 lights with brightness no higher than 3000 Kelvin, motion  
22 sensors on lights in common areas and roof decks,  
23 light-blocking blinds on residential units, and  
24 downward-facing exterior lights.

25           Finally, the developer should select replacement

1 trees that are California native species if possible.  
2 Native trees provide better habitats for birds and  
3 (inaudible).

4 Thank you. Appreciate the opportunity to speak.

5 CHAIR DO: Thank you for your comment.

6 MR. PRUTER: At this time I do not see any other  
7 hands raised, but happy to wait a little bit longer if  
8 you'd like, Chair Do.

9 CHAIR DO: Sure. We'll give it a moment.

10 Are there any more commenters?

11 MR. PRUTER: I do not see any additional  
12 commenters. If you'd like, you can close public comment  
13 for this portion of tonight's item. Thank you.

14 CHAIR DO: Okay. Thank you.

15 So let's close the public comment for the EIR  
16 scoping portion of tonight and bring it back to the  
17 commission for questions and discussion. And there's no  
18 action tonight. So just questions and discussion on the  
19 EIR scoping at the moment.

20 Would anyone like to start? And, actually, while  
21 people are -- Commissioner Riggs.

22 COMMISSIONER RIGGS: Yes, thank you.

23 So I guess I'll introduce this -- or address this  
24 to Ms. White, just to make sure I'm making a comment at  
25 the appropriate time.

1 I -- I do hear Ms. Goodman's comment about the  
2 traffic. And I know the Marsh Road impacts all too well.  
3 The added load of another 100 units is definitely going to  
4 be noticeable, as Haven Avenue has already had a  
5 significant effect on the Marsh Road intersection.

6 So would it be appropriate for the EIR to  
7 evaluate access to the Redwood City Caltrain Station as  
8 part of the mediation of an impact? And that would be a  
9 question.

10 MS. WEIS: Hi, Chair. If I could address  
11 Commissioner Rigg's comment.

12 Yes, the EIR will look at transit access to and  
13 from the project site. And if there are impacts  
14 identified, corresponding mitigation would be identified  
15 as well.

16 COMMISSIONER RIGGS: All right. Thank you.

17 CHAIR DO: I had -- while others are considering  
18 their comments, I had a question to staff. The 99 units  
19 is using the State Density Bonus to maximize a residential  
20 development.

21 And the commercial space of about 1,500 square  
22 feet, is that -- that's not maximizing the allowable  
23 commercial space. Is that right?

24 MS. KHAN: That is correct.

25 CHAIR DO: And I believe in the Staff Report,

1 staff didn't recommend, but suggested, that it could be an  
2 option to include it as an alternative to be studied in  
3 the EIR. And I only bring it up in light of the previous  
4 conversation about allowing flexibility. For instance, a  
5 very large child care center, for example.

6           So just -- I don't know how other commissioners  
7 feel, but it might make sense in that light of allowing  
8 flexibility of including that as a scenario that's studied  
9 of maximizing the commercial space because I think right  
10 now, it's below the maximum.

11           UNIDENTIFIED MALE SPEAKER: So through the Chair,  
12 are you looking for a response from staff, or was that a  
13 comment?

14           CHAIR DO: I think it was a comment. I think Ms.  
15 Khan answered my question, and I just -- a comment. Thank  
16 you.

17           Vice Chair Schindler.

18           VICE CHAIR SCHINDLER: Thank you, Chair Do. I'll  
19 actually expand a comment and a question, starting with  
20 Chair Do's question.

21           In the context of the EIR, I know that an  
22 alternative -- a project alternative or alternatives need  
23 to be identified as part of the process. And there were  
24 not concrete alternatives laid out and defined in the  
25 Staff Report today because my understanding is that's

1 still part of the thought process.

2           And as Chair Do pointed out, the commercial  
3 square footage is not only below the maximum, but I'll go  
4 further and I'll say it looks really small. Like it  
5 almost looks like it -- for that reason -- and we'll talk  
6 about this later in the context of the project -- it's  
7 potentially too small to be a significant contribution to  
8 the development/the community. And if that space were  
9 going to become part of the community amenities, it also  
10 seems like it's a little on the small side.

11           So I could envision an EIR alternative that  
12 expands -- as Chair Do says, expands the commercial  
13 component. So that's an alternative. It's not  
14 necessarily an alternative that mitigates or reduces  
15 environmental impact, but it is, I think, an important  
16 alternative to be evaluated.

17           On the flip side, if -- because the commercial  
18 space is so small, if it were to be completely eliminated  
19 and it was going to become a 100-percent residential  
20 project, I don't know if that would require an alternative  
21 EIR, project alternative as well too. But I could  
22 potentially see it going that direction as well.

23           Those are the two things that I could come up  
24 with as I was reading through and primarily reacting to  
25 the commercial -- the commercial square footage.

1 I'm still thinking about what other potential  
2 alternatives might be, and I am looking forward to hearing  
3 commentary from my fellow commissioners to help with my  
4 creativity process.

5 CHAIR DO: Thank you, Vice Chair Schindler.  
6 Commissioner Ferrick.

7 COMMISSIONER FERRICK: Thanks.

8 A very short list is -- and it's really more of a  
9 question, I think, for you -- whether an EIR can study  
10 traffic impacts if the parking, the one-to-one parking  
11 requirement were fewer.

12 So if there weren't the requirement to have a  
13 space of parking, what would the impact be on project  
14 traffic? So, you know -- like, let's say it's half --  
15 let's say there's 50 parking spaces.

16 CITY ATTORNEY: So just to clarify, if I may,  
17 through the Chair, the request is to potentially look at a  
18 project alternative that would be a reduced parking  
19 alternative, to see if that has an impact on reducing a  
20 potential transportation impact of -- traffic congestion  
21 wouldn't be an EIR impact. But potentially limiting  
22 parking could reduce VMT, depending on how the model looks  
23 or the particular analysis.

24 So that's -- reduced parking is one that I know  
25 the City has included in other EIRs as alternatives. So

1 that -- I just want to -- is that consistent with the  
2 comment you're providing?

3 COMMISSIONER FERRICK: Yes. Thank you.

4 CITY ATTORNEY: Great.

5 CHAIR DO: Thank you, Commissioner Ferrick.  
6 Commissioner Ehrich.

7 COMMISSIONER EHRICH: Thank you, Chair Do. This  
8 is a question for the applicant.

9 I would also note that the commercial space is  
10 there, but oddly small. And I'm wondering, is there an  
11 intended use for that commercial space already? Or is  
12 there some rationale behind the inclusion of that space at  
13 this point?

14 MS. LOEB: Thank you for the question. Michelle  
15 Loeb again here.

16 So there's no proposed use for that space at this  
17 time.

18 COMMISSIONER EHRICH: Okay. Thank you.

19 This is my first EIR Scoping Session since I've  
20 been on the Planning Commission. So I'm excited to  
21 participate at this early stage of the project. And I'll  
22 just echo, I think, the points made by other  
23 commissioners.

24 In particular, you know, one lesson I took away  
25 from the EIR for the housing element, which is obviously

1 an EIR in a completely different context, but that EIR  
2 seems to constrain future options. And, obviously, it's  
3 not possible to study every possible alternative. And I  
4 realize that's a difficult part of CEQA.

5 But I think it would be wise, as Commissioner  
6 Schindler pointed out, to evaluate increasing the amount  
7 of commercial space, potentially to the maximum allowed,  
8 as that might be something that the City would be  
9 interested in.

10 And I also think Commissioner Ferrick's  
11 suggestion of evaluating a lower parking alternative is  
12 wise. So my comments are broadly aligned with the rest of  
13 the commission. Thanks.

14 CHAIR DO: Thank you, Commissioner Ehrich.

15 I also wanted to return to what our public  
16 commenter said about being very near the bay front and the  
17 wetlands. And from past EIRs, I feel like there always is  
18 discussion of -- I forget the terms, but basically  
19 minimizing impacts on a sensitive habitat nearby. I don't  
20 think this is really feedback that will change what  
21 happens in the EIR, but I did want to emphasize her  
22 comments about just how close this site is to sensitive  
23 wetlands. So just kind of throwing extra emphasis to  
24 that.

25 And I do acknowledge that in EIRs, that language

1 is typically there.

2 Commissioner Ehrich.

3 COMMISSIONER EHRICH: Sorry. I realize I  
4 actually had one more question. And I think maybe this is  
5 for the CEQA consultant. As I said, this is my first EIR  
6 Scoping Session, so I'm not entirely familiar with the  
7 process.

8 Is there modeling that will go on as part of the  
9 EIR that should commercial space be included, would the  
10 modeling of VMT have anything to do with the specific uses  
11 of that commercial space? Like, in my head, say, if there  
12 were to be a grocery store as part of this development or  
13 nearby, in my head, that would reduce VMT because people  
14 need food a lot. And if they have to drive to a grocery  
15 store, then that causes them to drive. But don't know if  
16 the modeling gets that specific or not.

17 MS. WEIS: Hi, again, Chair. To answer  
18 Commissioner Ehrich's question, there is modeling involved  
19 with the VMT analysis for the EIR. And it's dependent on  
20 land use type.

21 So when there's no specific tenant identified for  
22 a commercial use, there is some generalized commercial  
23 trip generation rates and data that go in that captures,  
24 you know, a range of commercial uses that could go into  
25 that space. So if, like the applicant mentioned, there's

1 no tenant identified, then we would use that generic  
2 commercial evaluation in the VMT analysis.

3 CITY ATTORNEY: And, if I may add to that, too.  
4 I know that Ms. Weis and her team have been coordinating  
5 with City staff to identify those assumptions that will  
6 leave that future flexibility that the Commission was  
7 asking about.

8 Our goal is to capture uses that don't overstate  
9 the impact, but at least set the ceiling of the potential  
10 impacts at the higher end so that we don't have to go back  
11 and relook at a more intensive use in the future.

12 And if something were to come in that was less  
13 intense, that would already have been analyzed because the  
14 EIR would have already identified any more severe impacts.  
15 So we are trying to address the comment of flexibility in  
16 that way.

17 COMMISSIONER EHRICH: That is great to hear.  
18 Thank you.

19 CHAIR DO: Great. Thank you.

20 I'll look to our EIR consultant and staff and  
21 check in to see if the feedback of the Commission  
22 regarding alternatives -- I think that's -- mainly the  
23 bulk of our comments have been alternatives that explore  
24 and allow flexibility and kind of the worst case scenario  
25 of impacts. Just kind of check in that you've gotten the

1 feedback you were seeking.

2 MS. WEIS: Hi, Chair Do.

3 Yes. I've taken notes, and I'll go back and  
4 watch the video of this meeting. But we -- I've captured  
5 your comments about the potential alternatives that the  
6 Commission wants to evaluate, related to possibly  
7 maximizing the commercial space; evaluating a lower  
8 parking requirement alternative for the project.

9 I also have notes about, you know, making sure we  
10 address the impacts to transit, including access to the  
11 Caltrain Station, and then impacts to biological  
12 resources, including the bay lands, birds, and wetlands.

13 I think --

14 CHAIR DO: I think --

15 MS. WEIS: Did I capture it all?

16 CHAIR DO: I think so.

17 And, Vice Chair Schindler, I think you also had  
18 an alternative that looked at just eliminating commercial  
19 and maximizing --

20 MS. WEIS: Right. I got that one.

21 VICE CHAIR SCHINDLER: Yes. The idea of  
22 potentially 100 percent residential.

23 And I think I'll just take the moment -- a moment  
24 to just say explicitly what I'm not proposing as an  
25 alternative.
