

MIDDLE AVENUE COMPLETE STREETS PROJECT

Nealon Park Frontage Changes

As part of the Middle Avenue Complete Streets project, the City Council approved modifications to the parking in front of Nealon Park. These changes will be installed in early October and include placing the bikeway adjacent to the sidewalk and conversion of the parking to parallel parking. A buffer will be placed between the bikeway and the parking and the same number of handicap spaces will remain. There will be minor alterations to the sidewalk to accommodate the bikeway.

Parking Changes

48 current parking stalls

16 parking stalls after redesign

Bikeway design

6 to 10-foot wide bikeway

3 to 6-foot wide buffer

Separated from parking by striping and bollards

Existing Nealon Park Frontage

Future Nealon Park Frontage
